

A global leader in digital health

At ResMed, we pioneer innovative solutions that treat and keep people out of the hospital, empowering them to live healthier, higher-quality lives. Our digital health technologies and cloud-connected medical devices transform care for people with sleep apnea, COPD, and other chronic diseases. Our comprehensive out-of-hospital software platforms support the professionals and caregivers who help people stay healthy in the home or care setting of their choice. By enabling better care, we improve quality of life, reduce the impact of chronic disease, and lower costs for consumers and healthcare systems in more than 140 countries.

Sleep apnea

An estimated **936 million people** suffer from sleep apnea or sleep suffocation – the upper airway closes off causing the body to jolt “awake” to take breaths throughout the night.¹

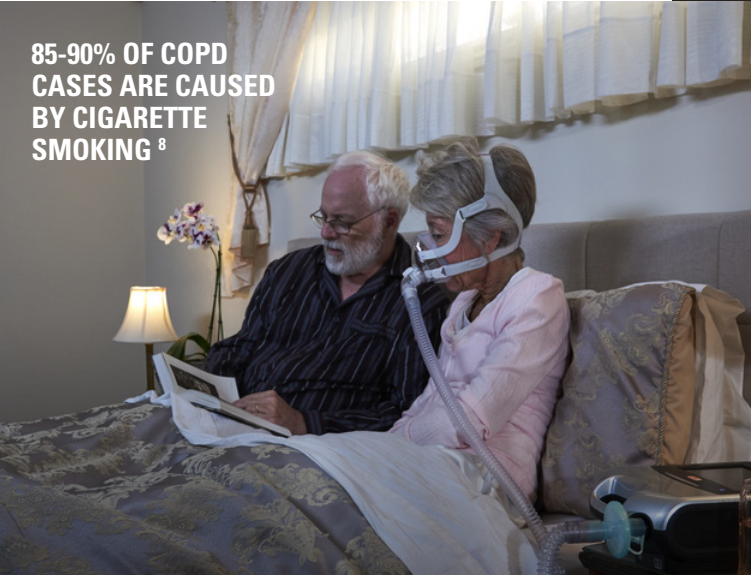

ResMed provides: CPAP therapy that’s smaller, quieter, more comfortable, more connected.

- **4% fewer inpatient and emergency dept. visits** for every nightly hour slept on CPAP²
- **62% lower all-cause mortality rate** when treating sleep apnea with CPAP³
- **87% patient adherence** when remotely and self monitored⁴

ALSO HAVE SLEEP APNEA

85-90% OF COPD CASES ARE CAUSED BY CIGARETTE SMOKING⁸

COPD/asthma/lung disease

An estimated **380 million people** suffer from chronic obstructive pulmonary disease,⁹ the world’s third leading killer.¹⁰

Over **330 million people** worldwide are living with asthma.¹¹

ResMed provides: The world’s most complete digital solution suite throughout a patient’s journey.

- Cloud-connected invasive, non-invasive, and bilevel ventilation devices
- Non-invasive ventilation (NIV) reduces one-year risk of death in COPD patients by 76%¹²
- Propeller Health digital sensor and app connect to most COPD and asthma inhalers. For asthma, it helps increase symptom-free days 48%¹³ and reduce emergency visits 53%¹⁴

SaaS

More people want to **age in place** or other low-cost **out-of-hospital** settings.

ResMed provides: Software that helps thousands of out-of-hospital organizations work more efficiently to deliver personalized care.
