

NEWS RELEASE

CareFusion and ResMed Announce Distribution Agreement for U.S. Hospital Market

7/25/2011

Agreement marks CareFusion's entry into the adult and pediatric non-invasive ventilation market; establishes proven U.S. sales partner for ResMed

SAN DIEGO, July 25, 2011 /PRNewswire via COMTEX/ --

CareFusion (NYSE: CFN), a leading, global medical technology company and **ResMed** (NYSE: RMD), a leading developer, manufacturer and distributor of medical equipment for treating, diagnosing and managing sleep-disordered breathing and other respiratory disorders today announced a five-year agreement providing CareFusion the exclusive right to distribute the ResMed Stellar(TM) 100 and 150 non-invasive ventilators (NIV) and their related accessories into the U.S. institutional healthcare market.

The agreement, effective immediately, provides strategic benefits to both companies. CareFusion will now have a more competitive offering in the institutional NIV market, which is expected to grow by more than 6 percent annually. For ResMed, it provides a timely introduction of its new ventilation products, with their unique performance, size and mobility features valuable to clinicians, caregivers and patients, via CareFusion's long-standing relationships with U.S. hospitals, long-term acute care and skilled nursing facilities. CareFusion will also market and sell the Stellar 100 and 150 related accessories, including tubing and filters.

"The addition of ResMed's Stellar ventilator fills an important need in the respiratory care market segment for our

customers," said Tony Lopez, senior vice president and general manager of **Respiratory Care** at CareFusion. "This strategic agreement also directly aligns with our mission to improve health care costs and quality care to patients."

"Our partnership with CareFusion creates a strong strategic fit and allows ResMed to effectively address the U.S. institutional market with an established leader in the industry," commented Geoff Neilson, ResMed's president, respiratory care strategic business unit. "The Stellar ventilator provides CareFusion with a product having differentiated features and a competitive price point. We have established a good relationship with CareFusion and look forward to it being a long-standing one."

About the Stellar 100 and 150 non-invasive ventilators

The Stellar ventilators are small, quiet, and versatile and deliver ResMed's high-quality ventilation performance for adult and pediatric patients, with both invasive and non-invasive applications. In addition, it has several monitoring features caregivers will especially appreciate, such as ResMed's leading leak-compensation algorithm, TiControl(TM) and on-screen waveforms for managing leak and patient-ventilator synchrony -- two common problems that occur when administering non-invasive ventilation in an institutional setting. It is also portable with a built-in rechargeable battery. The ResMed Stellar 100 and 150 were cleared by the Food and Drug Administration (FDA) earlier this year.

About ResMed

ResMed is a leading developer, manufacturer and distributor of medical equipment for treating, diagnosing, and managing sleep-disordered breathing and other respiratory disorders. The company is dedicated to developing innovative products to improve the lives of those who suffer from these conditions and to increasing awareness among patients and healthcare professionals of the potentially serious health consequences of untreated sleep-disordered breathing.
