FORWARD LOOKING STATEMENTS

This presentation contains “forward-looking statements” within the meaning of Section 27A of the Securities Act and Section 21E of the Exchange Act. These statements include statements about plans, strategies, financial performance, prospects or future events and involve known and unknown risks that are difficult to predict. As a result, our actual results, performance or achievements may differ materially from those expressed or implied by these forward-looking statements. In some cases, you can identify forward-looking statements by the use of words such as “may,” “could,” “expect,” “intend,” “plan,” “seek,” “anticipate,” “believe,” “estimate,” “predict,” “potential,” “continue,” “likely,” “will,” “would” and variations of these terms and similar expressions, or the negative of these terms or similar expressions. Such forward-looking statements are necessarily based upon estimates and assumptions that, while considered reasonable by us and our management, are inherently uncertain. Important factors that may cause actual results to differ materially from current expectations include, but are not limited to: the factors discussed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2012, under the sections titled “Risk Factors” in Part I, Item 1A and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in Part II, Item 7; general economic uncertainty in key global markets and a worsening of global economic conditions or low levels of economic growth; levels of spending in business and leisure segments as well as consumer confidence; declines in occupancy and average daily rate; limited visibility with respect to short and medium-term group bookings; loss of key personnel; hostilities, including future terrorist attacks, or fear of hostilities that affect travel; travel-related accidents; natural or man-made disasters such as earthquakes, tsunamis, tornados, hurricanes, floods, oil spills and nuclear incidents; our ability to successfully achieve certain levels of operating profit at hotels that have performance guarantees with our third-party owners; our ability to successfully execute and implement our organizational realignment and the costs associated with such organizational realignment; the impact of hotel renovations; our ability to successfully execute our common stock repurchase program; the seasonal and cyclical nature of the real estate and hospitality businesses; changes in distribution arrangements, such as through internet travel intermediaries; changes in the tastes and preferences of our customers; relationships with associates and labor unions and changes in labor laws; financial condition of, and our relationships with, third-party property owners, franchisees and hospitality venture partners; risks associated with potential acquisitions and dispositions; changes in federal, state, local or foreign tax law; increases in interest rates and operating costs; foreign exchange rate fluctuations or currency restructurings; lack of acceptance of new brands or innovation; general volatility of the capital markets and our ability to access the capital markets; changes in the competitive environment in our industry and the markets where we operate; outcomes of legal proceedings; and violations of regulations or laws related to our franchising business. These factors are not necessarily all of the important factors that could cause our actual results, performance or achievements to differ materially from those expressed in or implied by any of our forward-looking statements. Other unknown or unpredictable factors also could harm our business, financial condition, results of operations or cash flows. All forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by the cautionary statements set forth above. Forward-looking statements speak only as of the date they are made, and we do not undertake or assume any obligation to update publicly any of these forward-looking statements to reflect actual results, new information or future events, changes in assumptions or changes in other factors affecting forward-looking statements, except to the extent required by applicable laws. If we update one or more forward-looking statements, no inference should be drawn that we will make additional updates with respect to those or other forward-looking statements.
