

Operational Expertise. Opportunities for Growth.

SunCoke Energy Partners, L.P. (NYSE: SXCP) is a unique raw materials processing and handling master limited partnership (MLP) serving the steel and utility industries. In our cokemaking and coal logistics businesses, our tolling, fee-based business model is designed to limit commodity risk and produce consistent earnings. Our sponsor and general partner is a wholly owned subsidiary of SunCoke Energy, Inc. (NYSE: SXC), with more than 50 years of expertise in cokemaking and a 58 percent interest in our company.

Coke – an essential ingredient in blast furnace steel production – is made by heating metallurgical coal at extremely high temperatures until it's nearly pure carbon. Our advanced technology captures waste heat from the cokemaking process for power generation and meets or exceeds environmental standards.

Core Strengths

We've built our company on what we do best: processing coal to make high-quality coke. Now we're exploring new paths for growth by leveraging our expertise in raw material processing and handling.

Priorities for Growth

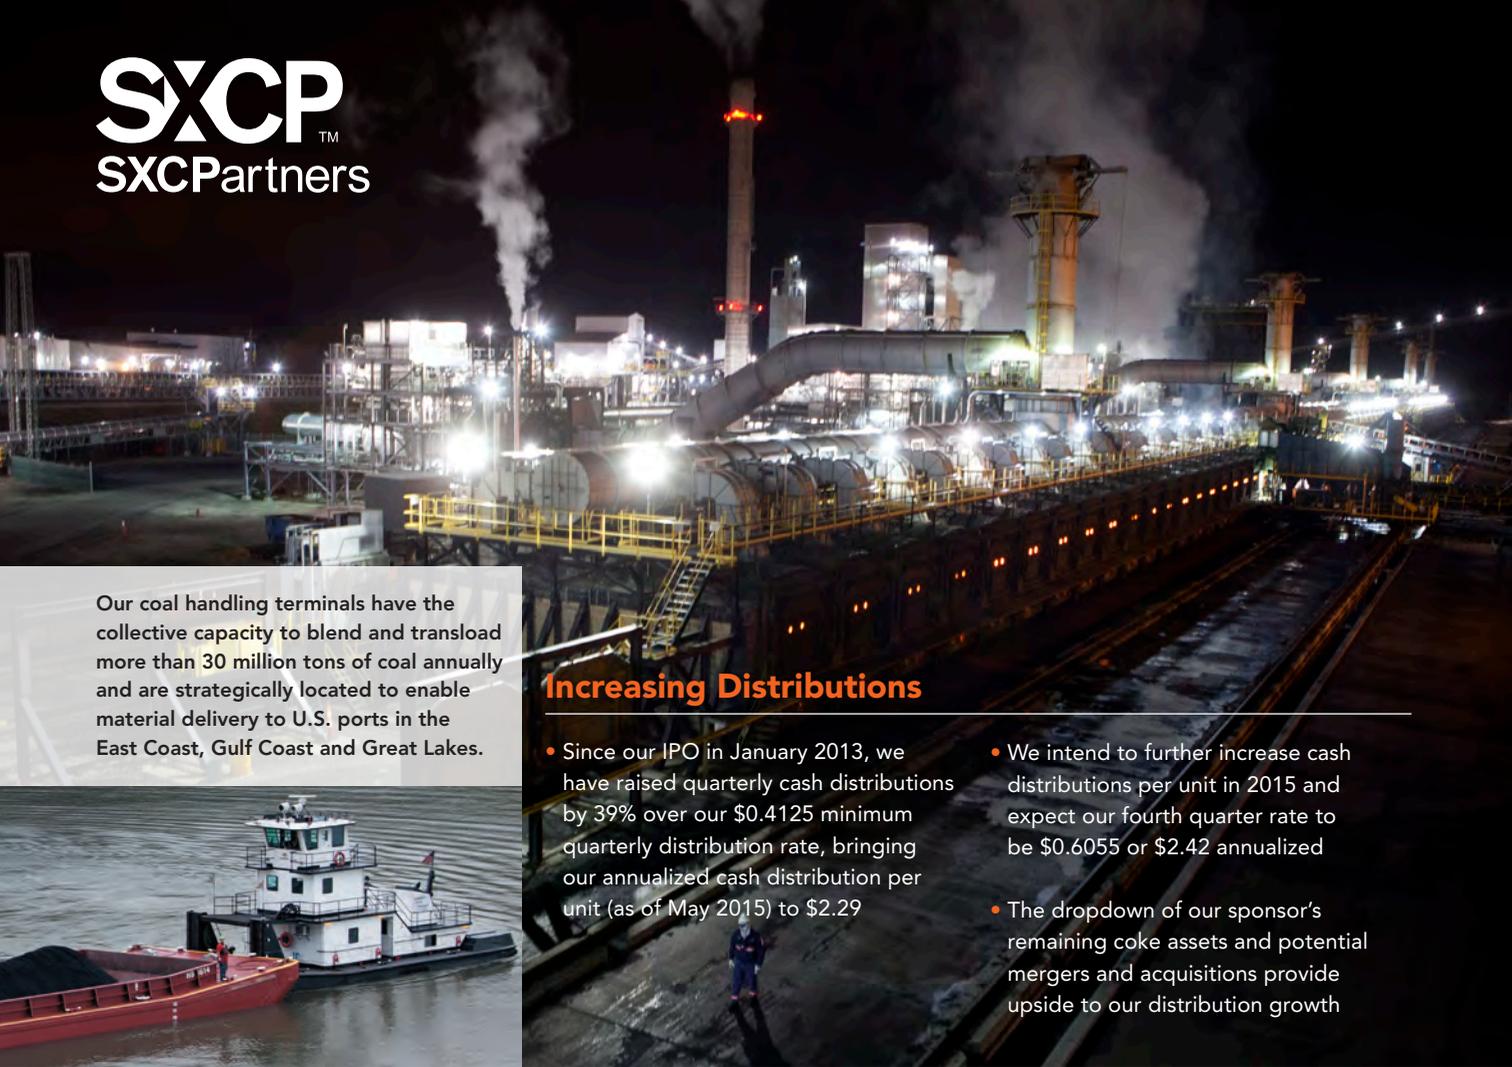

The foundation of our success and first priority is operations excellence. The SunCoke Way is a set of processes that drives excellence throughout our organization through a focus on continuous improvement in operations, productivity, safety and environmental standards.

Our second priority is to work with our sponsor on future dropdowns of their existing domestic and Brazilian cokemaking assets in 2015 and 2016. We also see potential for new greenfield coke plant development as many of the U.S. and Canada's aging facilities are retired over the next several years. Our sponsor holds permits to build a new cokemaking facility in Kentucky that we will have first rights to purchase once operational.

The third priority is to drive growth. Our highly experienced team in coal logistics is working to grow volumes to maximize current capacity even as we pursue potential follow-on acquisitions to build scale and market presence. In addition, we are looking to broaden the scope of our potential growth by leveraging our expertise in the processing and handling of raw materials for industrial customers.

This fact sheet contains forward-looking statements, including statements about the plans and strategies of SunCoke Energy Partners, L.P. Factors that could cause actual results to differ materially from management's expectations are disclosed in SunCoke Energy Partners' most recent filings with the Securities and Exchange Commission. Investors are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this publication. Except as required by law, SunCoke Energy Partners does not intend to update or revise its forward-looking statements, whether as a result of new information, future events or otherwise.

Our coal handling terminals have the collective capacity to blend and transload more than 30 million tons of coal annually and are strategically located to enable material delivery to U.S. ports in the East Coast, Gulf Coast and Great Lakes.

Increasing Distributions

- Since our IPO in January 2013, we have raised quarterly cash distributions by 39% over our \$0.4125 minimum quarterly distribution rate, bringing our annualized cash distribution per unit (as of May 2015) to \$2.29
- We intend to further increase cash distributions per unit in 2015 and expect our fourth quarter rate to be \$0.6055 or \$2.42 annualized
- The dropdown of our sponsor's remaining coke assets and potential mergers and acquisitions provide upside to our distribution growth

A Compelling Investment

Consistent cash flow

Our secure, long-term "take-or-pay" cokemaking contracts contain key pass-through provisions that insulate us from commodity risks and generate stable cash flow. Enduring customer relationships in our coal logistics business support our outlook for consistent and predictable fee-based coal handling revenues.

Strong sponsor support

Our sponsor provides certain protections under our omnibus agreement, including the promise to purchase under current contract terms coke produced by us but not taken by customers through 2018, and to indemnify us for pre-existing known and unknown environmental, regulatory and other liabilities.

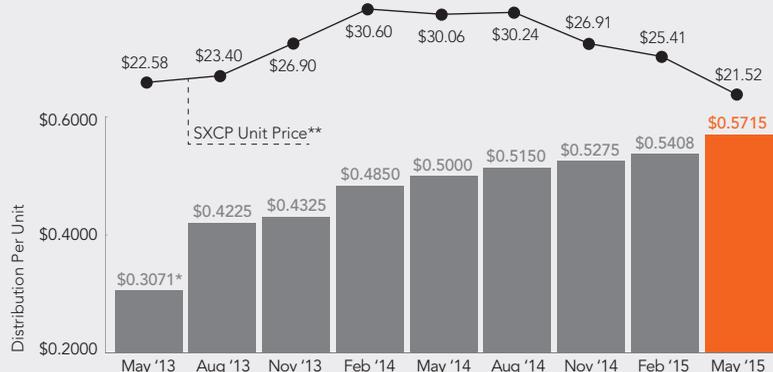

Growth opportunities ahead

Our operating efficiencies, lower cost of capital due to our partnership structure and proven ability to deliver competitively priced, high-quality coke provide an edge to pursue construction of a new cokemaking facility. We will also pursue growth through the potential acquisition or development of raw material processing and handling businesses.

SXCP Profile: (as of March 31, 2015)

Unit Price:	\$ 21.29
Units Outstanding:	39M
