Mansea Metal Featured on the No. 9 Axalta Chevrolet at Kentucky Speedway

7/6/2017

PHILADELPHIA--(BUSINESS WIRE)-- Axalta Coating Systems (NYSE: AXTA), a leading global supplier of liquid and powder coatings, has partnered with Mansea Metal to feature Mansea as the primary sponsor on the hood of JR Motorsports' No. 9 Axalta Chevrolet driven by William Byron at Kentucky Speedway on Friday, July 7, 2017. Byron captured his second consecutive win in the NASCAR Xfinity Series last weekend in Daytona, after claiming his first career victory one week earlier in Iowa.

The sponsorship opportunity coincides with Mansea's 10-year anniversary. Established in 2007, the company provides high-quality metal roofing and siding solutions for residential, commercial, agricultural, and equestrian customers. Mansea began with a mission to demonstrate the advantages of choosing metal over asphalt to provide customers with lasting, durable roofing solutions. Years later, with the addition of a second location, a post frame building line, and much more, Mansea Metal has become a trusted partner to the communities in which it operates. The company will celebrate its 10-year anniversary with an open house event in August.

"What a great way to celebrate Mansea's 10-year anniversary," said John Griffith, Owner of Mansea. "We have done many big things over the course of 10 years, but nothing like this. Mansea Metal and Midwestern Buildings are proud to sponsor JR Motorsports' No. 9 Axalta Chevrolet car driven by William Byron."

"We are excited to partner with Mansea Metal at the Kentucky Speedway," said Mike Cash, Senior Vice President and President of Industrial Coatings at Axalta. "Like Axalta, Mansea is focused on bringing high quality solutions to its customers by offering superior products and exceptional customer service. We enjoy doing business with customers who align with our company values and are excited to see a great customer like Mansea represented on the track."
