

2018 BARCLAYS AMERICAS SELECT FRANCHISE CONFERENCE

Allison Dukes, Chief Financial Officer

May 15, 2018

IMPORTANT CAUTIONARY STATEMENT

The following should be read in conjunction with the financial statements, notes and other information contained in the Company's 2017 Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, and Current Reports on Form 8-K.

This presentation includes non-GAAP financial measures to describe SunTrust's performance. We reconcile those measures to GAAP measures within the presentation or in the appendix. The Company presents the following non-GAAP measures because many investors find them useful. Specifically:

- Consistent with Securities and Exchange Commission Industry Guide 3, the Company presents efficiency ratios and net interest margin on a fully taxable equivalent ("FTE") basis. The FTE basis adjusts for the tax-favored status of net interest income from certain loans and investments using applicable federal and state income tax rates to increase tax-exempt interest income to a taxable-equivalent basis.
- The Company presents certain capital information on a tangible basis, including return on average tangible common equity. These measures exclude the after-tax impact of purchase accounting intangible assets.
- Similarly, the Company presents Efficiency ratio-FTE, Tangible efficiency ratio-FTE, and Adjusted tangible efficiency ratio-FTE. The efficiency ratio is computed by dividing Noninterest expense by Total revenue. Efficiency ratio-FTE is computed by dividing Noninterest expense by Total revenue-FTE. Tangible efficiency ratio-FTE excludes the amortization related to intangible assets and certain tax credits. Adjusted tangible efficiency ratio-FTE removes the impact of certain material and potentially non-recurring items from the calculation of Tangible efficiency ratio-FTE.
- The Company presents adjusted EPS which excludes the impact of certain material and potentially non-recurring items.

This presentation contains forward-looking statements. Statements regarding future levels of earnings per share, efficiency ratios, capital returns, investment banking market share, the number of full service branches, common equity tier 1 ratio, technology enhancements (including potential cost savings as a result thereof) and the percentage of client solutions available through digital platforms are forward-looking statements. Also, any statement that does not describe historical or current facts is a forward-looking statement. These statements often include the words "believes," "expects," "anticipates," "estimates," "intends," "plans," "targets," "strategies," "goals," "initiatives," "opportunity," "potentially," "probably," "projects," "outlook," or similar expressions or future conditional verbs such as "may," "will," "should," "would," and "could." Such statements are based upon the current beliefs and expectations of management and on information currently available to management. They speak as of the date hereof, and we do not assume any obligation to update the statements made herein or to update the reasons why actual results could differ from those contained in such statements in light of new information or future events.

Forward-looking statements are subject to significant risks and uncertainties. Investors are cautioned against placing undue reliance on such statements. Actual results may differ materially from those set forth in the forward-looking statements. Factors that could cause actual results to differ materially from those described in the forward-looking statements can be found in Part I, Item 1A., "Risk Factors," in our Annual Report on Form 10-K for the year ended December 31, 2017 and in other periodic reports that we file with the SEC. Those factors include: current and future legislation and regulation could require us to change our business practices, reduce revenue, impose additional costs, or otherwise adversely affect business operations or competitiveness; we are subject to stringent capital adequacy and liquidity requirements and our failure to meet these would adversely affect our financial condition; the monetary and fiscal policies of the federal government and its agencies could have a material adverse effect on our earnings; our financial results have been, and may continue to be, materially affected by general economic conditions, and a deterioration of economic conditions or of the financial markets may materially adversely affect our lending and other businesses and our financial results and condition; changes in market interest rates or capital markets could adversely affect our revenue and expenses, the value of assets and obligations, and the availability and cost of capital and liquidity; our earnings may be affected by volatility in mortgage production and servicing revenues, and by changes in carrying values of our servicing assets and mortgages held for sale due to changes in interest rates; interest rates on our outstanding financial instruments might be subject to change based on regulatory developments, which could adversely affect our revenue, expenses, and the value of those financial instruments; disruptions in our ability to access global capital markets may adversely affect our capital resources and liquidity; we are subject to credit risk; we may have more credit risk and higher credit losses to the extent that our loans are concentrated by loan type, industry segment, borrower type, or location of the borrower or collateral; we rely on the mortgage secondary market and GSEs for some of our liquidity; loss of customer deposits could increase our funding costs; any reduction in our credit rating could increase the cost of our funding from the capital markets; we are subject to litigation, and our expenses related to this litigation may adversely affect our results; we may incur fines, penalties and other negative consequences from regulatory violations, possibly even inadvertent or unintentional violations; we are subject to certain risks related to originating and selling mortgages, and may be required to repurchase mortgage loans or indemnify mortgage loan purchasers as a result of breaches of representations and warranties, or borrower fraud, and this could harm our liquidity, results of operations, and financial condition; we face risks as a servicer of loans; consumers and small businesses may decide not to use banks to complete their financial transactions, which could affect net income; we have businesses other than banking which subject us to a variety of risks; negative public opinion could damage our reputation and adversely impact business and revenues; we may face more intense scrutiny of our sales, training, and incentive compensation practices; we rely on other companies to provide key components of our business infrastructure; competition in the financial services industry is intense and we could lose business or suffer margin declines as a result; we continually encounter technological change and must effectively develop and implement new technology; maintaining or increasing market share depends on market acceptance and regulatory approval of new products and services; we have in the past and may in the future pursue acquisitions, which could affect costs and from which we may not be able to realize anticipated benefits; we depend on the expertise of key personnel, and if these individuals leave or change their roles without effective replacements, operations may suffer; we may not be able to hire or retain additional qualified personnel and recruiting and compensation costs may increase as a result of turnover, both of which may increase costs and reduce profitability and may adversely impact our ability to implement our business strategies; our framework for managing risks may not be effective in mitigating risk and loss to us; our controls and procedures may not prevent or detect all errors or acts of fraud; we are at risk of increased losses from fraud; our operational and communications systems and infrastructure may fail or may be the subject of a breach or cyber-attack that, if successful, could adversely affect our business and disrupt business continuity; a disruption, breach, or failure in the operational systems and infrastructure of our third party vendors and other service providers, including as a result of cyber-attacks, could adversely affect our business; natural disasters and other catastrophic events could have a material adverse impact on our operations or our financial condition and results; the soundness of other financial institutions could adversely affect us; we depend on the accuracy and completeness of information about clients and counterparties; our accounting policies and processes are critical to how we report our financial condition and results of operation, and they require management to make estimates about matters that are uncertain; depressed market values for our stock and adverse economic conditions sustained over a period of time may require us to write down some portion of our goodwill; our stock price can be volatile; we might not pay dividends on our stock; our ability to receive dividends from our subsidiaries or other investments could affect our liquidity and ability to pay dividends; and certain banking laws and certain provisions of our articles of incorporation may have an anti-takeover effect.

EXPORTING CIB'S COMPETITIVE ADVANTAGE TO COMMERCIAL BANKING

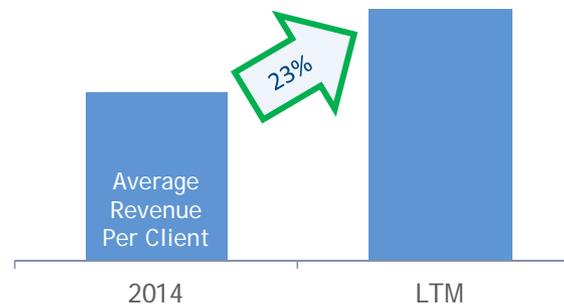

Overview

- Traditional Commercial Banking client: \$5MM - \$250MM in annual revenue (usually private)
 - SunTrust has ~10k Commercial Banking clients
 - Primarily within traditional Southeast / Mid-Atlantic markets
- Our strategy: bring the skills, discipline, and client coverage model from CIB (including product and industry expertise) to Commercial Banking clients
 - The vast majority of division presidents now have a background in investment banking (most previously worked at STRH)
 - Created targeted industry specialties (e.g. aging services, ports & logistics, restaurants & retail)
- Differentiated business model affords us the opportunity to serve clients outside of traditional retail banking footprint
 - Recently expanded into Ohio and Texas

Competitive Position

Proven Success with Significant Growth Potential

Future Growth Drivers:

- Capture additional market share in existing markets
- Continued build out of product & industry expertise (helps drive capital markets revenue)
- Geographic expansion

IMPROVING EFFICIENCY & RETURNS

SAVINGS FUND INVESTMENTS

Organizational Efficiency

- Streamline operations (in connection with investments in core systems which digitize end-to-end processes and enhance teammate effectiveness)
- Optimize staffing models (e.g. spans and layers, voluntary retirement)
- Tailor benefits and incentive plans

Technology Enhancements

- Increase automation and self-service channels
- Continue transition to the cloud
- Continue to upgrade and digitize core systems (teller platform, payments hub, collections, etc.)
- Leverage new loan origination platforms in Wholesale and Consumer which improve loan cycle times and automate certain capabilities

Procurement

- Consolidate vendors
- Improve contract terms
- Optimize in-house services and capabilities

Real Estate

- Pursue further branch reductions
- Consolidate non-branch real estate (e.g. mortgage offices recently reduced from 10 to 3)

Cost Saving Initiatives

Client-Friendly Technology

- Make ongoing enhancements to mobile app
- Create enterprise client portal (see slide 14)
- Improve treasury & payments platform (underway)
- Digitize mortgage application (April 2018)
- Increase digital, self-serve channels (80-90% of solutions will be available via digital platforms by 2019)

Fund Investments in Growth & Technology

Wholesale Revenue Growth

- Expand industry and product expertise in CIB and Commercial Banking (introduced new Aging Services vertical in 1Q 18)
- Attract, develop, and retain top talent (improves strategic relevance with clients)
- Continue expansion of Commercial Banking
- Enhance CRE capabilities (including integration of recently acquired agency lending platform)

Consumer Revenue Growth

- Expand digital lending platform (LightStream and additional third party partnerships), including further marketing spend
- Grow wealth management by retaining top talent and acquiring new teams (in new and existing markets)

SPOTLIGHT ON TECHNOLOGY

Primary Objectives

1

Provide a consistent, superior client experience by creating an integrated ecosystem which meets clients where they are and brings SunTrust into their experiences

2

Enhance the efficiency and effectiveness of the Company

Recent Progress

Upgraded mobile app & digital foundation (improved user interface + capabilities)

Added new payment capabilities in partnership with Zelle and TCH network

Built private cloud and began expanding to hybrid public & private cloud

Established a data lake foundation
Introduced SunTrust Deals (provides targeted offers based on spending history & preferences)

Upgraded loan origination platforms in Wholesale & Mortgage

Digitized front-end of mortgage application (SmartGUIDE)

Introduced robotic capabilities (~60 bots in use, 150+ bots in pipeline)

Future Enhancements

Introduce enterprise client portal (see slide 14)

Create mobile app for Wholesale clients

Enhance flexibility and integration through API's

Advance data lake capabilities to enhance client analytics

Leverage LightStream platform to enhance digital lending & fraud detection

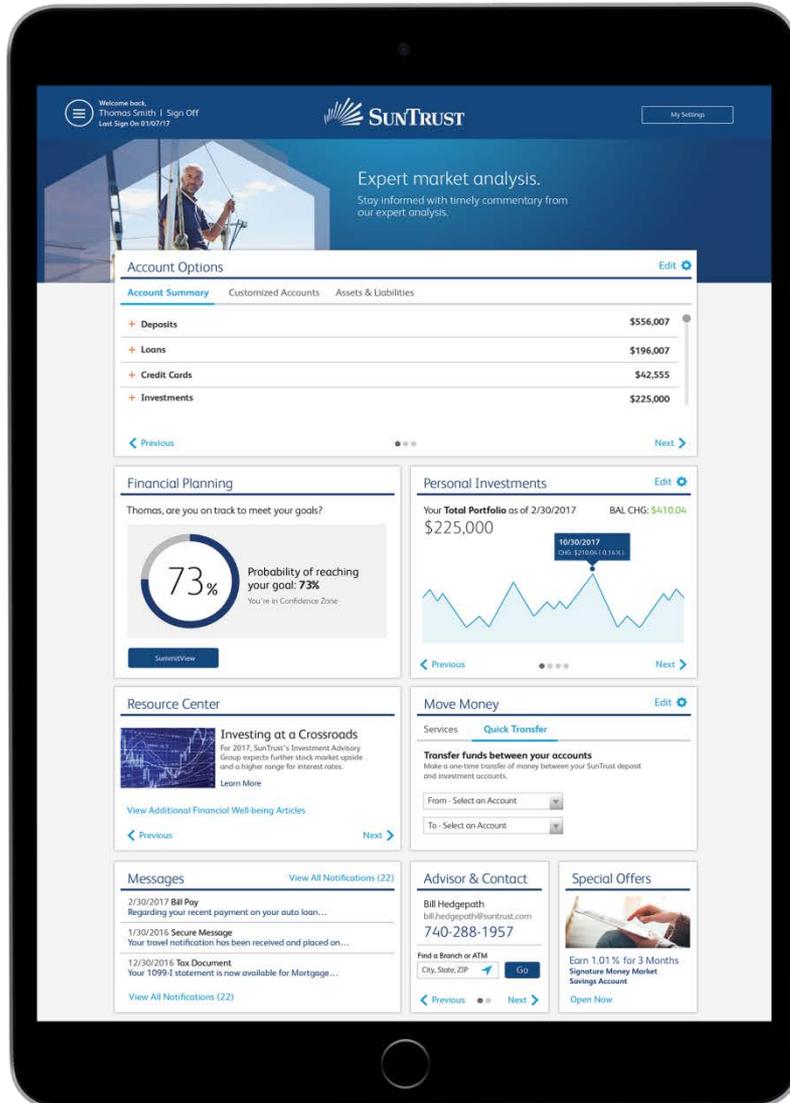

Deploy intelligent processes and bots using process automation, data, and cognitive chat

Impact

- ✓ Serves as a client's single source for financial confidence and increases relevance with clients
- ✓ Improves ability to leverage third party partnerships (*created first API between Blend & Black Knight*)
- ✓ Increases agility & lowers cost to serve (*cloud migration has eliminated ~\$15 million in annual costs, more to come*)
- ✓ Provides relevant, tailored, and timely offers across client segments
- ✓ Improves teammate effectiveness through smarter client insight
- ✓ Shortens loan cycle times and streamlines end-to-end origination
- ✓ Provides scalable, cloud-based loan origination platforms
- ✓ Improves service delivery and speed
- ✓ Reduces opportunity for human error
- ✓ Improves efficiency

SPOTLIGHT ON TECHNOLOGY

Enterprise Client Portal

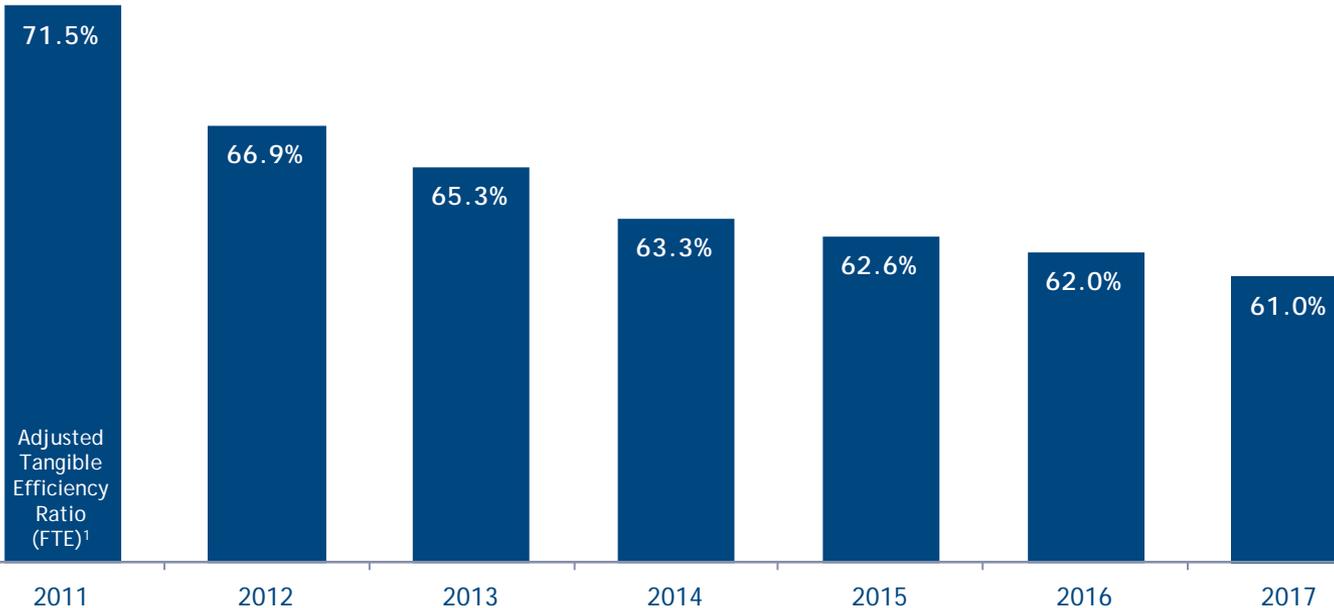

Client Value

- **Holistic, Tailored User Experience:** provides a consolidated relationship view
- **Integrated Planning Tools:** enables clients to establish a plan, set goals and track progress while also providing valuable financial well-being resources
- **Ease of Use:** intuitive and simple user experience based on industry-leading API and cloud technology
- **Accessibility:** responsive design with consistent experience on any screen

Business Value

- **Connects with Clients:** leverages APIs to connect to other channels outside of traditional banking (branch, ATM, call center)
- **Flexibility:** segment specific functionality (e.g. advisor info, entitlements) and differentiated visual treatment
- **Efficiency:** reusable components with less duplication of key functionality (e.g. money movement)
- **Speed to Market:** scalable portal infrastructure and modular framework with built-in integrations

IMPROVING EFFICIENCY: PROVEN SUCCESS & FUTURE OPPORTUNITY

Key Takeaways

- We will achieve our targets
- Fostering a culture of continuous improvement is as important as these goals
 - We have significant opportunity beyond <60%
- Efficiencies generate capacity to invest in growth and do more for our clients

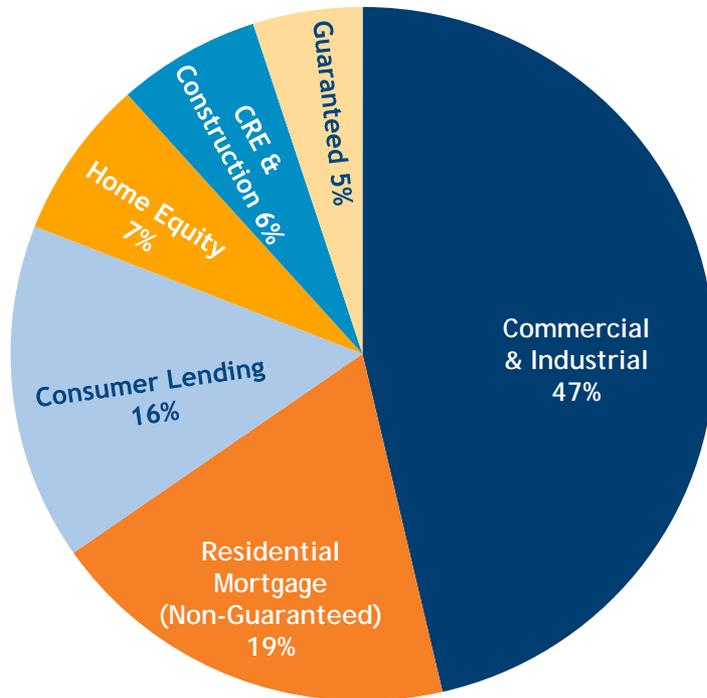

¹ Adjusted figures are intended to provide management and investors information on trends that are more comparable across periods and potentially more comparable across institutions. Slide #18:

1. If a 250% risk-weighting for MSRs (as contemplated in the FRB's 'Simplifications' NPR) was applied, the Common Equity Tier 1 ratio would be 9.7%
2. Represents the difference between the starting and minimum Basel III Common Equity Tier 1 Ratios resulting from the Federal Reserve's 2017 CCAR severely adverse scenario. Following the release of 2017 DFAST Results, SunTrust investigated the driver of \$1.1B in 'other losses' projected by the FRB. This loss resulted from a conservative interpretation of regulatory reporting requirements, which has since been adjusted. Going forward this loss is expected to be ~\$0.1B. Therefore, \$1.0 billion of losses are excluded from the capital erosion in the 2017 DFAST results, which reduces stressed capital erosion to 2.1% from 2.5%
