

TASIAST: LONGITUDINAL SECTION

Figure 1. Longitudinal section of the Tasiast deposit (looking west) showing all drill holes completed up to year-end 2010 (black dots), holes completed since January 1, 2011 (blue dots) and holes remaining in the feasibility drilling program (red dots). Heat map inset is a grade-thickness representation of mineralized drill hole intercepts cutting the Greenschist Zone at West Branch.
