Solid Foundations Disciplined Growth

Annual General Meeting, Vancouver BC
May 2nd, 2013

Kışladağ, Gold Mine, Turkey

Forward Looking Statement

Certain of the statements made in this Presentation may contain forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 and forward-looking information within the meaning of applicable Canadian securities law. These forward-looking statements or information include, but are not limited to statements or information with respect to financial disclosure, estimates of future production, the future price of gold, estimations of mineral reserves and resources, estimates of anticipated costs and expenditures, development and production timelines and goals and strategies.

We have made numerous assumptions about the forward-looking statements and information contained herein, including among other things, assumptions about the price of gold, anticipated costs and expenditures and our ability to achieve our goals. Even though our management believes that the assumptions made and the expectations represented by such statements or information are reasonable, there can be no assurance that the forward-looking statement or information will prove to be accurate.

Forward-looking statements and forward-looking information by their nature are based on assumptions and involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements or information. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking statements or information. Such risks, uncertainties and other factors include, among others, the following: gold price volatility; risks of not meeting production and cost targets; discrepancies between actual and estimated production, mineral reserves and resources and metallurgical recoveries; mining operational and development risk; litigation risk; regulatory restrictions, including environmental regulatory restrictions and liability; risks of sovereign investment; currency fluctuations; speculative nature of gold exploration; global economic climate; dilution; share price volatility; the risks that the integration of acquired businesses may take longer than expected; the anticipated benefits of the integration may be less than estimated and the cost of acquisition may be higher than anticipated; the ability to complete acquisitions; competition; loss of key employees; additional funding requirements; share price volatility; community and non-governmental actions and defective title to mineral claims or property, as well as those factors discussed in our most recent interim and annual management discussion and analysis and in the sections entitled "Risk Factors" in the Company's Annual Information Form & Form 40-F dated March 28, 2013, including the risk factors incorporated by reference in such circular. Should one or more of these risks, uncertainties or other factors materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking statements and information.

Although we have attempted to identify factors that would cause actual actions, events or results to differ materially from those described in forward-looking statements and information, there may be other factors that cause actual results, performances, achievements or events to not be as anticipated, estimated or intended. Also many of the factors are beyond our control. There can be no assurance that forward-looking statements or information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly you should not place undue reliance on forward-looking statements or information.

Except as required by law, we do not expect to update forward-looking statements and information continually as conditions change and you are referred to the full discussion of the Company's business contained in the Company's reports filed with the securities regulatory authorities in Canada and the U.S. All forward-looking statements and information contained in this presentation are qualified by this cautionary statement.

Cautionary Note to U.S. Investors: Mineral Reserves and Mineral Resources - The terms "mineral reserve", "proven mineral reserve" and "probable mineral reserve" referred to in the Company's disclosure are Canadian mining terms as defined in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects under the guidelines set out in the Canadian Institute of Mining, Metallurgy and Petroleum (the "CIM") Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council as amended from time to time by the CIM. These definitions differ from the definitions in the United States Securities & Exchange Commission ("SEC") Guide 7. Under SEC Guide 7 standards, a "final" or "bankable" feasibility study is required to report reserves, the three-year historic average price is used in any reserve or cash flow analysis to designate reserves and the primary environmental analysis or report must be filed with the appropriate governmental authority.

The terms "mineral resource", "measured mineral resource", "indicated mineral resource", "inferred mineral resource" used in the Company's disclosure are Canadian mining terms as defined in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects under the guidelines set out in the CIM Standards. Mineral resources which are not mineral reserves do not have demonstrated economic viability.

While the terms "mineral resource", "measured mineral resource", "indicated mineral resource", and "inferred mineral resource" are recognized and required by Canadian regulations, they are not defined terms under standards in the United States and normally are not permitted to be used in reports and registration statements filed with the SEC. As such, information contained in the Company's disclosure concerning descriptions of mineralization and resources under Canadian standards may not be comparable to similar information made public by U.S. companies in SEC filings. With respect to "inferred mineral resource" there is a great amount of uncertainty as to their existence and a great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an "inferred mineral resource" will ever be upgraded to a higher category. Investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves.

Operating on Solid Foundations

Where we are Today

Kışladağ, Gold Mine, Turkey

660,000 oz/year gold producer with 20 years of international operating experience

Leading low cost operator with solid margins and a strong balance sheet

Experienced management team with a proven ability to safely build and operate mines

Track record of value creation through exploration, development, production and acquisitions

Solid reserve and resource base –
P&P gold reserves:
28.1 Moz*

Transparent dividend policy linked to gold price and gold sold

*Includes 2009 Certaj Reserves

Our Assets

Diversified, Well-Balanced Global Portfolio

eldorado gold

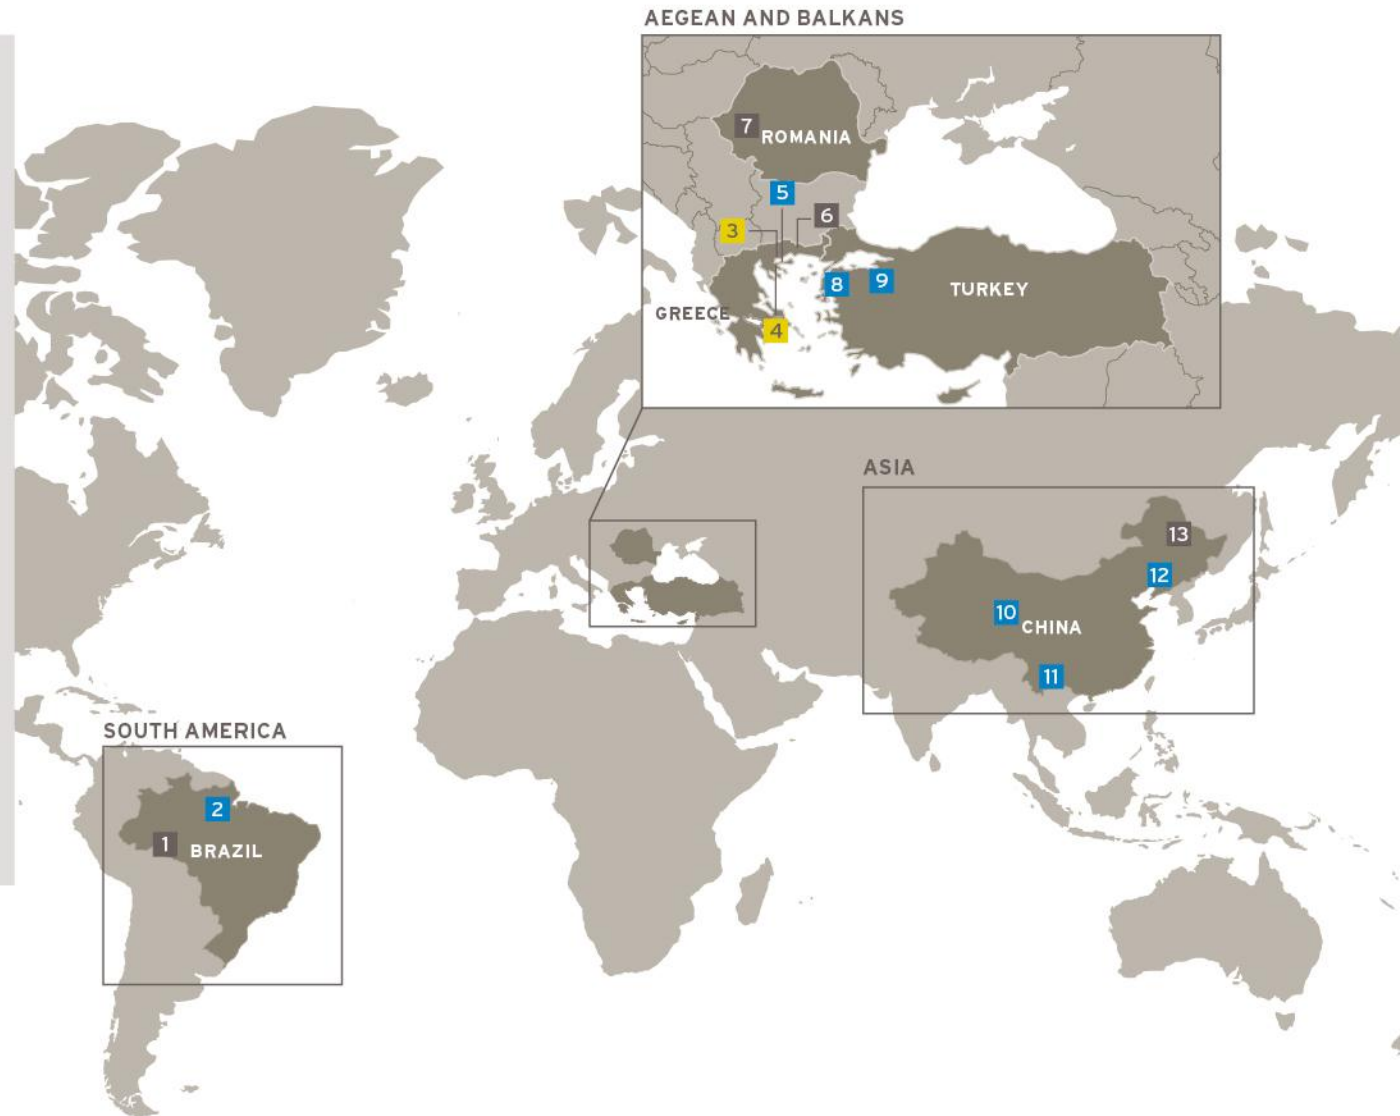

- PRODUCTION
- CONSTRUCTION
- DEVELOPMENT

Operating Mines

- 2 VILA NOVA, BRAZIL (IRON ORE)
- 5 STRATONI, GREECE (SILVER, LEAD, ZINC)
- 8 EFEMÇUKURU, TURKEY (GOLD)
- 9 KIŞLADAĞ, TURKEY (GOLD)
- 10 TANJIANSHAN, CHINA (GOLD)
- 11 JINFENG, CHINA (GOLD)
- 12 WHITE MOUNTAIN, CHINA (GOLD)

Development Projects

- 1 TOCANTINZINHO, BRAZIL
- 3 OLYMPIAS, GREECE
- 4 SKOURIES, GREECE
- 6 PERAMA HILL, GREECE
- 7 CERTEJ, ROMANIA
- 13 EASTERN DRAGON, CHINA

Proven Track Record

Significant Growth at Low Costs

eldorado gold

Over the past 5 years we have:

- Doubled production
- Materially increased reserves and resources per share
- Maintained costs in the lowest quartile
- Expanded our margins

Increasing Reserves & Resources

Increasing Production

Q1 Highlights

Solid Quarter, Robust Financial Position

Financial and Operating Results	Q1 2013	Q1 2012
Revenues (M)	\$338.1	\$271.5
Gold produced (oz)	163,768	155,535
Gold sold (oz)	189,346	150,661
Average realized gold price (\$/oz)	\$1,622	\$1,707
Cash operating costs (\$/ozsold) ⁽¹⁾	\$505	\$452
Total cash cost (\$/ozsold) ⁽¹⁾	\$567	\$529
Gross profit from gold mining operations (M) ⁽¹⁾	\$163.8	\$150.7
Adjusted profit attributable to shareholders of the Company (M) ⁽²⁾	\$79.8	\$67.9
Adjusted earnings per share attributable to shareholders of the Company – Basic (\$/share) ⁽²⁾	\$0.11	\$0.11
Dividends paid (Cdn\$/share)	\$0.07	\$0.09
Cash flow from operating activities before changes in non-cash working capital (M) ⁽¹⁾	\$139.9	\$102.8

Financial Position (at March 31, 2013)	(millions)
Cash and cash equivalents	\$668.6
Term deposits	\$158.9
Total debt	\$595.8
Undrawn credit facilities ⁽³⁾	\$375.0

Why Invest in Eldorado?

Our Competitive Strengths

1.

Solid Foundations

- Strong production base from 5 producing gold mines (656Koz @ \$483/oz in 2012)
- Reserve base of 28.1Moz* of gold
- Experienced management and expert in-country teams
- Proven record of growth at low costs

*Includes 2009 Certej Reserves

2.

Balance Sheet Strength

- \$827.5M in Cash and Term Deposits
- \$375M in available credit facility
- 7.5% debt-to-capital employed

3.

Disciplined Growth

- Diversified, well-balanced portfolio
- Low risk, near-term growth from Kisladag expansion
- Flexible development options from 6 projects
- Rigorous budgeting and forecasting procedures
