

Solid Foundations Disciplined Growth

Investor Presentation June 2013

Forward Looking Statement

Certain of the statements made in this Presentation may contain forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 and forward-looking information within the meaning of applicable Canadian securities law. These forward-looking statements or information include, but are not limited to statements or information with respect to financial disclosure, estimates of future production, the future price of gold, estimations of mineral reserves and resources, estimates of anticipated costs and expenditures, development and production timelines and goals and strategies.

We have made numerous assumptions about the forward-looking statements and information contained herein, including among other things, assumptions about the price of gold, anticipated costs and expenditures and our ability to achieve our goals. Even though our management believes that the assumptions made and the expectations represented by such statements or information are reasonable, there can be no assurance that the forward-looking statement or information will prove to be accurate.

Forward-looking statements and forward-looking information by their nature are based on assumptions and involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements or information. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking statements or information. Such risks, uncertainties and other factors include, among others, the following: gold price volatility; risks of not meeting production and cost targets; discrepancies between actual and estimated production, mineral reserves and resources and metallurgical recoveries; mining operational and development risk; litigation risk; regulatory restrictions, including environmental regulatory restrictions and liability; risks of sovereign investment; currency fluctuations; speculative nature of gold exploration; global economic climate; dilution; share price volatility; the risks that the integration of acquired businesses may take longer than expected; the anticipated benefits of the integration may be less than estimated and the cost of acquisition may be higher than anticipated; the ability to complete acquisitions; competition; loss of key employees; additional funding requirements; share price volatility; community and non-governmental actions and defective title to mineral claims or property, as well as those factors discussed in our most recent interim and annual management discussion and analysis and in the sections entitled "Risk Factors" in the Company's Annual Information Form & Form 40-F dated March 28, 2013, including the risk factors incorporated by reference in such circular. Should one or more of these risks, uncertainties or other factors materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking statements and information.

Although we have attempted to identify factors that would cause actual actions, events or results to differ materially from those described in forward-looking statements and information, there may be other factors that cause actual results, performances, achievements or events to not be as anticipated, estimated or intended. Also many of the factors are beyond our control. There can be no assurance that forward-looking statements or information will prove to be accurate, as actual results and future events could differ materially from those anticipate in such statements. Accordingly you should not place undue reliance on forward-looking statements or information.

Except as required by law, we do not expect to update forward-looking statements and information continually as conditions change and you are referred to the full discussion of the Company's business contained in the Company's reports filed with the securities regulatory authorities in Canada and the U.S. All forward-looking statements and information contained in this presentation are qualified by this cautionary statement.

Cautionary Note to U.S. Investors: Mineral Reserves and Mineral Resources - The terms "mineral reserve", "proven mineral reserve" and "probable mineral reserve" referred to in the Company's disclosure are Canadian mining terms as defined in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects under the guidelines set out in the Canadian Institute of Mining, Metallurgy and Petroleum (the "CIM") Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council as amended from time to time by the CIM. These definitions differ from the definitions in the United States Securities & Exchange Commission ("SEC") Guide 7. Under SEC Guide 7 standards, a "final" or "bankable" feasibility study is required to report reserves, the three-year historic average price is used in any reserve or cash flow analysis to designate reserves and the primary environmental analysis or report must be filed with the appropriate governmental authority.

The terms "mineral resource", "measured mineral resource", "indicated mineral resource", "inferred mineral resource" used in the Company's disclosure are Canadian mining terms as defined in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects under the guidelines set out in the CIM Standards. Mineral resources which are not mineral reserves do not have demonstrated economic viability.

While the terms "mineral resource", "measured mineral resource," "indicated mineral resource", and "inferred mineral resource" are recognized and required by Canadian regulations, they are not defined terms under standards in the United States and normally are not permitted to be used in reports and registration statements filed with the SEC. As such, information contained in the Company's disclosure concerning descriptions of mineralization and resources under Canadian standards may not be comparable to similar information made public by U.S companies in SEC filings. With respect to "inferred mineral resource" there is a great amount of uncertainty as to their existence and a great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an "inferred mineral resource" will ever be upgraded to a higher category. Investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves.

Operating on Solid Foundations

Where we are Today

660,000 oz/year gold producer with 20 years of international operating experience

Leading low cost operator with solid margins and a strong balance sheet

Experienced management team with a proven ability to safely build and operate mines

Track record of value creation through exploration, development, production and acquisitions

Solid reserve and resource base – P&P gold reserves: 28.1 Moz*

Transparent dividend policy linked to gold price and gold sold

Our Assets

Diversified, Well-Balanced Global Portfolio

CONSTRUCTION

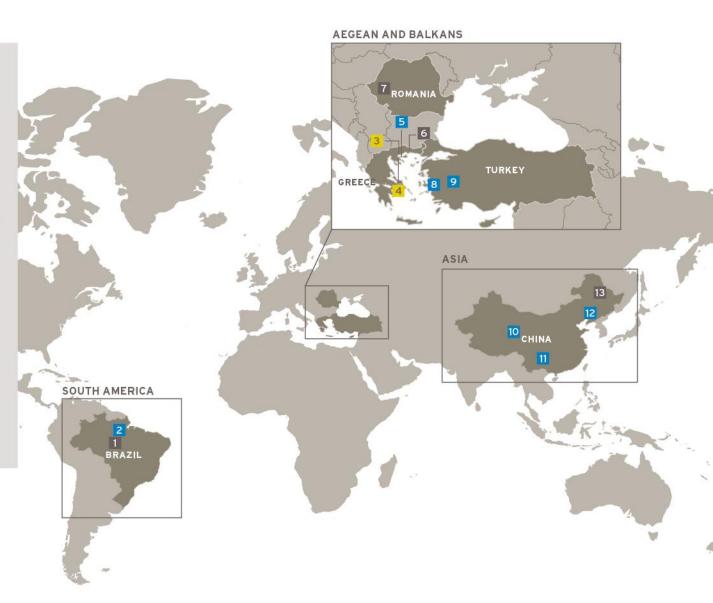

DEVELOPMENT

Operating Mines

- 2 VILA NOVA, BRAZIL (IRON ORE)
- 5 STRATONI, GREECE (SILVER, LEAD, ZINC)
- 8 EFEMÇUKURU, TURKEY (GOLD)
- 9 KIŞLADAĞ, TURKEY (GOLD)
- 10 TANJIANSHAN, CHINA (GOLD)

- 4 SKOURIES, GREECE
- 6 PERAMA HILL, GREECE
- 7 CERTEJ, ROMANIA
- B EASTERN DRAGON, CHINA

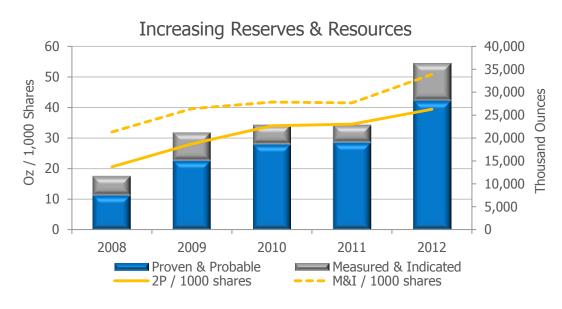

Proven Track Record

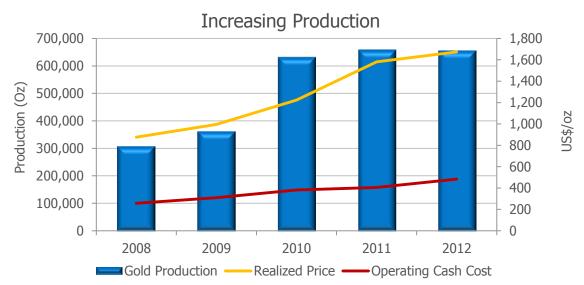

Significant Growth at Low Costs

Over the past 5 years we have:

- Doubled production
- Materially increased reserves and resources per share
- Maintained costs in the lowest quartile
- Expanded our margins

Q1 Highlights

Solid Quarter, Robust Financial Position

Financial and Operating Results	Q1 2013	Q1 2012
Revenues (M)	\$338.1	\$271.5
Gold produced (oz)	163,768	155,535
Gold sold (oz)	189,346	150,661
Average realized gold price (\$/oz)	\$1,622	\$1,707
Cash operating costs (\$/ozsold) ⁽¹⁾	\$505	\$452
Total cash cost (\$/ozsold) ⁽¹⁾	\$567	\$529
Gross profit from gold mining operations $(M)^{(1)}$	\$163.8	\$150.7
Adjusted profit attributable to shareholders of the Company $(M)^{(2)}$	\$79.8	\$67.9
Adjusted earnings per share attributable to shareholders of the Company – Basic (\$/share) ⁽²⁾	\$0.11	\$0.11
Dividends paid (Cdn\$/share)	\$0.07	\$0.09
Cash flow from operating activities before changes in non-cash working capital $(M)^{(1)}$	\$139.9	\$102.8

Financial Position (at March 31, 2013)	(millions)
Cash and cash equivalents	\$668.6
Term deposits	\$158.9
Total debt	\$595.8
Undrawn credit facilities(3)	\$375.0

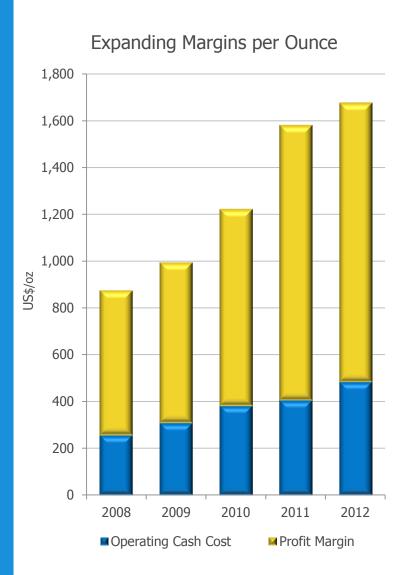

Amounts are in million US\$ unless otherwise stated.

- (1) The Company uses non-IFRS performance measures such as cash operating costs, total cash costs, gross profit from gold mining operations and cash flow from operations before changes in noncash working capital throughout this document. These are non-IFRS measures. Please see our First Quarter 2013 Financial and Operating Results release of May 2, 2013 and MD&A for a discussion of non-IFRS measures.
- (2) Excludes \$125.2 million non-cash charge to profit related to change in Greek Corporate income tax rates (\$0.17 per share).
- (3) Eldorado has a revolving credit facility with HSBC of \$375.0 million. No amounts were drawn down as at March 31, 2013.

^{***2013} peer group estimates based on average analyst estimates

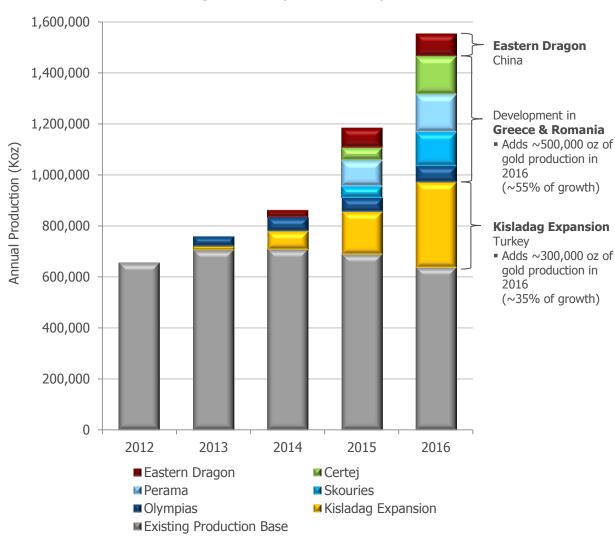

Multiple Sources of Growth

Low Risk Expansion and Flexible Development

- Number of projects and phased development provide high option value
- Kisladag expansion is the priority – offers low cost, low risk growth
- 4 projects in Greece and Romania offer flexible, "bite-size" growth

Growth Through Development & Expansion

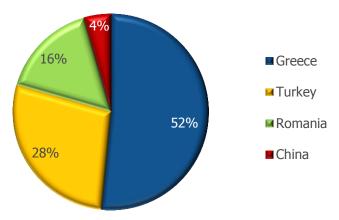

Disciplined Capital Outlay

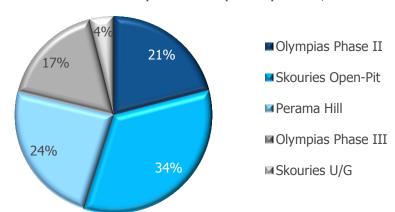

Development Capital Spread Across Multiple Projects eldoradogold

- Spending ~\$2 billion globally across 5 operating mines and 5 development projects
- Spending **~\$1 billion in Greece** across 3 projects (~50% of global development spending)
- Well Financed with:
 - Cash and Term Deposits of \$827.5M
 - Undrawn Revolving Credit Facility of \$375M
 - Annual EBITDA of ~\$600M

Total Development Capex Split – \$2B

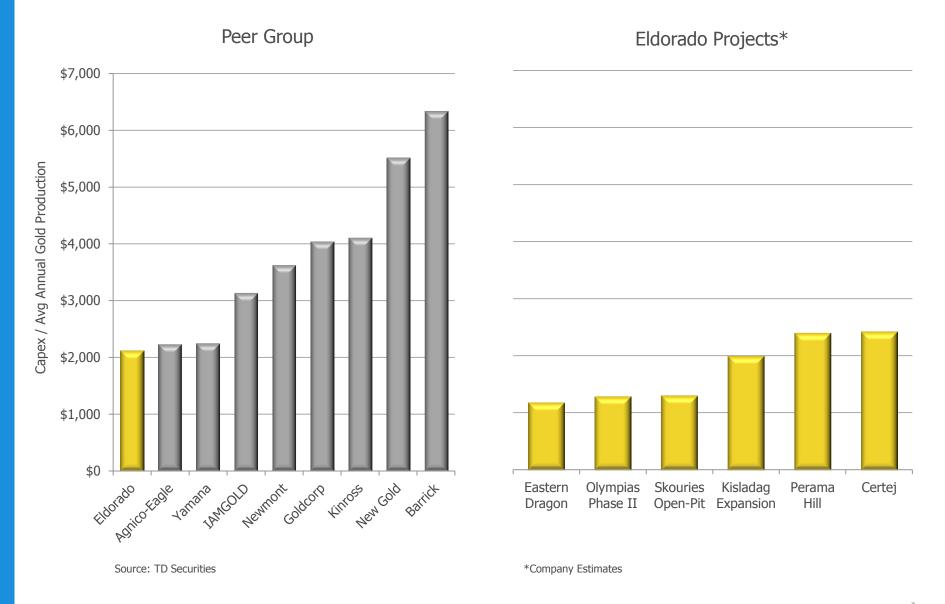

Greece Development Capex Split - \$1B

Highly Capital Efficient Projects

Lowest Capex per Incremental Ounce of Production

Returning Capital to Shareholders

High Dividend Payout Ratio

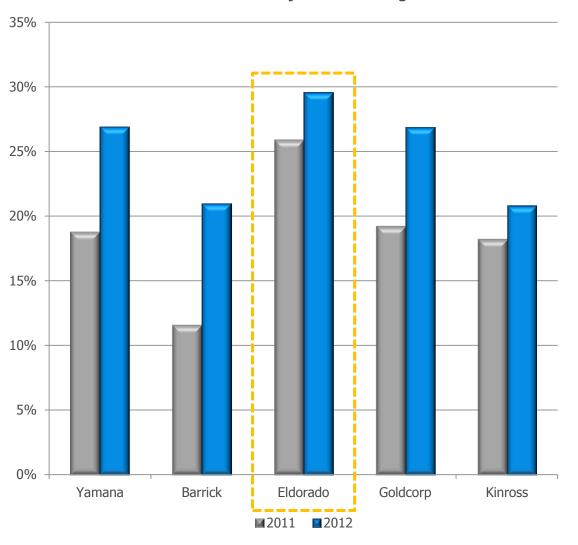

- Sustainable dividend formula - linked to gold price and ounces sold
- Formula encourages capital discipline and improved capital return predictability

Why Invest in Eldorado?

Our Competitive Strengths

Solid **Foundations**

- Strong production base from 5 producing gold mines (656Koz @ \$483/oz in 2012)
- Reserve base of 28.1Moz* of gold
- Experienced management and expert in-country teams
- Proven record of growth at low costs

Balance Sheet Strength

- \$827.5M in Cash and Term Deposits
- \$375M in available credit facility
- 7.5% debt-to-capital employed

Disciplined Growth

- Diversified, wellbalanced portfolio
- Low risk, near-term growth from Kisladag expansion
- Flexible development options from 6 projects
- Rigorous budgeting and forecasting procedures

*Includes 2009 Certej Reserves

Background Information

Kisladag Gold Mine - Turkey

Our Flagship Asset

Overview

- Largest gold mine in Turkey
- Discovered by Eldorado; commercial production began in July 2006

- Plan to place 13.2 million tonnes on the leach pad at grade of 1.1 g/t Au
- Capital expenditure: ~US\$200 million with the majority assigned to the Phase IV expansion project

Overview		
Location	Usak Prov	ince, Western Turkey
Deposit		Gold porphyry
Ownership		100% Eldorado
Туре		Open pit Heap leach
Expected Life of Mine* (LOM)		14 years
Recovery		65%
Strip Ratio 2013		1.75:1
Reserves and Resources	(at Dec 3	1, 2012)
2P Reserves	10	.0 Moz Au @ 0.70 g/t
M+I Resources	11.	.6 Moz Au @ 0.64 g/t

Cash operating cost (US\$/oz)	\$332	\$350-\$360

^{*} Based on current 2P reserves

Efemcukuru Gold Mine - Turkey

PRODUCTION

Overview

 Discovered by Eldorado; commercial production began in December 2011

2013 Guidance

- Plan to process 402,000 tonnes of ore at a grade of 9.3 g/t Au
- ~25,000 oz Au will be produced from existing concentrate stockpiles in addition to underground production
- Contract in place to sell all of 2013 concentrate to a third party
- Capital expenditure: ~US\$45 million

Location	Izmir Province, Western Turkey	
Deposit	High grade,	epithermal gold vein
Ownership		100% Eldorado
Туре	Flotation	Underground and carbon in leach

Notes on Mineral Resources and Reserves:

- 1. Mineral reserves and mineral resources are as of December 31, 2012.
- 2. Mineral reserves are included in the mineral resources.
- 3. The mineral reserves and mineral resources are disclosed on a total project basis (at 100%).
- 4. The Olympias mineral reserves and mineral resources include 2.408 million tonnes of economically recoverable old tailings that grade 3.4 g/t Au and 14 g/t Aq. These are added into the gold and silver Proven reserve and Measured resource categories, respectively.
- 5. Due to a significantly changed resource model the 2009 pre-existing reserves for the Certej project (2,410 ounces at 1.60 g/t Au and 11.5 g/t Ag) are now deemed as historical. New reserves for Certej will be estimated later in 2013.
