

Consistency

Growing through low cost operations

September 2014

Efemçukuru Gold Mine, Turkey

Forward Looking Statement

Certain of the statements made in this Presentation may contain forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 and forward-looking information within the meaning of applicable Canadian securities law. These forward-looking statements or information include, but are not limited to statements or information with respect to financial disclosure, estimates of future production, the future price of gold, estimations of mineral reserves and resources, estimates of anticipated costs and expenditures, development and production timelines and goals and strategies.

We have made numerous assumptions about the forward-looking statements and information contained herein, including among other things, assumptions about the price of gold, anticipated costs and expenditures and our ability to achieve our goals. Even though our management believes that the assumptions made and the expectations represented by such statements or information are reasonable, there can be no assurance that the forward-looking statement or information will prove to be accurate.

Forward-looking statements and forward-looking information by their nature are based on assumptions and involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements or information. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking statements or information. Such risks, uncertainties and other factors include, among others, the following: gold price volatility; risks of not meeting production and cost targets; discrepancies between actual and estimated production, mineral reserves and resources and metallurgical recoveries; mining operational and development risk; litigation risk; regulatory restrictions, including environmental regulatory restrictions and liability; risks of sovereign investment; currency fluctuations; speculative nature of gold exploration; global economic climate; dilution; share price volatility; the risks that the integration of acquired businesses may take longer than expected; the anticipated benefits of the integration may be less than estimated and the cost of acquisition may be higher than anticipated; the ability to complete acquisitions; competition; loss of key employees; additional funding requirements; share price volatility; community and non-governmental actions and defective title to mineral claims or property, as well as those factors discussed in our most recent interim and annual management discussion and analysis and in the sections entitled "Risk Factors" in the Company's Annual Information Form & Form 40-F dated March 28, 2013, including the risk factors incorporated by reference in such circular. Should one or more of these risks, uncertainties or other factors materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking statements and information.

Although we have attempted to identify factors that would cause actual actions, events or results to differ materially from those described in forward-looking statements and information, there may be other factors that cause actual results, performances, achievements or events to not be as anticipated, estimated or intended. Also many of the factors are beyond our control. There can be no assurance that forward-looking statements or information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly you should not place undue reliance on forward-looking statements or information.

Except as required by law, we do not expect to update forward-looking statements and information continually as conditions change and you are referred to the full discussion of the Company's business contained in the Company's reports filed with the securities regulatory authorities in Canada and the U.S. All forward-looking statements and information contained in this presentation are qualified by this cautionary statement.

Cautionary Note to U.S. Investors: Mineral Reserves and Mineral Resources - The terms "mineral reserve", "proven mineral reserve" and "probable mineral reserve" referred to in the Company's disclosure are Canadian mining terms as defined in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects under the guidelines set out in the Canadian Institute of Mining, Metallurgy and Petroleum (the "CIM") Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council as amended from time to time by the CIM. These definitions differ from the definitions in the United States Securities & Exchange Commission ("SEC") Guide 7. Under SEC Guide 7 standards, a "final" or "bankable" feasibility study is required to report reserves, the three-year historic average price is used in any reserve or cash flow analysis to designate reserves and the primary environmental analysis or report must be filed with the appropriate governmental authority.

The terms "mineral resource", "measured mineral resource", "indicated mineral resource", "inferred mineral resource" used in the Company's disclosure are Canadian mining terms as defined in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects under the guidelines set out in the CIM Standards. Mineral resources which are not mineral reserves do not have demonstrated economic viability.

While the terms "mineral resource", "measured mineral resource", "indicated mineral resource", and "inferred mineral resource" are recognized and required by Canadian regulations, they are not defined terms under standards in the United States and normally are not permitted to be used in reports and registration statements filed with the SEC. As such, information contained in the Company's disclosure concerning descriptions of mineralization and resources under Canadian standards may not be comparable to similar information made public by U.S. companies in SEC filings. With respect to "inferred mineral resource" there is a great amount of uncertainty as to their existence and a great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an "inferred mineral resource" will ever be upgraded to a higher category. Investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves.

Keeping it Consistent

Running a strong business

A global company

- Operations & projects in 5 countries
- Exceptional exploration potential
- Over 7,000 employees and contractors worldwide

Strong financial performance

- Cash at June 30, 2014: \$584.5M
- H1 Revenues: \$545.4M
- Available & undrawn credit facilities: \$375M

Strong operations

- 7 operating mines
- 2013 production: 721,201 oz Au
- 2014F: ~790,000 oz at
\$850/oz all-in sustaining costs
\$495/oz cash operating costs

Core strengths

- Experienced management team
- Consistent delivery on guidance and on budget
- Committed to the communities in which we operate

TSX: ELD

H1 Operating Highlights

Consistent production at low costs

Operating Results	H1 2013	H1 2014	FY 2014F
Gold produced (oz) ⁽¹⁾	347,739	397,074	790,000
Gold sold (oz)	365,606	381,249	-
All-in sustaining cash cost (\$/oz sold) ⁽²⁾	-	809	850
Total cash cost (\$/oz sold) ⁽²⁾	552	563	-
Cash operating cost (\$/oz sold) ⁽²⁾	492	504	495

(1) Includes production from tailings retreatment at Olympias.

(2) The Company uses non-IFRS performance measures throughout its disclosure. Please see our Q2 2014 MD&A for a discussion of non-IFRS measures.

Strong Operations: Turkey

Kisladag & Efemcukuru

H1 2014	Kisladag	Efemcukuru
Gold Production	144,055 oz	52,003 oz
Total cash cost	\$470/oz Au	\$561/oz Au
Average grade	0.90 g/t Au	8.27 g/t Au
Mine type	Open pit	Underground

*Based on current 2P reserves

Strong Operations: Turkey

Expanding Kisladag

- Phase IV expansion includes:
 - 20 Mt per annum of crushed ore to the leach pad at additional capital cost of \$90M
 - Installation of new primary gyratory crusher and 48" overland conveyor
 - Expanding ADR capacity
 - No significant change to mine fleet
 - Target completion mid 2016

Strong Operations: China

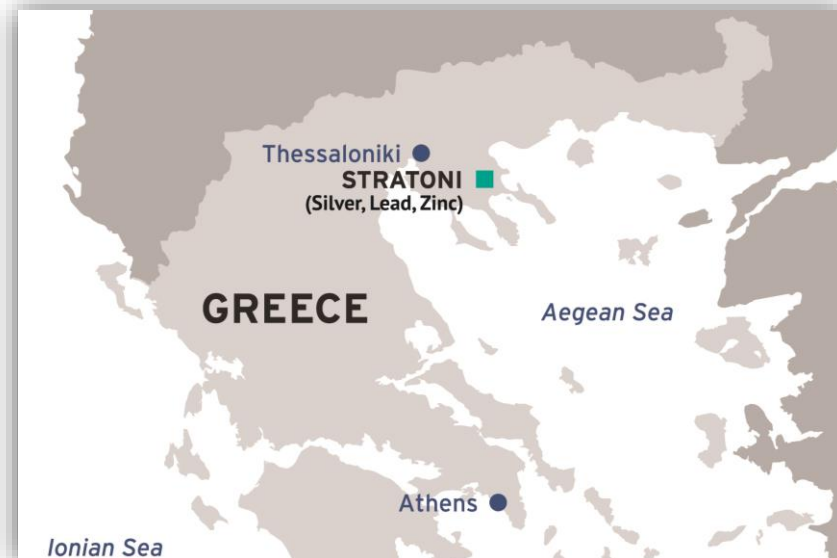

Consistently delivering value

H1 2014	Jinfeng	Tanjianshan	White Mountain
Gold production	86,863 oz	54,169 oz	47,473 oz
Total cash cost	\$664/oz	\$581/oz	\$636/oz
Average grade	4.08 g/t	3.37 g/t	3.84 g/t
Mine type	Open pit and underground	Open pit	Underground

Base Metal Operations: Brazil and Greece

Industry Leading Growth: Greece

Growing the Halkidiki Mining District

Greece: Construction Advancing at Skouries

Q2 Highlights

- Site clearing and earthwork advanced in main process area
- SAG mill foundation completed
- Mill equipment being pre-assembled
- Site batch plant construction began and completion expected during Q3
- Production expected late 2016

	Skouries
Estimated annual production	Open pit: 140,000 oz Au, 30,000 t Cu Underground: 90,000 oz Au, 22,000 t Cu
Estimated cash costs	Open pit: -\$500/oz Au Underground: \$190/oz Au
Capital costs	<ul style="list-style-type: none"> ■ \$450M to plant production with ore from open pit in 2016 ■ \$60M additional to complete underground development
Life of mine*	27 years

*Based on current 2P reserves

Greece: Continuing Progress at Olympias

Phased development

Phase I

(2012-2015)

- Refurbish plant & re-process 2.4 Mt of old tailings
- Drive tunnel between site & Stratoni valley
- Rehabilitate and develop underground mine

Phase II

(2016-2019)

- Underground production to existing plant
- 450,000 tpa at 8.9 g/t
- Production rate under optimization

Phase III

(2020 on)

- Underground expansion
- New mill in Stratoni valley
- Production of 170,000 oz Au/yr

Olympias Processing Plant, Greece

Romania and China: Moving Forward

Quality assets

Certej Highlights

- Trade-off studies to refine design options and costing underway
- Metallurgical testwork continued during Q2 to provide data for pressure oxidation (Pox) optimization
- Completion of feasibility study planned for Q1 2015

Eastern Dragon Timeline

- Q3 2014 – Submission of revised EIA
- Q1 2015 – Receipt of the Project Permit Approval (PPA)
- 2015 – Complete construction and commence production

Solid Financial Performance

Core Strengths

Our Approach

Strong Reputation

Scorecard

Our Approach

Operating with integrity

Community Projects

- Medical
- Educational
- Infrastructure
- Agriculture

Stakeholder Engagement

- Governments
- Communities
- Shareholders
- Employees

Environment

- Operate to stringent standards
- Continuous monitoring
- Regular external auditing

Health and Safety

- Occupational health programs
- Ongoing training
- Use of best available techniques

Strong Reputation

Earned by consistently delivering to plan

- Strong technical management
- Understanding the jurisdictions in which we operate
- Operating to the highest environmental and safety standards
- Prudent financial management
- Track record of value creation

Kisladag gold mine, Turkey

2014 Scorecard

Focusing on delivery

Corporate	▪ Announce resources and reserves update	✓ Q1
	▪ Closure of Glory Resources transaction	✓ Q1
	▪ Meet production and cash cost guidance (790Koz @ AISC \$850/oz)	Ongoing
Turkey	▪ Receive approval of Kisladag supplementary Environmental Impact Assessment (EIA)	✓ Q2
	▪ Receive board approval for 20Mt Kisladag expansion	✓ Q2
China	▪ Provide greater clarity on Eastern Dragon	✓ Q1
	▪ Pursue HK listing for assets	Ongoing
Greece	▪ Continue development at Olympias and Skouries	Ongoing
	▪ Optimize production rates for Olympias Phase II	Ongoing
	▪ Receive approval of Perama Hill EIA	Outstanding
Romania	▪ Updated technical report at Certej	✓ Q1
	▪ Optimization studies	Ongoing
Brazil	▪ Updated technical report at Tocantinzinho	
Health, Safety & Environment	▪ Continue to reduce our Lost-Time Incident Frequency Rate (LTIFR)	Ongoing
	▪ Further work to become International Cyanide Management Code (ICMC) Compliant	Ongoing

Background Information

White Mountain Gold Mine, China

Proven Track Record

Significant Growth at Low Costs

Over the past 5 years we have:

- Doubled production
- Materially increased reserves per share
- Maintained costs in the lowest quartile
- Expanded our margins

Increasing Reserves and Grade

Increasing Production

Gold Resources and Reserves

At December 31, 2013

Notes on Mineral Resources and Reserves:

1. Mineral reserves and mineral resources are as of December 31, 2013.
2. Mineral reserves are included in the mineral resources.
3. The mineral reserves and mineral resources are disclosed on a total project basis (at 100%).
4. The Olympias mineral reserves and mineral resources include 1.855 million tonnes of economically recoverable old tailings that grade 3.4 g/t Au. These are added into the gold and silver Proven reserve and Measured resource categories, respectively.
