

Forward Looking Statement

Non-IFRS Measures

Certain non-IFRS measures are included in this presentation, including average realized gold price per ounce sold, cash operating costs and cash operating costs per ounce sold, total cash costs and total cash costs per ounce sold, all-in sustaining costs ("AISC") and AISC per ounce sold, adjusted net earnings/(loss), adjusted net earnings/(loss), adjusted before changes in non-cash working capital, earnings before interest, taxes and depreciation and amortization ("EBITDA") and adjusted earnings before interest, taxes and depreciation and amortization ("Adjusted EBITDA"), free cash flow and sustaining capital. Please see the December 31, 2020 MD&A for explanations and discussion of these non-IFRS measures. The Company believes that these measures, in addition to conventional measures prepared in accordance with International Financial Reporting Standards ("IFRS"), provide investors an improved ability to evaluate the underlying performance of the Company. The non-IFRS measures are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. These measures are non-IFRS measures are intended to provide additional provide additional non-IFRS measures are intended to provide additional on the company. The non-IFRS measures of performance prepared in accordance with IFRS.

Cautionary Note about Forward-looking Statements and Information

Certain of the statements made and information provided in this presentation are forward-looking statements or information within the meaning of the United States Private Securities Litigation Reform Act of 1995 and applicable Canadian securities laws. Often, these forward-looking statements and forward-looking information can be identified by the use of words such as "plainars", "expects", "is expected", "budget", "continue", "projected", "scheduled", "estimates", "forecasts", "intends", "anticipates", or "believes" or the negatives thereof or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved.

Forward-looking statements or information contained in this presentation include, but are not limited to, statements or information with respect to: our expectations regarding the timing and quantity annual gold production; our strategy with respect to non-core assets; our guidance and outlook, including expected production, cost guidance and recoveries of gold; expectations on meeting guidance and outlook, benefits of the Amended Investment Agreement; expected next steps for the Kassandra Mines and timing thereof; timing of completion of Perama Hill technical report; expected steps to resume construction at Skouries and timing thereof; timing and cost of the construction of an underground decline at the Triangle mine and the associated benefits; expectations on expansion, construction and improvements at Lamaque, Efemcukuru, Olympias and Stratoni, and timing thereof; benefits of QMX acquisition; use of dry stack tailing and benefits thereof; on fineral resources to mineral resourc

Forward-looking statements and forward-looking information by their nature are based on assumptions and involve known and unknown risks, market uncertainties and other factors, which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements or information.

We have made certain assumptions about the forward-looking statements and information, including assumptions about: how the world-wide economic and social impact of COVID-19 is managed and the duration and extent of the COVID-19 prandemic; ability to achieve expected benefits of Amended Investment Agreement in Greece; ability to complete steps to resume construction at Skouries; ability to achieve expected benefits of QMX acquisition; timing and cost of construction, including in respect of an underground decline at the Triangle mine and the associated benefits; benefits of the improvements at Kisladag; our guidance and outlook, including expected production, cost guidance and recoveries of gold, the geopolitical, economic, permitting and legal climate that we operate in; the future price of gold and other commodities; the global concentrate market; exchange rates; anticipated costs, expenses and working capital requirements; production, mineral reserves and resources and metallurgical recoveries; the impact of acquisitions, suspensions or delays on our business; and the ability to achieve our goals. In particular, except where otherwise stated, we have assumed a continuation of existing business operations on substantially the same basis as exists at the time of this presentation.

Even though our management believes that the assumptions made and the expectations represented by such statements or information are reasonable, there can be no assurance that the forward-looking statement or information will prove to be accurate. Many assumptions may be difficult to predict and are beyond our control.

Furthermore, should one or more of the risks, uncertainties or other factors materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking statements or information. These risks, uncertainties and other factors include, among others: inability to meet production guidance; inability to achieve the expected benefits of the Amended Investment Agreement in Greece; inability to complete steps to resume construction at Skouries; global outbreaks of infectious diseases, including COVID-19; timing and cost of construction, including in respect of an underground decline at the Triangle mine and the associated benefits; results of further testwork; recoveries of gold and other metals; geopolitical and economic climate (global and local), risks related to mineral tenure and permits; gold and other commodity price volatility; information technology systems risks; continued softening of the global concentrate market; risks regarding potential and pending litigation and arbitration proceedings relating to our business, properties and operations; expected impact on reserves and the carrying value; the updating of the reserve and resource models and life of mine plans; mining operational and development risk; financing risks; risks of sovereign investment; regulatory risks and liabilities including environmental regulatory restrictions and liability; discrepancies between actual and estimated production; mineral reserves and resources and metallurgical testing and recoveries; additional funding requirements; currency fluctuations; community and non-governmental organization actions; speculative nature of gold exploration; dilution; share price volatility and the price of our common shares; competition; loss of key employees; and effective till to mineral alians or properties, as well as those risk factors discussed in the sections titled "Forward-Looking Statements" and "Risk factors in our business" in the Company's most recent Annual Information Form

Forward-looking statements and information is designed to help you understand management's current views of our near and longer term prospects, and it may not be appropriate for other purposes. There can be no assurance that forward-looking statements or information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, you should not place undue reliance on the forward-looking statements or information contained herein. Except as required by law, we do not expect to update forward-looking statements and information continually as conditions change.

Financial Information and condensed statements contained herein or attached hereto may not be suitable for readers that are unfamiliar with the Company and is not a substitute for reading the Company's financial statements and related MD&A available on our website and on SEDAR and EDGAR under our Company name. The reader is directed to carefully review such document for a full understanding of the financial information summarized herein.

Positioned for the Future

Well-Positioned to Provide Strong Leverage to Gold Price

Delivering on Expectations

- 2020 guidance achieved despite COVID-19
- 1Q 2021 gold production in line with 2021 annual guidance
- New investment agreement for Greek assets ratified by Parliament
- Completed QMX acquisition increases land position in Quebec by 5.5x

Strengthened Financial Position

- · Cash & equivalents \$511 million at the end of the year
- Strengthening credit profile
- Debt reduction of over \$130 million in 2020
- \$100 million of RCF credit available

Focus on Growth & Cost Discipline

- Kışladağ HPGR, pre-stripping position mine for 16-year life
- Increasing mining rates and efficiencies at Lamaque
- Efemcukuru improvements sustain stable low-cost production
- Increased productivity and efficiencies at Olympias

Exploration Upside

- Maiden Inferred Resource at Ormaque
- Continued drilling of under-explored targets at Lamague
- Compelling opportunities at Skouries and Perama Hill
- Strategic land positions in highly-prospective jurisdictions; QMX

Attractive Valuation

- · Skouries de-risking: Dry stack tailings EIA approved
- Attractive on a P/NAV basis versus peers
- Asset portfolio diversifies geographic risk
- Focus on tailings management best practices; ESG priorities

Next Steps in Greece – Timeline for Kassandra Mines

Dry Stack Tailings Permit Received at Skouries

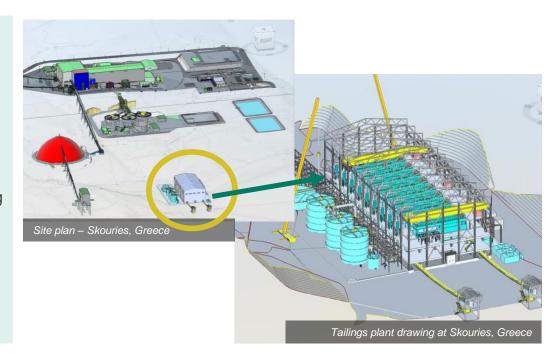

Enables a number of safety, environmental and economic benefits

What is Dry-Stack?

- Dewatered tailings with a consistency of damp sand
- Considered a best-available control technology

Benefits of Dry-Stack:

- Higher solids content improves facility's safety and stability; facilitates water recycling
- Significantly reduces tailings environmental footprint
- Allows for continuous reclamation, making final reclamation at end of mine life faster and easier

Eldorado Remains Attractively Valued

The Transformative Effect of Skouries

- Existing production base assumes mid-point of 2021 5-year guidance for Kisladag, Lamaque, Efemcukuru and Olympias Skouries figures based on March 2018 Prefeasibility Study
- (3) Base Case assumes 2018 PFS prices (\$1,300/oz Au / \$2.75/lb Cu). Spot assumes \$1,800/oz Au and \$4.50/lb Cu

2021 Catalysts

Advancing Skouries

- EIA dry stack tailing permit modification approval in Q2
- Complete feasibility study in Q3
- Decision on funding structure in Q4
- Re-commence construction by end of 2021

Positioning Kışladağ

- Two new CIC trains to drive higher solution processing rates
- HPGR circuit in 3Q to drive increased gold recoveries
- North Leach Pad Phase 1 expansion on track
- Advance pre-stripping campaign

Lamaque Optimization

- Completion of Triangle decline by end of 2021
- Ormaque exploration to expand & upgrade inferred maiden resource of 803,000 gold ounces
- Execute QMX exploration program

Enhancing Olympias Efficiencies

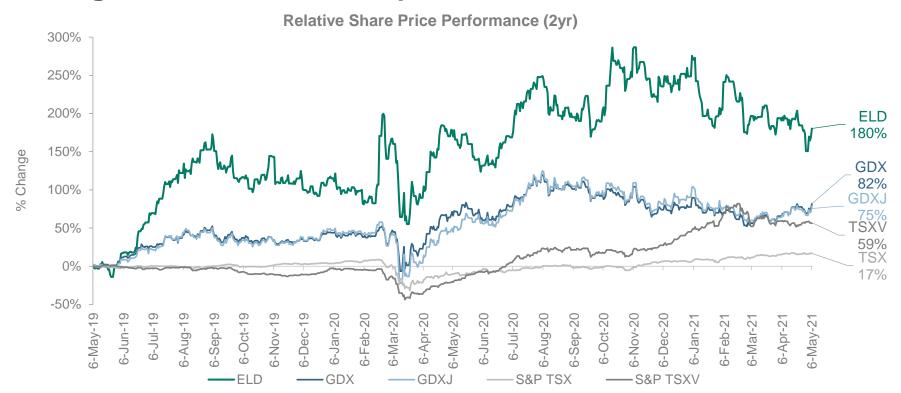

- Continue to increase u/g mine development & productivity
- Expand throughput from 470,000tpa to 650,000tpa by 2025

Perama Hill

- File 43-101 compliant report in 2Q 2021
- File strategic investment EIA in H2 2021

Strong Track Record of Outperformance

Thank You

2021 Guidance	430,000 – 460,000	590 - 640	920 – 1,150		

Q1 2021 Highlights

- Gold production in line with forecast plan
- Strong start at Kışladağ
- Olympias productivity improvements begin to take root
- Lamaque delivers to plan

Kışladağ

About Kışladağ

Kışladağ is a large, gold-rich porphyry deposit. It is a low-grade, bulk tonnage, open pit mine that uses heap leaching for gold recovery.

Project Overview

Location

Uşak Province, Turkey

Ownership

100% Eldorado

Mine type

Open pit

Metals mined

Gold

Processing method

Heap leaching followed by electowinning to produce a doré

Number of employees

(including contractors)

~650

	Actual	2021
	2020	Guidance
Gold production (oz)	226,47	140,000-
	5	150,000
Cash operation	451	590-640
costs (\$/oz sold)		

Efemçukuru

About Efemçukuru

Efemçukuru is a high-grade epithermal gold deposit located in Izmir Province in western Turkey. It is an underground mine that uses gravity circuits followed by flotation to produce a flotation concentrate and a gravity concentrate.

Project Overview

Location

Izmir Province, Turkey

Ownership

100% Eldorado

Mine type

Underground

Metals mined

Gold

Processing method

Milling and gravity circuits followed by flotation to produce a flotation concentrate

Number of employees

	Actual 2020	2021 Guidance
Gold production (oz)	99,835	90,000– 95,000
Cash operation costs (\$/oz sold)	556	550–600

Olympias

About Olympias

Olympias is an underground gold-silver-lead-zinc mine located in the Halkidiki Peninsula in northern Greece. It is a carbonate replacement style deposit with very high gold-grades and an orebody that will allow for mining rates up to 1 million tonnes per annum. Olympias reached commercial production at the end of 2017.

Project Overview

Location

Halkidiki Peninsula, Greece

Ownership

100% Eldorado

Mine type

Underground

Metals mined

Gold, silver, zinc and lead

Processing method

Milling circuit followed by flotation to produce three flotation concentrates (gold, zinc, and lead/silver)

Number of employees

(including contractors)

	Actual 2020	2021 Guidance
Gold production (oz)	58,423	55,000– 65,000
Cash operating costs (\$/oz sold)	1,078	775–825

Lamaque

About Lamaque

Lamaque is an underground gold mine located in Val-d'Or, Quebec. The high-grade orogenic Triangle deposit feeds the initial 8 year life of mine. First gold was poured in December 2018 and commercial production was declared on March 31, 2019.

Project Overview

Location

Québec, Canada

Ownership

100% Eldorado

Mine type

Underground

Metals mined

Gold

Processing method

Milling circuit followed by a leach and CIP circuit, followed by electrowinning to produce a doré

Amended Investment Agreement Signed

Major milestone: commercial framework to unlock transformational value from the Kassandra Mines

Background

- Previous agreement was nearly 15 years old and no longer fit for purpose
- Amended Agreement is mutually-beneficial to Eldorado and the Greek State
- Sets out the legal framework for Eldorado's investment in the Kassandra Mines
- Includes:
 - Investor protection mechanisms, similar to other large-scale foreign investment agreements in Greece
 - Enhanced fiscal revenues, environmental benefits and community development commitments

Signing Ceremony

- Attended by x3 Greek Ministers:
 - Kostas Skrekas, Minister of Environment and Energy
 - Christos Staikouras, Minister of Finance
 - Adonis Georgiadis, Minister of Development and Investment
- Canadian and US Ambassadors also in attendance

Amended Investment Agreement

A Framework for Investment Stability in Greece

Optimized Investment Plan for Kassandra Mines

- Mutually beneficial contract between Hellas Gold and the Hellenic Republic
- Establishes the legal framework for Eldorado's future investment in the Kassandra Mines (Skouries, Olympias, Stratoni)
- Includes investor protection mechanisms and international best practices consistent with other large-scale foreign investment agreements in Greece
- Creates path to construction completion and commercial production of world-class Skouries project
- Enables expansion of Olympias to 650,000tpa
- Allows for upgrades to port facilities at Stratoni

Background

- Previous agreement was 15 years old and was no longer fit for purpose
- Negotiated by a predecessor company
- Was put into place under vastly different economic and technological conditions

Modernized Investment Plan

Unlocking Value at a World-Class Development Project

Economic and Environmental Benefits

- Skouries
 - Average gold production of \$140,000 oz¹
 - Average AISC of \$215/oz over a 23-year mine life¹
- Increased fiscal revenues for all levels of government in Greece, and enhanced employment for local communities
 - Expected to support over 3,000 jobs²
 - Expected future fiscal revenues paid to the Greek State of ~\$2.3 billion^{1,3}
- Further investment in community projects
 - Over \$80 million committed to CSR projects over the life of the mines
- Reduced environmental impacts
 - Dry-stack tailings results in dramatically smaller footprint
 - Improved water management systems
 - Other design improvements

Notes on Mineral Resources and Reserves

- 1) Mineral reserves and mineral resources are as of September 30, 2020
- The mineral resources and mineral reserves were classified using logic consistent with the CIM Definition Standards for Mineral Resources & Mineral Reserves (2014) incorporated, by reference, into National Instrument 43-101 – Standards of Disclosure for Mineral Projects (NI 43-101).
- 3) Mineral reserves are included in the mineral resources.
- 4) The mineral reserves and mineral resources are disclosed on a total project basis.

Mineral Reserve Notes:

- Long Term Metal Price assumptions:
 - Gold = \$1300/oz; Silver = \$16.00/oz; Copper = \$2.75/lb; Pb price = \$2,000/t and Zn price = \$2,200/t.
- 2) Cut-off grades:

Kisladag: 0.18 g/t Au Recoverable which is equivalent to approximately \$7.30/t NSR; Efemcukuru: 3.52 g/t (long hole stoping), 3.67 g/t (drift and fill); Lamaque: 4.45 g/t Au; Perama Hill: 0.73 g/t Au; Tocantinzinho: 0.365 g/t Au; Skouries: \$9.47/t NSR (open pit), \$33.33/t NSR (underground); Olympias: \$187.5/t NSR (drift and fill), \$166.4/t NSR (long hole stoping); Stratoni: \$273.4/t NSR; Certej: 0.90 g/t Au Equivalent grade (=Au(g/t)+Ag(g/t)*0.0121).

- 3) Qualified Persons:
 - Richard Miller, P.Eng., Director, Mine Engineering (Open Pit) for the Company, is responsible for the Skouries (open pit), Kisladag and Perama Hill mineral reserves;
 - John Nilsson, P.Eng., of Nilsson Mine Services, is responsible for the Certej and Tocantinzinho mineral reserves;
 - Colm Keogh, P.Eng., Manager, Operations Support for the Company, is responsible for the Skouries (underground) mineral reserves;
 - Imola Götz, P.Eng., Manager, Mine Engineering (Underground) for the Company, is responsible for the Efemcukuru, Olympias, Stratoni, and Lamaque mineral reserves.

Mineral Resource Notes:

- 1) Mineral Resource Reporting and demonstration of Reasonable Prospects for Eventual Economic Extraction:
 - The mineral resources used a long term look gold metal price of \$1,800/oz for the determination of resource cut-off grades or values. This guided execution of the next step where constraining surfaces or volumes were created to control resource reporting. Open pit-only projects (Kisladag, Perama Hill, Perama South, Tocantinzinho and Certej) used pit shells created with the long term gold price to constrain reportable model blocks. Underground resources were constrained by 3D volumes whose design was guided by the reporting cut-off grade or value, contiguous areas of mineralization and mineability. Only material internal to these volumes were eligible for reporting. Projects with both open pit and underground resources have the open pit resources constrained by either the permit (Skouries) or by an OP/UG economic crossover surface (Bolcana), and underground resources constrained by a reporting shape.
- 2) 2) Cut-off grades:
 - Kisladag: 0.25 g/t; Efemcukuru: 2.5 g/t Au; Lamaque: 3.0 g/t Au; Perama and Perama South: 0.50 g/t Au; Tocantinzinho: 0.30 g/t Au; Certej: 0.60 g/t Au; Skouries: 0.30 g/t Au Equivalent grade (open pit), 0.70 g/t Au Equivalent grade (underground) (=Au g/t + 1.25*Cu%); Olympias: \$125/t NSR; Piavitsa: 4.0 g/t Au; Sapes: 2.5 g/t Au (underground), 1.0 g/t Au (open pit); Bolcana: 0.30 g/t Au Equivalent grade (open pit), 0.65 g/t Au Equivalent grade (underground) (=Au g/t + 1.27*Cu%); Stratoni: \$200/t NSR
- Qualified Persons:
 - Ertan Uludag, P.Geo, Manager, Resource Geology for the Company, is responsible for the Efemcukuru, Olympias, Stratoni, Lamaque and Bolcana mineral resources; Stephen Juras, Ph.D., P.Geo., Director, Technical Services for the Company, is responsible for the Kisladag, Certej, Skouries and Perama Hill mineral resources; Rafael Jaude Gradim, P. Geo., Manager, Corporate Development Technical Evaluations for the Company, is responsible for the Tocantinzinho mineral resources; Sean McKinley, P.Geo., Senior Geologist, Resource Development for the Company, is responsible for the Ormaque, Sapes, Piavitsa and Perama South mineral resources.
