Thank you for taking the time to open up the pages of our Sustainable Development Highlights for 2014. We trust you will enjoy this review as much as we did putting it together. It was a great way for us to re-live what we have accomplished in 2014 and what new initiatives were implemented, but more importantly, it allowed us to reflect and identify areas where we can improve moving forward. Stornoway’s values (Teamwork, Passion, Integrity, Respect and Prosperity) adapt to our definition of sustainable development. We work as a team and with passion to ensure we respect the integrity of the environment, the people, and their health and safety, towards prosperity for all, now, and for generations to come. This report is not intended to cover each initiative in detail, but to provide you with the highlights of 2014; accomplishments, adopted procedures, and innovative thinking.

We are all working on this project together. Without each of you, Stornoway would have not realized what it will become, Québec’s First Diamond Mine. For this, we thank you, and look forward to the many updates we will have in the 2015 report!
To Start the Way We Will Finish
On July 8th, 2014, Stornoway completed a C$946 million financing transaction to fully fund the construction of the Renard Diamond Project. Just two days later, on July 10th, 2014, we held a ground breaking ceremony in the presence of, amongst others, Mr. Philippe Couillard, Mr. Jacques Daoust, Mr. Jean Boucher, Chief Richard Shecapio, Ms. Manon Cyr and Mr. Steve Gamache. In every way, this has been a transformative year for Stornoway.

From the very first shovel in the ground, and from the initial planning stages for the mine, a priority for us has been the implementation of standards for health, safety, environmental protection and community engagement under which we will perform for the life of the mine. To date, our lost time accident rate and environmental compliance have been good, but both require constant vigilance and both can always be better. Continuous improvement will always be a cornerstone value of this company.

The importance we give to sustainable development at Renard is apparent in how we have approached mine construction: our waste water treatment facilities, and the system of civil works for the collection and control of surface water have been amongst the first items to be constructed at the site. An additional priority of ours, and no less important, has been the immediate initiation of progressive rehabilitation practices which, again, we are committed to continuing throughout the life of the project. An example of this has been the rehabilitation of our historical exploration sites, Renard’s Emmanuel Camp as an example, and the borrow pits used for the Route 167 Extension construction.

With the Renard Project, Stornoway aims to start the way we will finish. We aim to demonstrate, by our actions, the very best standards for responsible modern mine development. This will be a continuous priority for both the construction and the operations teams, and we will continue to monitor and improve our actions as we work together to build Quebec’s first diamond mine.

Programs and Policies in Action
2014 will forever mark a pivotal moment in Quebec’s history with the beginning of construction on Stornoway’s Renard diamond mine project. All activities are carried out respecting our new Sustainable Development Policy, endorsed in April 2014.

The establishment of a health and safety management system, a prevention program, and the implementation of an environmental and social management system have all represented major milestones in 2014. At Stornoway, we believe that proactive and collaborative management practices provide better protection for our environment, our employees and contractors, and the cultural and social heritage of our host communities. Out of the many positive results from 2014, we are especially proud to report on the strong integration of local people and companies working at the Renard project. We want to thank the men and women who actively contribute, day after day, to achieving only the highest standards in health and safety and sustainable development.

Commitment to Stakeholders
2014 was the year Stornoway’s Renard diamond mine moved into construction, emphasizing the need for effective communication with our regional stakeholders. Addressing challenges and needs during the construction phase is essential to our commitment to stakeholder engagement.

Our regional stakeholder’s expectations are high, beginning with the 30-month construction period, followed by commercial production expected in Spring, 2017. Looking forward to 2015, Stornoway will increase the size of its team significantly, reaching approximately 300 employees by the end of the year, a large portion from the local region.

The committees associated with each of the local agreements will also play a major role working to optimize regional benefits. Stornoway aims to increase its involvement with the host communities of Mistissini, Chibougamau and Chapais, informing local businesses, workers and youth about future opportunities.
Commitment to Safety

The beginning of construction introduced the occupational health and safety management system (OHSMS). Our management system is directly related to our new Sustainable Development Policy that governs our health and safety, security, environment and community relations. Our OHSMS establishes the roles and responsibilities of the administration and control of health, safety and security, performance indicators, procedures and revision and audit methods. The implementation of the health and safety management system ensures year-round supervision of construction activities.

In 2014, Stornoway prioritized the construction of airport infrastructure for medical evacuations by air and commissioning the emergency vehicle garage to ensure maximum health and safety for employees. The purchase of emergency equipment and updated emergency response plans also contributes to Stornoway’s efficient health and safety management system.

Safety in Numbers

- Excellent Occupational Health and Safety performance for Stornoway employees
- Hours-worked in 2014 nearly doubled from 2013
- Slight increase in accidents in 2014

The Courage to Care about our Future

The beginning of construction of the Renard mine allowed Stornoway to implement innovative environmental management with the introduction of internal approvals called ‘Eco-permits’. An Eco-permit must be obtained prior to beginning work, allowing us to ensure government approvals have been received, environmental mitigation measures are applied, and that all applicable regulations for work were identified and measured. More than 60 Eco-permits were issued by the environmental monitoring group in 2014.

This initiative has influenced our environmental performance, as well as has increased the proactive engagement of workers and contractors protecting our host environment.

Water Management

Stornoway’s use and protection of water resources represented a major commitment under the environmental and social impact assessment in 2014, and will continue throughout the life of the mine. From the first day of construction, Stornoway constructed storm-water management infrastructure in order to secure its earthworks. A temporary water-treatment plant was also installed at the beginning of construction to capture sediment from excavation.

Exploration Rehabilitation

True to our commitments, the beginning of construction of the Renard mine also initiated the beginning of rehabilitation. 2014 consisted of the rehabilitation of quarries along Route 167, and the restoration of fish habitat in rivers along the old winter road. Many mineral exploration sites owned by Stornoway throughout Canada were also the focus of rehabilitation work in order to mitigate impacts of our work and to contribute to the well-being of future generations.
Stornoway implemented an extensive waste and hazardous materials management program at the Renard site at the beginning of construction. The management program is based on three complementary approaches that guide management practices and corporate policies.

These three elements are:
- Proper sorting from the beginning (metal, wood, cardboard, etc.)
- The 3 R’s (Reduce, Reuse, Recycle)
- Repurposing residual materials
- Quantity Monitoring

The Renard Environmental Committee met several times during 2014 to monitor the implementation of the project.

With the support and participation of our Cree partners, environmental and social monitoring measures have been put into place and will continue to monitor the project throughout the life of the mine.

The Environment Committee is an important forum to work together and learn from each other’s perspectives, experience and understanding of the environment, our impacts on it and how we can preserve it for future generations. This is why Stornoway, Mistissini, the Grand Council of the Crees / Cree Nation Government and the families impacted by the project will continue to cooperate and work together on environmental measures, plans and programs that work for the company and the Cree. We look forward to enhancing our communication with everyone involved in 2015, as this will help us continue and improve our work.

“The Environment Committee is an important forum to work together and learn from each other’s perspectives, experience and understanding of the environment, our impacts on it and how we can preserve it for future generations. This is why Stornoway, Mistissini, the Grand Council of the Crees / Cree Nation Government and the families impacted by the project will continue to cooperate and work together on environmental measures, plans and programs that work for the company and the Cree. We look forward to enhancing our communication with everyone involved in 2015, as this will help us continue and improve our work.”
A Productive Year

The first half of 2014 focused on the mining road. Following the close of financing at the mid-year mark, focus switched to the construction of the Renard Mine. The committees kept busy keeping up with the Renard Mine project development, as well as cooperating and collaborating with host communities to inform and optimize local benefits.

We are passionate about contributing to our host communities. In 2014, Stornoway assisted, not only financially, but at a volunteer level, in a Golf Tournament in Chibougamau which helped raise $40,000 for Centraide.

We also collaborate with the Manoir Pierre-Guérette of Chapais, the mining and geology departments of the Université Laval, as well as several local organizations in Chibougamau, Chapais, and Mistissini. Funds will be dispersed where needed in our host communities.

In November, 2014, Stornoway participated in a fundraiser for the ‘Action Intégration pour la Déficience Intellectuelle’ (AIDE). The Stornoway hockey team had a rare opportunity to play against former Montreal Canadian hockey players. Go Habs Go! Go Stornoway Go!

We are proud to announce a sponsorship policy will be developed in 2015.

Committees were derived from the Mecheshoo agreement of the Crees. In addition, Stornoway also has a partnership with the communities of Chibougamau and Chapais, the ‘Declaration of Partners’.

Stornoway is proud to work with the following committees:
- Renard Committee
- Training & Employment Committee
- Environmental Committee
- Renard Liaison Committee (Chibougamau/Chapais)

Our Commitment to Community Spirit

We are passionate about contributing to our host communities. In 2014, Stornoway assisted, not only financially, but at a volunteer level, in a Golf Tournament in Chibougamau which helped raise $40,000 for Centraide.

We also collaborate with the Manoir Pierre-Guérette of Chapais, the mining and geology departments of the Université Laval, as well as several local organizations in Chibougamau, Chapais, and Mistissini. Funds will be dispersed where needed in our host communities.
Committed to our Host Communities

Stornoway’s Chibougamau office and Human Resources Department expanded in 2014 and will continue to expand in 2015 to better serve the needs of the Company and the communities. Our goal is to improve communication with our host communities, ensure a permanent presence and an open-door policy, and optimize benefits to the region. Freddie Mianscum liaises with our host communities from our local office in Mistissini. Freddie is passionate about communicating information to the residents of Mistissini and the Cree Nation of Eeyou Istchee, not only from our local office, but through the waves of the local radio. For any information, or just to say hello, don’t hesitate to contact Freddie at 418.923.2696 or 418.770.6387.

Cree Mining Harmonization

In January of 2014, the Grand Council of the Crees invited Stornoway, and other mining companies operating in the regions of Eeyou Istchee and James Bay, to a ‘Cree Mining Harmonization’ meeting in Mistissini to further discuss collaboration opportunities for mining companies and Cree institutions in order to prepare the people of the region for up and coming employment opportunities.

Continuous Transparency

In April 2014, about 150 people attended Stornoway’s open house in Mistissini. We invited our Cree partners to join the event: CBS, CHRD CMEB, Eskan, Kiskinshiish and Swallow-Fournier to help increase the interest of our host communities. This unique forum allowed for the exchange of information regarding job opportunities and the development of the project. The open house provided updates on the progress of the project to the Mistissini community, presented partners collaborating on the Renard Project, and the introduction regarding the development of training, and introduced training and employment initiatives.
Putting 2014 in Perspective

Stornoway is now in full construction mode and is proud of its continuous relationships with its host communities, supporting training initiatives, providing employment opportunities and optimizing local economic benefits. 2015 will see an increase in employment opportunities and an increased commitment to building stronger relationships within Mistissini, Chibougamau and Chapais.

Acknowledged for a Job Well Done

In October, 2014, Stornoway was presented with the ‘Entrepreneur of the Year’ award by AEMQ (l’Association de l’Exploration Minière du Québec) acknowledging the work by the Stornoway team over the course of 2014. This award highlights the work of an entrepreneur or a team of entrepreneurs whose company has made significant progress over the past year. This progress can be related to the development of a specific project or to the overall activities of the company.

Let Us Know!

2014 was a year of accomplishments, including putting into place a standardized and transparent ‘Grievances and Inquiries’ procedure for our regional stakeholders. It is essential that Stornoway understand issues and challenges that exist in order to mitigate impacts and address issues in a timely and efficient manner.

Renard Diamonds on Display

On the 19th of November at the ‘Quebec Mines’ conference in Québec City, a sample that could represent an average day of production of Renard rough diamonds were on public display for the first time. The diamonds were a highlight of the conference, providing a rare opportunity to view rough diamonds for the first time in a public forum.

AEMQ Awards: Entrepreneur of the Year

Renard diamonds at Québec Mines conference
“Working with Stornoway has given me an opportunity to share my years of experience with new workers who are ready to be passed the torch and carry it to another level. Thank you to Stornoway for this opportunity.”

Michel Deveau
Coordinator - Mine Camp & Logistics

“I am very proud to have the opportunity to be a member of Stornoway’s family and to integrate my experience and know-how to this extraordinary team towards building the first diamond mine in Québec.”

Carol Lapointe
Assistant Camp Supervisor
Breaking Ground

The first official shovel of earth to be turned over on the Renard site took place on July 10th, 2014 in the presence of Mr. Philippe Couillard, Québec’s premier, Mr. Jacques Daoust, Minister of Economy, Innovation and Exports of Québec, Mr. Jean Boucher, Deputy of Ungava, Chief Richard Shecapio, Chief of the Cree Nation of Mistissini, Mrs. Manon Cyr, Mayor of Chibougamau, Mr. Steve Gamache, Mayor of Chapais and Mr. Matt Manson, President and CEO of Stornoway, as well as a number of community representatives, employees and businesses. All members present contributed to the success of this historical event and for this, we thank you all!

Steve Gamache, Chief Richard Shecapio, Premier Philippe Couillard, Matt Manson, Manon Cyr, Patrick Godin
COMMUNITY RELATIONS

Back in Business

Freddie Mianscum, Mecheshoo Agreement Implementation Officer, was featured in an article in ‘Destination’ magazine. We are proud to have Freddie on our team, and by the sounds of it, Freddie is happy to be back in the business of Mining. We trust that Freddie’s dedication to Stornoway and his community is an inspiration to the youth of the Cree Nation of Mistissini and Eeyou Istchee.

“"The mining industry came by storm in Eeyou Istchee, first when the Cree Nation of Mistissini signed the Inmet Mining Troilus Project, and the second IBA which was signed with the Cree Nation of Wemindji. As for the third, it is with Stornoway, and the second IBA for the Cree Nation of Mistissini. With everyone’s surprise, the Cree Nation of Mistissini was ready to face the storm and got its people ready for the mining industry from the first IBA. We learned heavy machinery operation, mining operations and now we are proud to say that the Cree Nation of Eeyou Istchee are Miners!!"

Freddie Mianscum, Mecheshoo Agreement Implementation Officer

Providing Opportunities

As well as continuous meetings and discussions with the ‘Trapline’ families, we are committed to extending as many opportunities as possible to local people to increase their experience and level of engagement.

In November of 2014, Jonathan and Matthew Swallow, sons of the ‘Trapline families’, were offered the opportunity to visit and work at the Stornoway exploration office in Vancouver. Jonathan and Matthew have been involved in the Renard project for many years as assistants for drilling programs. This opportunity allowed them to participate in the final steps of a drilling program with Stornoway’s Vancouver team.

“"Being employed at Stornoway is an opportunity to participate in a project that contributes to the economic development of my region."

Mélissa K. Bruneau, Environment Coordinator

“"Working with Stornoway gives you confidence and wings to work with diverse people from all walks of life."

Eileen Coonishish Office Clerk
At Stornoway, Our Business is Our People and Our People Realize Our Values.

We don’t think from Top to Bottom, We think across the board.

Our People share the responsibility and commitment of embodying and implementing our Values. We support the development and vitality of local communities, their people, their skills and their talent.

A recruitment Readiness Operations Plan was developed in order to define actions necessary to streamline hiring at all stages of the project.

The SCWIP’s First Initiative:
In association with CHRD (Cree Human Resources Development), the first Security Guard Training Program was created. 14 Mistissini students are currently participating in a 730-hour training program.

In 2014, the employment committee worked on developing the Stornoway Cree Workforce Inclusion Plan in which Stornoway contributed a matching fund for training with Mistissini, as agreed upon in the Mecheshoo agreement.
In association with CHRD and the Cree School Board, Stornoway continues its cooperation with local institutions to develop local and regional training programs to meet the needs of the Renard mine. The first examples are the Security Guard and Mine Mobile Equipment Mechanic’s training.

CHRD and The Employment and Training Committee collaborate to promote the Operations Plan in support of the Cree population of Eeyou Istchee and Mistissini. Stornoway also collaborates with the James Bay School Board.

BUILDING OUR MULTICULTURAL TEAM:

Stornoway’s Workforce is Growing.

From July, 2014 to December, 2017, we predict a growth of 800%
Diamond Recovery Plant

In the fall of 2014, Stornoway donated their Diamond Recovery Plant to Metchib Metallurgical services (www.metchib.com) based in Chibougamau. The processing plant had been used during the Renard Exploration Program to treat and test the bulk samples. The agreement between Stornoway and Metchib is based on the Diamond Recovery Plant being used for local training initiatives along with commercial purposes. Stornoway will be participating in the development of plant operation programs aimed at training students from La Jamésie and Mistissini. In exchange, Metchib was responsible for the dismantling and transporting the machinery to its factory. Dismantling will be completed in 2015.

Stornoway is very proud to support initiatives that encourage and enable local youth to diversify their mine training, and more specifically, diamond mine training, in the region.

2014 Highlights

- Implemented Development and Administration teams
- Defined Human Resources Policies and Procedures to be implemented for operation start-up
- Hiring of Training Coordinator and Human Resources Recruitment Specialist
- The Training and Employment Committee worked on developing the Stornoway Cree Workforce Inclusion Plan in which Stornoway contributed a matching fund with Mistissini as agreed upon in the Mecheshoo Agreement.
- Led by CHRD (Cree Human Resources Development), the first Security Guard Training Program was created. 14 Mistissini students are currently participating in a 730-hour training program.
- Stornoway participated in developing customized training for a Mine Mobile Equipment Mechanic program.
- Specific positions were targeted in all departments with regards to employment in anticipation of the beginning of operations, allowing for the achievement of Mecheshoo objectives.

“I thank you to Stornoway for affording me the opportunity to be a part of this historic project. I would strongly recommend Stornoway to anyone who is interested in joining the team.”

Isaac Iserhoff
Construction Liaison Office

“Being part of Stornoway’s team for the past four years has been truly rewarding. Starting a mining project from the very beginning is not something one gets to live through many times in their career. I like to say that there is a little bit of magic in this project. A team of over 500 employees will actually be writing history of building and operating Quebec’s first diamond mine. For me, this is something fantastic!”

Hélène Robitaille
HR Manager
**Renard Timeline**

- **2017**: Summer - Full production
- **Q2 2017**: Commercial production
- **Late 2016**: First ore in plant
- **July 2014**: $C946m financing completed. Construction commences
- **September 2013**: Road opens for construction traffic
- **July 2013**: Federal Canadian Authorizations issued
- **January 2013**: Optimization study issued
- **Nov.-Dec. 2012**: Mining Lease and Québec Authorizations issued
- **July 2012**: Declaration of Partners
- **March 2012**: “Mecheshoo Agreement” executed
- **February 2012**: Road construction commences
- **December 2011**: ESIA filed
- **November 2011**: Feasibility study issued. First mineral reserve
- **January 2011**: Stornoway acquires SOQUEM’s 50% interest.
- **2008-2010**: First NI 43-101 resource and economic assessments
- **2006-08**: Bulk sampling
- **2006**: Stornoway acquires Ashton and its 50% project interest
- **2003-2006**: Drilling and “mini-bulk” sampling
- **2001**: First kimberlite discovery
- **1996**: Start of initial regional exploration by Ashton & SOQUEM

**Renard Project Benefits - The Trickle Down Effect**

At times it can be challenging to see how an investment in developing a mine over 400 km away from towns and cities can positively affect your local economy. We would like to share how the investments in Stornoway’s Renard Mine come back to you.

From January, 2014 to December, 2014, Stornoway accumulated a total investment of $98.3 million towards the Renard Project to construct the mine road and airport, as well as to continue work on site to attract further financing, allowing this project to become a reality.

Of this $98.3 million investment, a total of $49.2 million represents how the region benefited through the purchase of goods and services from the local areas of Mistissini, Chibougamau and Chapais. Stornoway is very proud to have relied heavily, and worked closely, with local partners and businesses in order to successfully achieve infrastructure development, in turn, contributing back to the host communities who continuously support this project.

| Total Stornoway Investments (Jan 2014-Dec 2014) | $98.3 million |
| Chibougamau & Chapais | $21.3 million |
| Cree (including Jamesian subcontractors) | $27.9 million |
| Total Regional Benefits: | $49.2 million |
"This is a real opportunity to maximize economic benefits by knowing the expertise of our contractors, and working together to attract new residents to Chibougamau. From a personal point of view, it is a sense of pride to be a partner in what will be the first diamond mine in Québec, and the satisfaction that comes with knowing that Stornoway wants to work alongside, and with, people from the local area."

Céline Collin, General Manager, Development Chibougamau

"As General Manager of Development Chapais, being a member of the Renard Liaison Committee allows me to discover business opportunities for companies in our city. In order for cities to survive in remote areas, an increase in population and new business development is required. Everything must be done to achieve these objectives, and thus far, the Stornoway team have responded well to our concerns. Examples of this is the seriousness of the implementation process of the committee, as well as the climate of transparency that prevails."

Lise Aubin, General Manager, Development Chapais

Stornoway maintains best practices in sustainable development, operating proactively and collaboratively to protect employees, contractors, and the environment, as well as to preserve the social and cultural heritage of our host communities.

- **OUR VISION**
  - To build a world-class mining company, beginning with Renard, Québec’s first diamond mine.

- **OUR PRINCIPLES**
  - Maximize shareholder value
  - Respect host communities
  - Grow through exploration and development

- **OUR COMMITMENT**
  - Meet and/or exceed expectations with host communities
  - Develop programs and procedures to mitigate risk and prevent accidents
  - Train employees/contractors to realize our sustainable development policy
  - Monitor management systems (GDDS) to improve performance

At Stornoway, we believe in **COURAGE**.

The **COURAGE TO CARE** about our Health & Safety, Our Environment & Future, Our Communities & Each Other.

- **OUR HEALTH & SAFETY**
  - Create a safe and healthy work environment, 24/7
  - Examine incidents, Identify causes, Rectify and Prevent
  - Intervene in emergencies to mitigate impact

- **OUR ENVIRONMENT & FUTURE**
  - Protect the biodiversity of our environment at all times
  - Promote site rehabilitation
  - Share environmental knowledge

- **OUR COMMUNITIES & EACH OTHER**
  - Maintain fair relationships with our host communities
  - Establish and facilitate stakeholder committees
  - Communicate proactively and transparently with stakeholders
  - Promote skill development, setting people up for success

**OUR VALUES**

- **PROSPERITY**
- **TEAMWORK**
- **INTEGRITY**
- **RESPECT**
- **PASSION**
Infrastructure

The Road, the Airport and Telecommunications

Stornoway’s intention is to share its current infrastructure development and future initiatives with its host communities, namely the Cree Nation of Mistissini and the Crees of Eeyou Istchee and the Jamésians. The extension of Route 167 and the Renard Airport (to be officially named in 2015) are both accessible to the public. The aim is to add telecommunications development to its infrastructure in the near future.

Stornoway is very proud to report that the Mine Road was not only completed and connected before schedule, but also 10% under budget, due to the commitment and dedication of the Cree and Jamésien construction team. The remaining budget was applied to the construction of the airport.

Well done to all who participated!

PUBLIC NOTICE

The Mine Road, as well as Route 167 extension, are operational and open to the public; however, there is no public access to the mine site. We would like to ensure a maximum level of safety on this road; therefore, we would like to provide you with the following safety notice.

TRAVEL AT YOUR OWN RISK. PLEASE TRAVEL SAFELY. BE PREPARED!

MINING ROAD (km 552 to 648)

- All bridges have a speed limit of 15 km/h
- Please use emergency 4-way flashing lights for roadside stops
- Give priority to emergency, maintenance & heavy equipment vehicles
- Carry a First Aid Emergency Kit
- Carry a spare tire
- Carry a CB Radio or FM Radio
- Carry enough fuel for return trip. No access to fuel on this road
- Carry enough food and water for back and forth travelling
- Respect speed limits at all times

NO FUEL, NO ACCOMMODATION AND NO FOOD ON THE ROAD OR AT THE MINE SITE

The speed limit from km 552 to km 648 is 50 km/h

Narrow road from km 552 to km 648

Seatbelts are MANDATORY at all times
Stornoway’s Spring Open House
