VMware Announces General Availability of New Solutions for Building, Managing and Protecting Software-Defined Data Centers

Newly Available Product Releases Include VMware NSX 6.1, VMware vCenter Site Recovery Manager 5.8, VMware vCloud Suite 5.8, VMware vRealize Operations Insight, VMware vRealize Suite 6, VMware vSphere Data Protection Advanced 5.8 and VMware vSphere Remote Office Branch Office

PALO ALTO, CA -- (Marketwired) -- 09/15/14 -- VMware, Inc. (NYSE: VMW), the global leader in virtualization and cloud infrastructure, today announced the general availability of VMware NSX™ 6.1, VMware vCenter Site Recovery Manager™ 5.8, VMware vCloud® Suite® 5.8, VMware vRealize™ Operations Insight, VMware vRealize™ Suite 6, and VMware vSphere® Data Protection™ Advanced 5.8 to help organizations build, manage and protect their software-defined data center environments. Additionally, VMware is announcing the availability of VMware vSphere® Remote Office Branch™ Office.

Featuring the industry’s most complete product portfolio for implementing and operating a software-defined data center, VMware today has advanced the capabilities of:

- **VMware NSX 6.1** helps improve the security, scalability and performance of the software-defined data center and hybrid cloud. The new release includes several additions such as further advancement of network micro-segmentation capabilities, scale-out NSX Edge™ (equal cost multi-path routing), enhancements to VMware vCloud® Automation Center™ 6.1 integration, and improved hybrid cloud connectivity. With VMware NSX, customers can enable use cases for self-service IT and also have an economically and operationally feasible way to deploy network micro-segmentation to transform data center security architecture. Learn more about VMware NSX and micro-segmentation [here](#).

- **VMware vCloud Suite 5.8** is the new release of the integrated offering for building and managing vSphere private clouds based on a software-defined data center architecture to enable organizations to achieve critical IT outcomes around efficiency, control and agility. The suite introduces new policy-based provisioning capabilities and integrations that enable organizations to add disaster recovery services via VMware vCenter Site Recovery Manager 5.8 as well as enhanced networking and security services to their applications and infrastructure. Learn more [here](#).

- **VMware vRealize Operations Insight** is a new integrated offering that delivers performance management, capacity optimization, and real-time log analytics as an add-on solution to VMware vSphere with Operations Management. Learn more [here](#).

- **VMware vRealize Suite 6** is a new cloud management platform that combines the capabilities of VMware's existing cloud automation, cloud operations and cloud business management solutions into a single offering. The comprehensive platform is purpose-built to manage heterogeneous environments and hybrid clouds, and enables IT to deliver infrastructure and applications at the speed of business but with the control IT requires. Enhancements to the suite include additional features for extending custom-built automation capabilities, simplified deployment and management of multi-tier applications, and an improved user experience. Learn more [here](#).

- **VMware vSphere Data Protection Advanced 5.8** introduces enhanced support for business-critical applications, augmented replication capabilities as well as customizable proxies and backup work streams to protect VMware vSphere environments. Learn more [here](#).

- **VMware vSphere Remote Office Branch Office** is a new solution using VMware vSphere 5.5 Update 2 that enables organizations with multiple sites seeking to take advantage of virtualization to rapidly provision servers, minimize host configuration drift, and enhance visibility into regulatory compliance. Learn more [here](#).

Customers, partners and prospects can trial some of the newly available offerings, among existing products, at the [VMware Hands-on Labs Online](#) (registration required).
