INTERCONTINENTAL EXCHANGE NAMED TO INAUGURAL FORTUNE FUTURE 50

Released : 23 October 2017

ATLANTA & NEW YORK--(BUSINESS WIRE)-- Intercontinental Exchange (NYSE:ICE), a leading operator of global exchanges and clearing houses and provider of data and listings services, has been named to the **Fortune Future 50**. The innovative methodology employed by Fortune and The Boston Consulting Group includes a set of forward-looking metrics to determine the top 50 companies that are best positioned to adapt and deliver growth in a complex environment.

In describing the ranking, Fortune stated: "Preserving past advantages and position is not sufficient to thrive in today's complex and dynamic business environment. In a fast-changing world, only the vital will survive."

"ICE's commitment to our entrepreneurial culture means that our strategy is future-focused by definition because it is driven by our customers' evolving needs rather than adhering to a legacy business model or mindset," said ICE Chairman and CEO Jeffrey C. Sprecher. "We formed the company based on the market's need for innovation, and we continue to extend our solutions driven by this same need. I'm proud that we've built a dynamic culture of leading change and identifying opportunities to support our customers and to find new ways to advance global markets."

The Fortune Future 50 ranking has two pillars: 1) a market view of growth potential and 2) an assessment of the firm's actual capacity to deliver that growth, based on four dimensions: strategy, technology and investments, people and structure. The ranking included 25 Leaders above \$20 billion in market capitalization and 25 Challengers represented by small and mid-cap companies.

ICE was also named to the Fortune 500 in June 2017 and is the only exchange operator included in the ranking. Formed in 2000, ICE is the parent company of the New York Stock Exchange, which is one of its 12 exchanges. ICE is also a leading operator of central counterparty clearing houses, responsible for providing risk management in global derivatives markets, and operates ICE Data Services which offers global market data solutions.
