

This Statement on Environmental Responsibility (“Statement”) applies throughout Arcosa, Inc. and its subsidiaries and affiliates (“Arcosa”, “Company”, “we”, “our”, or “us”) and applies to all Arcosa locations. The purpose of this Statement is to establish guiding principles related to Arcosa’s environmental stewardship and sustainability initiatives. Arcosa is committed to ethical practices and compliance with applicable laws and regulations wherever we do business. Arcosa is guided by its core beliefs and values as stated in Arcosa’s Code of Business Conduct and Ethics.

Arcosa operates in multiple industries which contribute to improving and protecting the environment:

- Arcosa Wind Towers produces steel towers to support our customers’ advancement of America’s wind energy infrastructure.
- Arcosa Marine builds barges for the fuel-saving and efficient movement of commodities across the country’s inland and coastal waterways.
- Arcosa’s Construction Materials Group provides an alternative to using natural resources by recycling concrete, asphalt, steel, and composition asphalt shingles, which also minimizes landfill use and reduces roadway traffic and vehicle emissions.
- Arcosa’s Meyer Utility Structures manufactures engineered, tubular, and lattice steel structures for electricity transmission and distribution from wind, solar, and other environmentally friendly resources.
- Arcosa’s Steel Components businesses manufacture rail products for the fuel-saving and efficient movement of commodities across the country.

At all Arcosa locations we conduct business in a responsible manner to protect the environment and preserve natural resources. Potential environmental impacts – for both Company facilities and our communities – are key considerations in our business decisions. As such, Arcosa is committed, at a minimum, to compliance with all environmental regulatory requirements that apply to our businesses.

Arcosa supports internal and external initiatives that promote environmental awareness, environmental responsibility, and sustainable environmental practices.

Arcosa is committed to the efficient use of natural resources and energy, and strives to identify and implement ways to reduce emissions and waste, as appropriate for our specific businesses.

Additionally, Arcosa is committed to implementing an Environmental Management System that will track and monitor key environmental metrics and allow for periodic reporting in line with appropriate sustainability standards generally accepted in our sectors and will drive goal-focused reductions in our long-term sustainability plan.

Realizing environmental protection action taken today will benefit future generations and provide long-term global value, Arcosa businesses are unified in our commitment to build a better world.
