

PIPELINE SAFETY

What You Need to Know About Natural Gas Pipelines

Boardwalk Storage Company, LLC is committed to operating its pipelines safely and acting responsibly in the communities in which we operate. We have prepared this pamphlet to ensure you are properly informed about our pipelines and to provide safety instructions.

Working Together For Safety

Boardwalk Storage Company operates underground natural gas storage, compression and pipeline facilities in Boardwalk's Choctaw Hub facility, located just southwest of Baton Rouge, Louisiana. Underground natural gas pipelines are the safest mode of energy transportation. We need your help to keep it that way. It is important for everyone who lives and works near natural gas pipelines to know the basic safety information provided in this pamphlet.

By working together, we can keep our natural gas pipelines operating safely and quietly without disturbances or inconvenience to our neighbors.

Coordinated Effort

Should an emergency occur, our objective is to resolve the situation quickly and safely.

Two-way communication with emergency responders is critical for this resolution.

Boardwalk Storage Company needs immediate access to the incident location in order to assess and develop a plan to resolve the situation.

What Boardwalk Storage Company Would Do In Case Of An Emergency

First, we take steps necessary to protect life and property by controlling the flow of natural gas through the impacted section of pipeline and calling emergency response organizations. We also immediately assemble and deploy a team of experts to the location to address the emergency.

Our primary concern is the safety of the community and our response team. Once all safety issues are addressed, we begin assessing any property damage resulting from the incident. We also take steps to preserve the integrity of the site and work closely with local, state and federal agencies to determine the cause of the incident and appropriate remedial measures.

Boardwalk Storage Company and other pipeline operators sponsor and participate in liaison meetings with emergency responders to exchange information about our pipelines. We need to understand emergency responders' capabilities in responding to pipeline emergencies. We encourage you to participate in these meetings.

Before disturbing the earth, please call the National One-Call Center at 811.

Police, Fire and Public Safety Officials

Consider the following as a guide to assist police, fire and public safety officials in safeguarding the public in the event of a pipeline emergency:

- If a Boardwalk Storage Company facility is involved, report the event and the location of the incident to us.
- Be aware of wind direction and potential ignition sources.
- **Do not attempt to operate pipeline valves. You may inadvertently route additional gas to the leak.**
- Boardwalk Storage Company will operate any valves needed to control gas flow to the area.
- If you can help us identify high consequence areas (generally, areas where people gather or where residences are constructed in reasonably close proximity), please contact the local Boardwalk Storage Company office.
- For your safety, we recommend you coordinate your efforts with Boardwalk Storage Company personnel before entering any Boardwalk Storage Company facility.

For a tour of our local facility, please contact a local Boardwalk Storage Company office.

How To Identify Our Pipelines

Pipelines are generally buried underground, therefore, out of sight. To identify Boardwalk Storage Company pipelines, markers like these are used to show their approximate locations.

Here are some important facts about our markers and pipeline right of way:

- The purpose of a pipeline marker is to identify a pipeline right of way and to provide information about Boardwalk Storage Company's pipelines including: phone numbers, in case of a possible emergency; the product inside; and One-Call Center information.

- The pipeline right of way is the land over the pipeline, generally measuring 25 feet from each side of the pipeline.
- Markers indicate the general, not exact, location of a pipeline.
- Markers do not indicate how deep the pipeline is buried or how many lines are in the area.
- It is important to know pipelines do not necessarily follow a straight course between two markers.
- Never rely solely on the presence or absence of pipeline markers – someone may have moved or removed the marker.
- To ensure the pipeline right of way is properly maintained, do not plant trees or high shrubs, and do not build permanent structures on the right of way.
- Do not dig on the right of way unless you have notified the One-Call Center. State law requires you to call the One-Call Center before digging on or near the right of way.

How To Recognize A Pipeline Leak

Our pipelines are monitored 24-hours a day, 7 days a week by our Gas Control Center. In addition, periodic pipeline patrols and leak detection surveys are conducted by our field personnel. In the event of a leak or an emergency involving our pipelines, our field personnel are fully prepared to respond. Our response personnel also coordinate their efforts with public safety officials.

Natural gas is colorless and odorless, unless an odorant is added.

The following are signs that may indicate a leak:

- A hissing or roaring sound (caused by escaping gas).
- A patch of dead or discolored vegetation in an otherwise green setting along a pipeline route.
- Blowing dirt, grass or leaves near a pipeline.
- Flames originating from the ground or from valves along a pipeline route.
- Continuous bubbling in wet, flooded areas or in marshlands, rivers, creeks or bayous.
- A "gas smell" – **although odorant may not be present in a transmission pipeline.**

What To Do If You Notice Or Suspect A Pipeline Leak

Gas in the pipeline may be compressed at a very high pressure. You can be harmed if you come in direct contact with it as it escapes from the pipeline system.

- **Do not attempt** to extinguish a natural gas fire. Call Boardwalk Storage Company at 1-800-850-0051.
- Do not make the telephone call from inside a structure if a leak is detected nearby.

- **Turn off and abandon** vehicles and equipment in the immediate area.
- **Avoid** open flames or other sources of ignition. Do not light a match and do not start motor vehicles or electrical equipment near a suspected leak.
- If gas is not burning, avoid doing anything that may ignite it.
- **Evacuate** the area on foot, upwind and warn others to stay away from the area.
- **Do not attempt to operate any pipeline valves. You may inadvertently route additional gas to the leak.**

How To Report A Pipeline Leak

You should report the leak to Boardwalk Storage Company by calling 1-800-850-0051, if you suspect the leak is on one of our pipelines. Boardwalk Storage Company's telephone number can also be located on our pipeline marker posts or pipeline signs. Give your name, the location and a description of the leak.

Pipeline Integrity Management Program

Boardwalk Storage Company has developed and implemented a pipeline Integrity Management Program (IMP) to ensure a safe and secure pipeline in your neighborhood. Through this program, Boardwalk Storage Company performs inspection activities, makes improvements and institutes other preventive safety measures, including identifying any construction activities near our pipeline facilities. Contact your local Boardwalk Storage Company office if you have information about new buildings or sites such as daycare facilities, churches, parks, schools, outdoor areas, or facilities that could be considered as Identified Sites near Boardwalk Storage Company's pipeline. Boardwalk Storage Company will verify these sites for inclusion into its IMP plan.
