Forward-Looking Statements

This presentation contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements may be identified by words such as “expects,” “anticipates,” “intends,” “plans,” “believes,” “seeks,” “estimates,” “will,” or words of similar meaning and include, but are not limited to, statements regarding the outlook for the company’s future business and financial performance. Forward-looking statements are based on management’s current expectations and assumptions, which are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict. Actual outcomes and results may differ materially due to global political, economic, business, competitive, market, regulatory and other factors, including those discussed in the Appendix and in the risk factors section of the company’s Form 10-K filed with the SEC on February 28, 2008. The company undertakes no obligation to publicly update any forward-looking statement, whether as a result of new information, future developments or otherwise.

Non-GAAP and Selected Operating Performance Measures

All references to EPS, income, and ROE refer to net operating earnings per diluted share, net operating income and operating return on equity. All references to ROE in the business segments are levered, assuming 25% debt to total capital at the product line level.

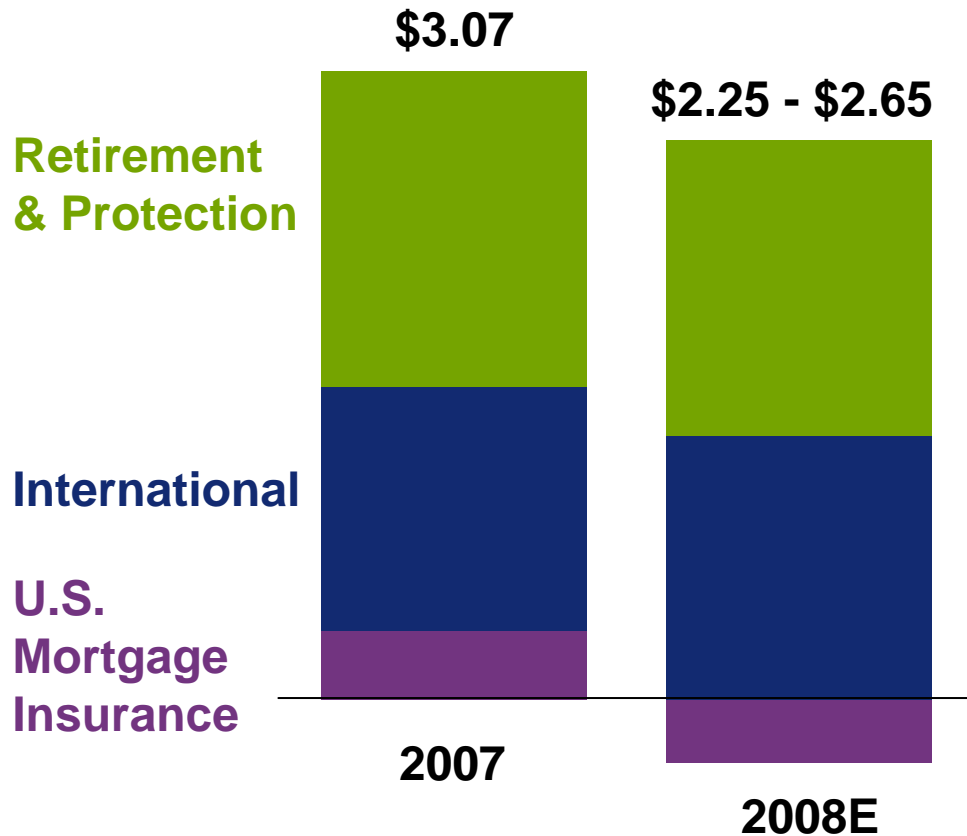

All financial data as of 12/31/07 unless otherwise noted. For additional information, please see Genworth’s Fourth Quarter of 2007 and First Quarter of 2008 earnings releases and financial supplements, as well investor materials dated February 8, 2008 regarding Genworth’s U.S. Mortgage Insurance business, posted at www.genworth.com.

For important information regarding the use of non-GAAP measures and selected operating performance measures, see the Appendix.

This presentation should be used in conjunction with the accompanying audio or call transcript.

⁽¹⁾Data presented in aggregate for all trusts. Actual trust attachment and exit points will vary by individual lender contract. For purposes of this illustration, incurred losses equals change in reserves plus paid claims. The information presented excludes quota share captive reinsurance data. Progress toward captive attachment is determined at a lender level for each book year by dividing ever to date incurred losses by original RIF for that book year.

⁽²⁾Book year figures may include loans from additional periods pursuant to reinsurance agreement terms and conditions.

Market Values Based Upon Independent Assessment

Use Of Non-GAAP Measures

This presentation includes the non-GAAP financial measure entitled "net operating income." The chief operating decision maker evaluates segment performance and allocates resources on the basis of net operating income. The company defines net operating income (loss) as income (loss) from continuing operations excluding after-tax net investment gains (losses) and other adjustments and infrequent or unusual non-operating items. This metric excludes these items because the company does not consider them to be related to the operating performance of its segments and Corporate and Other activities. A significant component of the net investment gains (losses) is the result of credit-related impairments and credit-related gains and losses, the timing of which can vary significantly depending on market credit cycles. In addition, the size and timing of other investment gains (losses) are often subject to Genworth's discretion and are influenced by market opportunities, as well as asset-liability matching considerations. Infrequent or unusual non-operating items are also excluded from net operating income if, in the company's opinion, they are not indicative of overall operating trends. While some of these items may be significant components of net income in accordance with GAAP, the company believes that net operating income, and measures that are derived from or incorporate net operating income, are appropriate measures that are useful to investors because they identify the income attributable to the ongoing operations of the business. However, net operating income should not be viewed as a substitute for GAAP net income. In addition, the company's definition of net operating income may differ from the definitions used by other companies. There were no infrequent or unusual non-operating items excluded from net operating income for the periods presented in this press release other than a \$14 million after-tax expense recorded in the first quarter of 2007 related to reorganization costs. The tables in the appendix of this presentation reflect net operating income (loss) as determined in accordance with Statement of Financial Accounting Standards No. 131, *Disclosures about Segments of an Enterprise and Related Information*, and a reconciliation of net operating income (loss) of the company's segments and Corporate and Other activities to net income.

Due to the unpredictable nature of the items excluded from the company's definition of net operating income, the company is unable to reconcile its outlook for net operating income to net income presented in accordance with GAAP.

In this presentation, the company also references the non-GAAP financial measure entitled "operating return on equity" or "operating ROE." The company defines operating ROE as net operating income divided by average ending stockholders' equity, excluding accumulated other comprehensive income (AOCI) in average ending stockholders' equity. Management believes that analysis of operating ROE enhances understanding of the efficiency with which the company deploys its capital. However, operating ROE as defined by the company should not be viewed as a substitute for GAAP net income divided by average ending stockholders' equity. The tables in the appendix of this presentation include a reconciliation of operating ROE to GAAP net income divided by average ending stockholders' equity. Due to the unpredictable nature of net income and average ending stockholders' equity excluding AOCI, the company is unable to reconcile its outlook for operating ROE to GAAP net income divided by average ending stockholders' equity.

Selected Operating Performance Measures

This presentation also contains selected operating performance measures including “sales,” “assets under management”, “insurance in-force” or “risk in-force” which are commonly used in the insurance and investment industries as measures of operating performance.

Management regularly monitors and reports sales metrics as a measure of volume of new and renewal business generated in a period. Sales refers to (1) annualized first-year premiums for term life insurance, long-term care insurance and Medicare supplement insurance; (2) new and additional premiums/deposits for universal life insurance, linked-benefits, spread-based and variable products; (3) gross flows and net flows, which represent gross flows less redemptions, for our wealth management business; (4) written premiums and deposits, gross of ceded reinsurance and cancellations, and premium equivalents, where we earn a fee for administrative services only business, for payment protection insurance; (5) new insurance written for mortgage insurance, which in each case reflects the amount of business the company generated during each period presented; and (6) written premiums, net of cancellations, for our Mexican insurance operations. Sales do not include renewal premiums on policies or contracts written during prior periods.

The company considers annualized first-year premiums, new premiums/deposits, gross and net flows, written premiums, premium equivalents and new insurance written to be measures of the company’s operating performance because they represent measures of new sales of insurance policies or contracts during a specified period, rather than measures of the company’s revenues or profitability during that period.

Management regularly monitors and reports assets under management for the company’s wealth management business, insurance in-force and risk in-force. Assets under management for the company’s wealth management business represent third-party assets under management that are not consolidated in our financial statements. Insurance in-force for the company’s life insurance, international mortgage insurance and U.S. mortgage insurance businesses is a measure of the aggregate face value of outstanding insurance policies as of the respective reporting date. Risk in-force for the company’s international mortgage insurance and U.S. mortgage insurance businesses is a measure that recognizes that the loss on any particular mortgage loan will be reduced by the net proceeds received upon sale of the underlying property. The company considers assets under management for the company’s wealth management business, insurance in-force and risk in-force to be measures of the company’s operating performance because they represent measures of the size of the company’s business at a specific date, rather than measures of the company’s revenues or profitability during that period.

These operating measures enable the company to compare its operating performance across periods without regard to revenues or profitability related to policies or contracts sold in prior periods or from investments or other sources.

Cautionary note regarding forward-looking statements

This presentation contains certain “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements may be identified by words such as “expects,” “intends,” “anticipates,” “plans,” “believes,” “seeks,” “estimates,” “will,” or words of similar meaning and include, but are not limited to, statements regarding the outlook for our future business and financial performance. Forward-looking statements are based on management’s current expectations and assumptions, which are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict. Actual outcomes and results may differ materially due to global political, economic, business, competitive, market, regulatory and other factors and risks, including the following:

- *Risks relating to our businesses*, including interest rate fluctuations, downturns and volatility in equity and credit markets, downgrades in our financial strength and credit ratings, insufficiency of reserves, legal constraints on dividend distributions by subsidiaries, competition, availability and adequacy of reinsurance, defaults by counterparties, legal or regulatory investigations or actions, political or economic instability affecting outsourcing arrangements, regulatory restrictions on our operations and changes in applicable laws and regulations, the failure or any compromise of the security of our computer systems, and the occurrence of natural or man-made disasters or a disease pandemic;
- *Risks relating to our Retirement and Protection segment*, including changes in morbidity and mortality, accelerated amortization of deferred acquisition costs and present value of future profits, goodwill impairments, reputational risks as a result of an announced rate increase on certain in-force long-term care insurance products, medical advances such as genetic mapping research, unexpected changes in persistency rates, increases in statutory reserve requirements, and the failure of demand for long-term care insurance to increase as we expect;
- *Risks relating to our International segment*, including political and economic instability, foreign exchange rate fluctuations, unexpected changes in unemployment rates, deterioration in economic conditions or decline in home price appreciation, unexpected increases in mortgage insurance default rates or severity of defaults, decreases in the volume of high loan-to-value international mortgage originations, increased competition with government-owned and government-sponsored entities offering mortgage insurance, changes in regulations, and growth in the global mortgage insurance market that is lower than we expect;
- *Risks relating to our U.S. Mortgage Insurance segment*, including increases in mortgage insurance default rates or severity of defaults, deterioration in economic conditions or a decline in home price appreciation, the influence of Fannie Mae, Freddie Mac and a small number of large mortgage lenders and investors, decreases in the volume of high loan-to-value mortgage originations or increases in mortgage insurance cancellations, increases in the use of alternatives to private mortgage insurance (such as simultaneous second mortgages) and reductions by lenders in the level of coverage they select, increases in the use of reinsurance with reinsurance companies affiliated with our mortgage lending customers, increased competition with government-owned and government-sponsored entities offering mortgage insurance, changes in regulations, legal actions under Real Estate Settlement Practices Act, and potential liabilities in connection with our U.S. contract underwriting services; and
- *Other risks*, including the possibility that in certain circumstances we will be obligated to make payments to General Electric (GE) under our tax matters agreement even if our corresponding tax savings are never realized and payments could be accelerated in the event of certain changes in control, and provisions of our certificate of incorporation and by-laws and our tax matters agreement with GE may discourage takeover attempts and business combinations that stockholders might consider in their best interests.

We undertake no obligation to publicly update any forward-looking statement, whether as a result of new information, future developments or otherwise.
