1. Nature of operations

Orvana Minerals Corp. (the "Company" or "Orvana") is a Canadian mining and exploration company based in Toronto, Ontario, involved in the evaluation, development and mining of primarily gold and copper deposits. The Company owns and operates the Don Mario Mine and property in eastern Bolivia which is held indirectly through its wholly-owned subsidiary, Empresa Minera Paititi S.A. ("EMIPA"). The Company also owns the El Valle-Boinas/Carles ("EVBC") project in Spain, which is held indirectly through its wholly-owned subsidiary Orvana Minerals Asturias Corp. In addition, the Company holds mineral leases in the state of Michigan, USA, referred to as the Copperwood project, which is held indirectly through its wholly-owned subsidiary, Orvana Resources US Corp. The Company's shares are listed on the Toronto Stock Exchange.

2. Basis of presentation and new accounting policies

(a) Basis of presentation

The unaudited interim consolidated financial statements have been prepared by the Company in accordance with Canadian generally accepted accounting principles (“Canadian GAAP”). The preparation of the financial statements is based on accounting policies and practices consistent with those used in the preparation of the audited annual consolidated financial statements, except as noted below. The accompanying unaudited interim consolidated financial statements should be read in conjunction with the notes to the Company’s audited consolidated financial statements for the year ended September 30, 2009, since they do not contain all disclosures required by Canadian GAAP for annual financial statements. These unaudited interim consolidated financial statements reflect all normal and recurring adjustments which are, in the opinion of management, necessary for a fair presentation of the respective interim periods presented.

(b) New accounting policies

Financial Instruments
During 2009, CICA Handbook Section 3862, Financial Instruments - Disclosures ("Section 3862") was amended to require disclosure about the inputs to fair value measurements, including their classification within a hierarchy that prioritizes the inputs to fair value measurement. The three levels of the fair value hierarchy are:

- Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 - Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, and;
- Level 3 - Inputs that are not based on observable market data.

This amended standard applies to annual financial statements with fiscal years ending after September 30, 2009. The Company will include these disclosures in its annual consolidated financial statements for the year ending September 30, 2010.

Leased assets
Assets acquired under capital leases are capitalized and amortized in accordance with the Company's policy on property, plant and equipment. The associated obligations are included under financial liabilities.

(In thousands of United States Dollars unless otherwise noted)

2. Basis of presentation and new accounting policies (continued)

(c) New accounting policies not yet adopted

Business Combinations, Consolidated Financial Statements and Non-Controlling Interests
The CICA issued three new accounting standards in January 2009: Section 1582, “Business Combinations”, Section 1601, “Consolidated Financial Statements” and Section 1602, “Non-Controlling interests”. These new standards will be effective for fiscal years beginning on or after January 1, 2011. Section 1582 replaces section 1581 and establishes standards for the accounting for a business combination. Sections 1601 and 1602 together replace section 1600, “Consolidated Financial Statements”. Section 1601 establishes standards for the preparation of consolidated financial statements. Section 1602 establishes standards for accounting for a non-controlling interest in a subsidiary in consolidated financial statements subsequent to a business combination. The Company is in the process of evaluating the requirements of the new standards.

3. Cash and cash equivalents

Cash and cash equivalents includes $767 of cash on deposit in favour of the Spanish government pending audit by the government of compliance with the terms of certain capital investment subsidies received by the Company.

4. Credit facility

EMIPA has a short term credit facility with Banco de Credito BCP for up to $3.0 million dollars payable in 90 days at a rate of 4% annual interest with certain of the Company’s assets pledged as security against this loan. As at March 31, 2010, $345 was drawn on this facility and is included in accounts payable and accrued liabilities.

6. Long-term debt

On March 4, 2008, EMIPA entered into a term credit facility agreement of $5,000 with Banco Bisa S.A. This facility bears interest at 7.75% and is payable in equal quarterly instalments over a three-year period. At March 31, 2010, $1,796 was outstanding under this facility. During the periods presented, $428 and $848 (2009 comparative periods - $397 and $786) was repaid against this loan. The Company used the proceeds of this credit facility to purchase additional electrical generation equipment and a ball mill to increase ore treatment capacity.

On September 29, 2009, EMIPA entered into a second term credit facility agreement of $2,500 with Banco Bisa S.A. This facility bears interest at 7.8% and is payable in equal quarterly instalments over a three-year period. The first tranche of $1,500 was advanced on September 30, 2009. The second tranche of $1,000 was advanced on November 30, 2009. At March 31, 2010, $2,083 was outstanding under this facility. During the periods presented, $208 and $417 (2009 comparatives period - $nil) was repaid against this loan. The proceeds of this second credit facility was used to fund capital investments for the mineral flotation system for the Upper Mineralized Zone project.

The Company has the option of repaying both of these loans prior to the end of this term without penalties and there are no specific covenants related to these credit facilities. Both loans are secured by certain machinery and equipment.

9. Share capital (continued)

(c) Stock options (continued)

The Company uses the fair value method of accounting and, during the three and six month periods ended March 31, 2010 recognized stock-based compensation expense of $80 and $323 (three and six months ended March 31, 2009 - $42 and $67).

The fair value of the options granted during the six months ended March 31, 2010 was estimated using the Black-Scholes option-pricing model with the following assumptions:

Grant date:	October 2009 to March 2010
Options granted	925,000
Estimated grant date fair value:	$65 to $255
Risk-free interest rate:	2.24% to 2.50%
Expected life in years:	5
Expected volatility:	59%
Expected dividend yield:	0%

The weighted-average grant date fair value of these options of $460 or Cdn $0.52 per option is expensed over the vesting period of the option which is 24 months from the grant date.

For the six-month periods presented, the fair value associated with non-vested stock options is $320 (March 31, 2009 - $171).

10. Long-term compensation

A summary of the deferred share unit plan ("DSUs") transactions for the six-month period is as follows:

	DSUs		Fair value
Balance, September 30, 2009	204,556	$	169
Mark-to-market adjustment	-		50
Balance, March 31, 2010	204,556	$	219

A summary of the restricted share units ("RSUs") transactions is as follows:

	RSUs		Fair value

11. Commitments and contingencies

(a) The Company's mining and exploration activities are subject to various government laws and regulations relating to the protection of the environment. These environmental regulations are continually changing and generally becoming more restrictive. The Company records provisions for asset retirement obligations based on management's estimate of such costs. These estimates are, however, subject to changes in laws and regulations.

(b) The Company is subject to certain risks, including currency fluctuations and possible political or economic instability in Bolivia, which may result in the impairment or loss of mineral concessions or other mineral rights. Any changes in laws or regulations, including possible changes to the Bolivian Mining Code, or shifts in political attitudes are beyond the control of the Company and may adversely affect its business.

(c) Orvana and/or one of its subsidiaries are or were parties to three claims arising from Orvana's acquisition of the shares of Kinbauri Gold Corp. ("Kinbauri"). Kinbauri was subsequently amalgamated with Orvana Minerals Acquisition Corp. to form Orvana Minerals Asturias Corp. ("Asturias").

The first claim was an application in the Ontario Superior Court of Justice by Jaguar Financial Corporation ("Jaguar") against Kinbauri (now Asturias), Kinbauri's Spanish subsidiary Kinbauri Espana S.L. ("Kinbauri Espana"), Kinbauri's pre-acquisition directors, Glen Eagle Resources Inc. ("Glen Eagle") and Paradise Peak Holdings under the oppression remedy provisions of the Ontario Business Corporations Act . Jaguar sought an unspecified amount of compensation for the difference it claims exists between the price per share between the amount Orvana paid and the amount that would have been realized had Kinbauri and its directors acted properly. Jaguar's original application sought orders preventing Kinbauri Espana from proceeding with a proposed transaction with Glen Eagle. Kinbauri ultimately did not proceed with that transaction after Glen Eagle advised it that its financing had ceased to be available and was unable to satisfy Kinbauri that it had secured alternate financing. The amendments to seek the current relief were brought after Orvana's acquisition of Kinbauri. The application was recently settled and Jaguar has served a notice of abandonment of its application. Under the terms of the settlement Jaguar is required to obtain an order confirming the application’s abandonment. It is currently in the process of obtaining that order.

The second claim was a claim by Jaguar against Orvana and one of its officers in the Ontario Superior Court of Justice. The claim sought damages of $600,000 plus interest and costs. Jaguar claimed that Orvana promised to pay Jaguar's expenses in relation to the above noted application. Orvana delivered its statement of defence in December 2009. The claim was recently resolved. As part of that resolution the claim was dismissed in April 2010.

The third claim arises from the aforementioned Kinbauri Espana/Glen Eagle transaction. Glen Eagle has challenged Kinbauri's decision not to proceed with the proposed transaction. In December 2009, Glen Eagle formally commenced an arbitration against Asturias and Kinbauri Espana seeking damages of $75 million, interest and costs. Asturias and Kinbauri Espana have served a response denying any liability based on Glen Eagle's anticipatory repudiation of the agreement in issue. The parties have recently agreed upon the appointment of an arbitrator to hear the arbitration. The arbitration is expected to be heard in December 2010.

(d) In March 2008, the Bolivian government discontinued an exploration incentive initiative introduced in 2004 by a previous administration and, at the same time, challenged the legality of this incentive. The 2004 incentive provided for a double deduction of exploration expenses in determining taxable income. Like most mining companies operating in Bolivia, the Company has taken advantage of this incentive since 2004. The Bolivian tax authorities have accepted the application of the double deduction tax incentive for exploration expenses for each of the four taxation years ended September 30, 2007 and for the taxation year ended September 30, 2008, for which the Company claimed the double deduction up to the date of its discontinuance in March 2008.

The Bolivian tax administration has challenged in court the legality of a particular taxpayer’s claim of the double deduction incentive in fiscal periods prior to March 2008. The Bolivian lower court’s decision, which ruled in favour of the taxpayer, was upheld by the superior court. The case is now before the Tribunal Supremo Plurinacional (the supreme court of Bolivia).

13. Acquisition of Kinbauri Gold Corp.

On August 28, 2009, at the expiry of Orvana's offer to purchase all of the outstanding common shares of Kinbauri, the Company had acquired 94.9% of the issued and outstanding common shares of Kinbauri, a company listed on the TSX Venture Exchange. On September 24, 2009, the Company, through a wholly-owned subsidiary, completed a compulsory acquisition, pursuant to section 206 of the Canada Business Corporations Act, of the remaining outstanding common shares not already owned by it. Kinbauri was delisted from the TSX Venture Exchange on September 25, 2009 and subsequently, an application was granted by the relevant provincial securities commissions for Kinbauri to cease to be a reporting issuer.

The aggregate purchase price was $45,068 including $44,483 paid in cash for the common shares of Kinbauri and transaction costs relating to the acquisition of $2,615 less cash acquired amounting to $2,030.

Kinbauri's balance sheets at September 30, 2009 and March 31, 2010 have been included in Orvana's consolidated balance sheets at the same dates and results of Kinbauri's operations have been included from the acquisition date.

The following table summarizes the estimated fair value of the assets acquired and liabilities assumed at September 30, 2009. During fiscal 2010, the Company will obtain third-party valuations of certain tangible and intangible assets; thus, the allocation of the purchase price will be subject to some adjustments which may include an adjustment to reflect an estimate of the fair value of the acquired property, plant and equipment.

As at September 30, 2009:

Current assets	$	1,008
Reclamation bonds		1,309
Plant and equipment		3,513
Mineral properties and deferred development costs		49,550
Total assets acquired		55,380
Accounts payable and accrued liabilities		1,684
Asset retirement obligations		469
Future income taxes		8,159
Total liabilities assumed		10,312
Net assets acquired	$	45,068

These are preliminary estimates of fair value and will likely differ from the final allocation and the difference may be material. The Company will finalize the fair value allocation within 12 months of the closing of the transaction.

Prior to its acquisition by Orvana, Kinbauri entered into an agreement (the "NSR Agreement") in which its Spanish subsidiary granted a 2.5% Net Smelter Return royalty in return for consideration of Cdn. $7,500. The royalty rate increases to 3% for any quarter year in which the average price of gold reaches or exceeds $1,100 per ounce. The Company has fair valued the royalty at $10,787, being the present value of forecasted royalty payments using a 15% discount rate.

The amount of $49,550 allocated to mineral properties and deferred development costs is comprised of an estimate of $60,337 offset by the fair value of a Net Smelter Return royalty advance of $10,787.

Future income tax liabilities of $10,462 arising from timing differences on depreciable assets and future income tax assets amounting to $2,303 related to the expected utilization of tax losses have been recognized.
