"We are very excited about the debut of our new AR400 Champagne Metallic color," said Craig Dietz,

Axalta Product Manager. "The addition of this beautiful hue to our AR400 collection demonstrates our commitment to expand our color offerings, with coatings that are durable and deliver high performance standards designed to meet our customers' various needs."

AR400 Champagne Metallic is formulated to produce a smooth, metallic coverage with excellent abrasion and corrosion resistant properties. The low volatile organic compound product was created with sustainability in mind.

Our AR400 series including the new Champagne Metallic coating meets or exceeds the American Architectural Manufacturers Association 2604 standard for high performance organic coatings on aluminum extrusions and panels. This new coating is formulated for superior storage stability and transfer efficiency; it also helps create

uniform coverage on parts to easily fill in scratches and reduce excessive thickness.
