

Quest Diagnostics CIO Lidia Fonseca Wins 2017 Forbes CIO Innovation Award

May 1, 2017

Award recognizes the innovation of the QuestQuantum™ portfolio of data analytics and information technology solutions

MADISON, N.J., May 1, 2017 /PRNewswire/ -- [Quest Diagnostics](#) (NYSE: DGX), the world's leading provider of diagnostic information services, today announced that its senior vice president and chief information officer Lidia L. Fonseca has received a 2017 Forbes CIO Innovation Award. The award, presented during the Forbes Innovation Summit on April 24, recognizes CIOs of multibillion dollar companies who have demonstrated the ability to generate value through innovation.

Ms. Fonseca was recognized with the honor largely on the basis of the company's [Quantum](#)™ data analytics and information technology solutions, which help providers and health plans connect across the healthcare ecosystem and analyze health data to improve quality, health and financial outcomes.

"Quest Diagnostics is the world leader in diagnostic information services, with broad capabilities in data analytics and information technology that make us more than a lab," said Steve Rusckowski, Chairman, President and CEO, Quest Diagnostics. "We congratulate Lidia and our QuestQuantum and Quest IT teams for this recognition."

QuestQuantum offerings are divided into two solution sets: Analytics, which include population health management and quality reporting technologies, and Clinical and Financial (formerly known as Care360), which includes revenue cycle management, patient engagement and practice management tools. Key Analytics products include Data Diagnostics, a healthcare analytics solution that helps providers close gaps in care at the point of care, and Lab Utilization, which provides hospital systems with insights into appropriate utilization based on lab data. Quantum offerings are organized and available through digital access points tailored to the needs of customer segments. These include the [myQuest™ patient portal](#) for patients, and access points for physicians, health systems and health plans.

Quest's solutions are based on capabilities unique to Quest, including connectivity to about 600 EHR platforms and about 450,000 physicians and a dataset of more than 20 billion laboratory test results. Unlike many technology providers, the company's offerings are based on deep experience in healthcare services and relationships with broad sectors of the healthcare industry, from health systems to pharmaceutical companies, that use data and information technologies to create value.

Ms. Fonseca leads the enterprise-wide Information Technology (IT) function for Quest Diagnostics with an emphasis on using IT and data to drive business transformation and better customer experiences. She is also a member of the Board of Directors of Tegna, Inc.

The Forbes CIO Innovation Award ceremony took place during the [2017 CIO Summit](#), a gathering of influential CIO leaders that explores today's biggest technological challenges, fosters deep collaboration and generates new ideas.

About Quest Diagnostics

Quest Diagnostics empowers people to take action to improve health outcomes. Derived from the world's largest database of clinical lab results, our diagnostic insights reveal new avenues to identify and treat disease, inspire healthy behaviors and improve health care management. Quest annually serves one in three adult Americans and half the physicians and hospitals in the United States, and our 43,000 employees understand that, in the right hands and with the right context, our diagnostic insights can inspire actions that transform lives. www.QuestDiagnostics.com

50th Anniversary: In 2017, Quest Diagnostics celebrates 50 years of life-changing results. To learn about our legacy of accomplishments and quest to improve healthcare in the future, visit www.QuestDiagnostics.com/50Years
