Connections are at the heart of Crestwood. Our operations connect fundamental energy supply with demand across North America through our best-in-class midstream network. Our customers see value in Crestwood’s ability to offer a full range of services and solutions up and down the midstream value chain while maintaining operational safety as the top priority.

“At Crestwood, our goal is to create long-term value for our customers and unitholders through organized expansion, development projects and acquisitions, while at the same time ensuring the ongoing stability of our business. We aim to provide the highest level of customer service while maintaining a focus on safety, compliance and the environment.”

Bob Phillips, Chairman, President & CEO
OPERATING PRINCIPLES

SAFE.
RESPONSIBLE.
GOOD NEIGHBOR.

» Crestwood designs, constructs and operates facilities in a safe, reliable and responsible way
» Crestwood provides its customers with the highest level of service
» Crestwood conducts its operations in a manner that protects natural resources and cultural sites
» Crestwood works to reduce its operational footprint
» Crestwood engages and partners with local communities where we operate

“One of Crestwood’s unique advantages is our focus on people and local communities. That means we think about safety, compliance and the environment in every decision we make. It’s important to us that our employees always make it home safe to their families, our customers recieve the highest level of service and the communities where we operate see us as a good neighbor.”

Ben Hansen
Senior Vice President, Operations
OPERATIONAL SAFETY

Safety is a core requirement for the successful operation of all of Crestwood's assets -- at Crestwood, we call that Operational Safety! Operational Safety requires a commitment to fully adopting a specific set of Principles that ensures we operate in a safe, reliable, and environmentally sound manner. Operational Safety is the foundation upon which we provide the best midstream services to our customers, while ensuring the safety of our employees, any contractors working for us, and the public.

“Safety and environmental protection are top priorities at Crestwood. We are committed to following the highest standards to ensure the safety of our employees, our neighbors, the public, and the environment.”

Julie Allison, Senior Director, Corporate Health, Safety & Training

We will ensure an operational safety focus in all of our operations by ALWAYS adhering to the following key Principles:

| Assemble the people with the right skills for the task at hand | Provide engineering designs in conformance with applicable industry codes and standards |
| Utilize safe work practices and behaviors | Immediately address and correct any unsafe condition |
| Ensure conformance with all policies and procedures | Seek timely assistance from technical and subject matter experts as necessary |
| Ensure full compliance with all applicable regulations | Ensure that the maintenance of vehicles, equipment, and facilities is regularly performed, follows known standards, corrects identified failures, and is documented in a consistent manner across the company |
| Promote safe operational control of facilities, vehicles and assets | |
| Ensure all safety devices are in place and properly functioning | |
