We are health care innovators

CVS Health employees are united around a common goal of becoming the most consumer-centric health company. We’re evolving based on changing consumer needs and meeting people where they are, whether that’s in the community at one of our nearly 10,000 local touchpoints, in the home, or in the palm of their hand. Our newest offerings—from HealthHUB® locations that are redefining what a pharmacy can be, to innovative programs that help manage chronic conditions—are designed to create a higher-quality, simpler and more affordable experience. Learn more about how we’re transforming health at http://www.cvshealth.com and learn more about our past year at http://www.cvshealth2019inreview.com.

Footnotes:

1: During full year 2019. This metric includes prescriptions dispensed through CVS Health’s retail pharmacies, long-term care pharmacies, and mail order pharmacies as well as prescription claims managed through our pharmacy benefits manager, with an elimination for managed prescription claims filled through CVS Health dispensing channels. Includes an adjustment to convert 90-day prescriptions to the equivalent of three 30-day prescriptions. This adjustment reflects the fact that these prescriptions include approximately three times the amount of product days supplied compared to a normal prescription.

2: GAAP diluted EPS from continuing operations and adjusted earnings per share (Adjusted EPS), respectively, are calculated by dividing income from continuing operations attributable to CVS Health and adjusted income from continuing operations attributable to CVS Health by CVS Health’s weighted average diluted shares outstanding. CVS Health defines adjusted income from continuing operations attributable to CVS Health as income from continuing operations attributable to CVS Health (GAAP measure) excluding the impact of amortization of intangible assets and other items, if any, that neither relate to the ordinary course of CVS Health’s business nor reflect CVS Health’s underlying business performance, such as acquisition-related transaction and integration costs, store rationalization charges, gains/losses on divestitures, losses on early extinguishment of debt, goodwill impairments, impairment of long-lived assets, net interest expense on financings associated with proposed acquisitions (for periods prior to the acquisition), the corresponding income tax benefit or expense related to the items excluded from adjusted income from continuing operations attributable to CVS Health, the corresponding impact to income allocable to participating securities, net of tax, related to the items excluded from income (loss) from continuing operations attributable to CVS Health in determining adjusted income from continuing operations attributable to CVS Health, and any other items specifically identified herein.

CVS Health uses non-GAAP financial measures to analyze underlying business performance and trends. CVS Health believes that providing these non-GAAP financial measures enhances CVS Health’s and investors’ ability to compare CVS Health’s past financial performance with its current performance. These non-GAAP financial measures are provided as supplemental information to the financial measures CVS Health presents that are calculated and presented in accordance with GAAP. Non-GAAP financial measures should not be considered a substitute for, or superior to, financial measures determined or calculated in accordance with GAAP. CVS Health’s definitions of its non-GAAP financial measures may not be comparable to similarly titled measurements reported by other companies.

For a reconciliation of Adjusted EPS to the most directly comparable GAAP financial measure, please refer to CVS Health’s filings with the Securities and Exchange Commission.

3: Long-term debt as of December 31, 2019 excluding ~$800M of finance lease liabilities.

4: Financial metrics as of and for the twelve months ended December 31, 2019.
