

Ladder Capital Corp Reports Results for the Quarter and Year Ended December 31, 2022

NEW YORK, NY, February 9, 2023 – Ladder Capital Corp (NYSE: LADR) (“we,” “our,” “Ladder,” or the “Company”) today announced operating results for the quarter ended December 31, 2022. GAAP income before taxes for the three months ended December 31, 2022 was \$75.3 million, and diluted earnings per share (“EPS”) was \$0.48. Distributable earnings was \$38.9 million, or \$0.31 of distributable EPS. GAAP income before taxes for the twelve months ended December 31, 2022 was \$170.2 million, and diluted earnings per share was \$1.13. Distributable earnings was \$148.4 million or \$1.16 of distributable EPS.

“2022 was a very positive year for Ladder. Both our earnings and dividend reflected double-digit annual growth. At the same time, we generated an attractive ROE with strong credit performance across the board. We are well positioned to capitalize on the opportunities we expect to see in 2023 with significant liquidity, low leverage, an attractive overall cost of capital, and no material near-term debt maturities,” said Brian Harris, Ladder’s Chief Executive Officer.

Non-GAAP Financial Measures

The Company utilizes distributable earnings, distributable EPS, and after-tax distributable return on average equity (“ROAE”), non-GAAP financial measures, as supplemental measures of our operating performance. We believe distributable earnings, distributable EPS, and after-tax distributable ROAE assist investors in comparing our operating performance and our ability to pay dividends across reporting periods on a more relevant and consistent basis by excluding from GAAP measures certain non-cash expenses and unrealized results as well as eliminating timing differences related to securitization gains and changes in the values of assets and derivatives. In addition, we use distributable earnings, distributable EPS and distributable ROAE: (i) to evaluate our earnings from operations because management believes that it may be a useful performance measure for us and (ii) because our board of directors considers distributable earnings in determining the amount of quarterly dividends.

We define distributable earnings as income before taxes adjusted for: (i) real estate depreciation and amortization; (ii) the impact of derivative gains and losses related to the hedging of assets on our balance sheet as of the end of the specified accounting period; (iii) unrealized gains/(losses) related to our investments in fair value securities and passive interest in unconsolidated ventures; (iv) economic gains on loan sales not recognized under GAAP accounting for which risk has substantially transferred during the period and the exclusion of resultant GAAP recognition of the related economics during the subsequent periods; (v) unrealized provision for loan losses and unrealized real estate impairment; (vi) realized provisions for loan losses and realized real estate impairment; (vii) non-cash stock-based compensation; and (viii) certain transactional items. For the purpose of computing distributable earnings, management recognizes loan and real estate losses as being realized generally in the period in which the asset is sold or the Company determines a decline in value to be non-recoverable and the loss to be nearly certain. Distributable EPS is defined as after-tax distributable earnings divided by the weighted average diluted shares outstanding during the period.

For distributable earnings, we include adjustments for economic gains on loan sales not recognized under GAAP accounting for which risk has substantially transferred during the period and exclude the resultant GAAP recognition of the related economics during the subsequent periods. This adjustment is reflected in distributable earnings when there is a true risk transfer on the mortgage loan transfer and settlement. Historically, this adjustment has represented the impact of economic gains/(discounts) on intercompany loans secured by our own real estate which we had not previously recognized because such gains were eliminated in consolidation. Conversely, if the economic risk was not substantially transferred, no adjustments to net income would be made relating to those transactions for distributable earnings purposes. Management believes recognizing these amounts for distributable earnings purposes in the period of transfer of economic risk is a reasonable supplemental measure of our performance.

We do not designate derivatives as hedges to qualify for hedge accounting and therefore any net payments under, or fluctuations in the fair value of, our derivatives are recognized currently in our GAAP income statement. However, fluctuations in the fair value of the related assets are not included in our income statement. We consider the gain or loss on our hedging positions related to assets that we still own as of the reporting date to be “open hedging positions.” While recognized for GAAP purposes, we exclude the results on the hedges from distributable earnings until the related asset is sold and/or the hedge position is considered “closed,” whereupon they would then be included in distributable earnings in that period. These are reflected as “Adjustments for unrecognized derivative results” for purposes of computing distributable earnings for the period. We believe that excluding these specifically identified gains and losses associated with the open hedging positions adjusts for timing differences between when we recognize changes in the fair values of our assets and changes in the fair value of the derivatives used to hedge such assets.

Our investments in Agency interest-only securities and equity securities are recorded at fair value with changes in fair value recorded in current period earnings. We believe that excluding these specifically-identified gains and losses associated with the fair value securities adjusts for timing differences between when we recognize changes in the fair values of our assets. With regard to securities valuation, distributable earnings includes a decline in fair value deemed to be an impairment for GAAP purposes only if the decline is determined to be nearly certain to be eventually realized. In those cases, an impairment is included in distributable earnings for the period in which such determination was made.

Our share of real estate depreciation, amortization and gain adjustments	\$ (28,253)	\$ 4,414	\$ (29,188)	\$ 1,662

- (a) GAAP gains/losses on sales of real estate include the effects of previously-recognized real estate depreciation and amortization. For purposes of distributable earnings, our share of real estate depreciation and amortization is eliminated and, accordingly, the resultant gains/losses also must be adjusted. Following is a reconciliation of the related consolidated GAAP amounts to the amounts reflected in distributable earnings (\$ in thousands):

	Three Months Ended		Year Ended	
	December 31, 2022	September 30, 2022	December 31, 2022	December 31, 2021

Adjustments for unrecognized derivative results	\$ 505	\$ (6,454)	\$ (9,381)	\$ (7,534)

- (3) The adjustment reflects the portion of the loan loss provision that management determined to be recoverable. Additional provisions and releases of those provisions are excluded from distributable earnings as a result.
- (4) Estimated corporate tax benefit (expense) is based on an effective tax rate applied to distributable earnings generated by the activity within our taxable REIT subsidiaries.

After-tax distributable ROAE is presented on an annualized basis and is defined as after-tax distributable earnings divided by the average total shareholders' equity during the period. Set forth below is an unaudited computation of after-tax distributable ROAE (\$ in thousands):

	Three Months Ended		Year Ended	
	December 31, 2022	September 30, 2022	December 31, 2022	December 31, 2021

After-tax distributable ROAE	10.2 %	9.1 %	9.7 %	4.0 %

Non-GAAP Measures - Limitations

Our non-GAAP financial measures have limitations as analytical tools. Some of these limitations are:

- distributable earnings, distributable EPS and after-tax distributable ROAE do not reflect the impact of certain cash charges resulting from matters we consider not to be indicative of our ongoing operations and are not necessarily indicative of cash necessary to fund cash needs;
- distributable EPS and after-tax distributable ROAE are based on a non-GAAP estimate of our effective tax rate, including the impact of Unincorporated Business Tax and the impact of our election to be taxed as a REIT effective January 1, 2015. Our actual tax rate may differ materially from this estimate; and
- other companies in our industry may calculate non-GAAP financial measures differently than we do, limiting their usefulness as comparative measures.

Because of these limitations, our non-GAAP financial measures should not be considered in isolation or as a substitute for net income (loss) attributable to shareholders, earnings per share or book value per share, or any other performance measures calculated in accordance with GAAP. Our non-GAAP financial measures should not be considered an alternative to cash flows from operations as a measure of our liquidity.

In addition, distributable earnings should not be considered to be the equivalent to REIT taxable income calculated to determine the minimum amount of dividends the Company is required to distribute to shareholders to maintain REIT status. In order for the Company to maintain its qualification as a REIT under the Internal Revenue Code, we must annually distribute at least 90% of our REIT taxable income. The Company has declared, and intends to continue declaring, regular quarterly distributions to its shareholders in an amount approximating the REIT's net taxable income.

In the future, we may incur gains and losses that are the same as or similar to some of the adjustments in this presentation. Our presentation of non-GAAP financial measures should not be construed as an inference that our future results will be unaffected by unusual or non-recurring items.
