What distinguishes Southern Company?

Electric Operating Companies
Only electric utility in the U.S. developing a portfolio of generation resources – natural gas, nuclear, and renewables such as wind and solar – together with an emphasis on energy efficiency.

Southern Company Gas
A natural gas distribution system that includes four state-regulated local distribution companies (LDCs), serving 4.3 million customers. Gas pipeline investments include investments in six pipelines, including Southern Natural Gas. Gas marketing services complement LDCs and pipeline investments.

Southern Power
America's premier wholesale energy partner investing in clean energy solutions for customers. Southern Power is a leading U.S. wholesale energy provider meeting the electricity needs of municipalities, electric cooperatives, investor-owned utilities and other energy customers.

PowerSecure
Provides energy technologies and services to electric utilities and their large industrial, commercial, institutional and municipal customers. Customer solutions include distributed generation systems, utility infrastructure solutions and energy efficiency products and services.

Low-to-No Carbon Goal
Since 2007, we have reduced GHG emissions 44% by transitioning our electricity generation mix to include more natural gas, renewables, and nuclear energy source. Our goal is to reach 50% reduction in emissions by 2030 and low-to-no carbon operations by 2050.

Research and Development
• Industry leader in conducting robust research, development and deployment of new, innovative energy technologies.
• Greenhouse gas emissions reduction is a major focus of the company’s research and development organization, which has a historic record of technology advancement that goes back to the 1960s.
Southern Company System
