Cautionary Statement on Forward-Looking Information

All statements, other than statements of historical fact, contained or incorporated by reference in this presentation, including any information as to the future financial or operating performance of Kinross, constitute “forward-looking information” or “forward-looking statements” within the meaning of certain securities laws, including the provisions of the Securities Act (Ontario) and the provisions for “safe harbour” under the United States Private Securities Litigation Reform Act of 1995 and are based on expectations, estimates and projections as of the date of this presentation. Forward-looking statements include, without limitation, possible events, statements with respect to possible events, the future price of gold and silver, the estimation of mineral reserves and resources and the realization of such estimates, the timing and amount and costs of estimated future production, expected capital expenditures, development and mining activities, permitting timelines, currency fluctuations, requirements for additional capital, government regulation, environmental risks, unanticipated reclamation expenses, title disputes or claims. The words "plan", "expects", "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "targets", "forecasts", "anticipates", "does not anticipate", or "believes", or variations of such words and phrases or statements that certain actions, events or results "may", "could", "should", "might", or "will be taken", "occur", or "be achieved" and similar expressions identify forward-looking statements. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by Kinross as of the date of such statements, are inherently subject to significant business, economic and competitive uncertainties and contingencies. Statements representing management’s financial and other outlook have been prepared solely for purposes of expressing their current views regarding the Company’s financial and other outlook and may not be appropriate for any other purpose. Many of these uncertainties and contingencies can affect, and could cause, Kinross’ actual results to differ materially from those expressed or implied in any forward-looking statement made by, or on behalf of, Kinross. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. All of the forward-looking statements made in this presentation are qualified by these cautionary statements and those made in our filings with the securities regulators of Canada and the U.S., including but not limited to those cautionary statements made in the “Risk Factors” section of our most recently filed Annual Information Form, the “Risk Analysis” section of our most recently filed Management’s Discussion and Analysis and the “Cautionary Statement on Forward-Looking Information” in our news release dated May 4, 2010, to which readers are referred and which are incorporated by reference in this presentation, and all of which qualify any and all forward-looking statements made in this presentation. These factors are not intended to represent a complete list of the factors that could affect Kinross. Kinross disclaims any intention or obligation to update or revise any forward-looking statements or to explain any material difference between subsequent actual events and such forward-looking statements, except to the extent required by applicable law.

Other Information

Where we say "we", "us", "our", the "Company", or "Kinross" in this presentation, we mean Kinross Gold Corporation and/or one or more or all of its subsidiaries, as may be applicable.

The technical information about the Company’s mineral properties contained in this presentation has been prepared under the supervision of Mr. Rob Henderson, an officer of the Company who is a “qualified person” within the meaning of National Instrument 43-101.
Why Kinross?

- **Growing cash flow**
  - Production has risen while margins have expanded
  - CFPS\(^1\): 5yr CAGR: 25%
  - Strong balance sheet: ~$1.1bn in cash*

- **Pipeline of future opportunities**
  - Increasing reserve and resource base
  - High-quality projects & new mine expansions

- **Compelling valuation**
  - Projects will re-rate as they are advanced

**Kinross Today**
- Portfolio of 8 operating mines
- Pure gold/silver producer
- ’10e: 2.2mm oz Au eq\(^2\)
- Policy of no gold-hedging
- US$13.0bn market cap

**Kinross’ Evolution**

- **Kinross Tomorrow**
  - Next wave of growth through project development
    - 2011 - 2012
      - 3rd ball mill at Paracatu
      - Maricunga Expansion
      - Dvoinoye**
    - 2013 – 2015+
      - Lobo-Marte
      - Fruta del Norte
      - Cerro Casale
      - White Gold

**Kinross Yesterday**
- Non-operated JVs
- Various geographies
- $154mm cash flow (’04)
- $54mm cash on hand
- $2.4bn market cap
- Margin: $161/oz. (’04)

**Pipeline of Projects for the Future**

- Further organic growth at our mines
- Advancing next suite of projects
- Exploration & JV strategies
Paracatu: At-site expansion

3rd Ball Mill
- Installing 3rd ball mill to increase throughput
- Procurement commitments at 40%; construction commenced
- On schedule for completion and installation in H1 2010

Desulphurization Circuit
- Installing a $30 mm desulphurization circuit to reduce sulphur content in the Eustaquio tailings dam
- Expected to increase Plant 2 recoveries by 4% once fully operational
- Expected to be completed in Q3 2011
Maricunga Optimization

Expansion
- Scoping study completed late 2008
- Feasibility study expected in first half of 2010
- Concept: update mining fleet; construct new primary crusher and conveyor; increase capacity of existing crushing plant
- Potential to increase ore processing and ounce production by ~50%

SART Plant
- $46 million SART plant to allow optimum gold recovery as copper content in ore mined is expected to increase beginning H2 2011
- Significantly reduces reagent consumption and costs
- Expected to be in operation by late 2011

Lobo-Marte, Chile

- Completed pre-feasibility study
- Capital estimate: $575 – $650 million
  - 47,000 tpd heap leach with SART plant
  - Operating costs expected to be $11.00-$12.00 per tonne
- Annual production: 350-400k oz. per year (first five years of full production)
- ~3,000 m of hydrogeological drilling complete
- Received approval in April for additional 12,000 m of infill and geotechnical drilling

Fruta del Norte/Condor

- Exploration to date has located a number of epithermal and porphyry-style targets which will be the focus of continued regional exploration
- FDN NI 43-101 Technical Report*: Describes major exploration targets in area of Suarez pull-apart basin
- Estimated 2010 FDN exploration spending: $34 MM

Update on Cerro Casale

- Sold down interest from 50% to 25%:
  - Total transaction value: $474 mm
- Rebalances Cerro Casale in our overall portfolio, reduces future capital and increases cash
- Finalizing feasibility study that envisions (for 25% interest):
  - Kinross share of pre-production capital: ~$1.05 bn
  - Processing: heap leach and 160,000 tpd mill
  - Average annual production over the first five full years:
    - 250,000 – 275,000 oz. Au at ~$530/oz.
    - 57 – 63 mm lbs Cu at ~$1.35/lb.
- Start-up: 3 years following receipt of key permits

Portfolio Optimizations

- Acquiring 100% of the Dvoinoye deposit and Vodorazdelnaya concession\(^8\)
  - High-grade deposit located ~100 km from Kupol
  - Exploration potential at Vodorazdelnaya

- Acquisition of Underworld Resources\(^9\)
  - Adds high potential exploration asset in a nearby jurisdiction
  - Plan to spend $15 million in 2010 on exploration at the White Gold project

\(^8\) Refer to endnote #8.
\(^9\) Refer to endnote #9.
New Investment in Red Back Mining

• C$600 mm for 9.4% of pro-forma equity ownership
  o C$25.00 per share
• Right to appoint one member to Red Back’s Board of Directors
• Anti-dilution provisions
• Investment from Kinross’ existing $1.1 bn cash balance

Rationale for Red Back Mining Investment

This investment gives Kinross:
• Disciplined entry to West Africa – highly prospective and fast growing region
• A high-quality, proven management team with a great track record
• Strategic window into two high-growth gold mines with excellent potential
• Increased leverage to gold

Key Objectives for 2010

- Declare increased reserves
- Complete Lobo-Marte pre-feasibility study
- Complete 18,000 drill program at Fruta del Norte
- Complete acquisition of Underworld Resources
- Complete Maricunga Expansion feasibility study (H1 2010)
- Close Dvoinoye acquisition
- Delivery and construction of 3rd ball mill at Paracatu
- Complete metallurgical testing and finalize pre-feasibility study at Lobo-Marte
- Advance Fruta del Norte pre-feasibility study

Endnotes

1. Unless otherwise stated, all cash flow and cash flow per share figures in this presentation are adjusted operating cash flow. Adjusted operating cash flow figures are non-GAAP financial measures which are meant to provide additional information and should not be used as a substitute for performance measures prepared in accordance with GAAP. For more information about these non-GAAP financial measures, and a reconciliation of these non-GAAP financial measures for the three and twelve months ended December 31, 2009 and December 31, 2008 and the three months ended March 31, 2010, please refer to the news release dated February 17, 2010 and May 4, 2010, available on our website at www.kinross.com under the heading “Reconciliation of non-GAAP financial measures”. Comparative figures for the periods 2008 to 2008 represent cash flow from operating activities adjusted for changes in working capital only. Prior to the three and six months ended December 31, 2009, the Company did not prepare a reconciliation of adjusted operating cash flow, and readers should refer to the Company’s financial statements and Management’s Discussion and Analysis for the applicable periods for additional financial information prepared in accordance with GAAP.

3. Cost of sales per ounce is defined as cost of sales as per the financial statements divided by the number of gold equivalent ounces sold, both reduced for Kupol sales attributable to a third-party 25% shareholder.

4. Cost of sales margin is defined as the average realized gold price less attributable cost of sales per ounce.

5. Adjusted net earnings is a non-GAAP financial measure which are meant to provide additional information and should not be used as a substitute for performance measures prepared in accordance with GAAP. For more information about these non-GAAP financial measures, and a reconciliation of these non-GAAP financial measures for the three months ended March 31, 2010 and March 31, 2009, please refer to the news release dated May 4, 2010, available on our website at www.kinross.com under the heading “Reconciliation of non-GAAP financial measures”.

6. Please refer to Kinross’ Mineral Reserve and Resource Statement at December 31, 2009, contained in our news release dated January 28, 2010, which is available on our website at www.kinross.com. For historical reserve and resource information, refer to Kinross’ public filings, available on our website. Reserve and resource figures for Cerro Casale have been adjusted to reflect the sale of half of Kinross’ 50% interest to Barrick Gold Corporation.

7. Total ounce per 1,000 shares represent the sum of Proven and Probable Mineral Reserves, plus Measured and Indicated Mineral Resources in Mineral Resources pro-forma as at December 31 of the given year, divided by the shares outstanding as at December 31, 2009. Proven and Probable Mineral Reserves, Measured and Indicated Mineral Resources and Inferred Mineral Resources are separate categories under NI 43-101.

Fort Knox, USA (100%)

- Located in Alaska
- Expansion and new heap leach to extend mine life
- Material being stacked on new pads
