DELIVERING DISCIPLINED GROWTH

TASIAST INVESTOR TOUR
May 9, 2011
CAUTIONARY STATEMENT ON FORWARD-LOOKING INFORMATION

All statements, other than statements of historical fact, contained or incorporated by reference in or made in giving this presentation, including any information as to the future performance of Kinross, constitute “forward looking statements” within the meaning of applicable securities laws, including the provisions of the Securities Act (Ontario) and the provisions for “safe harbour” under the United States Private Securities Litigation Reform Act of 1995 and are based on expectations, estimates and projections as of the date of this presentation. Forward looking statements include, without limitation, possible events; opportunities; statements with respect to possible events or opportunities; estimates and the realization of such estimates; future development, mining activities, production and growth, including but not limited to cost and timing; success of exploration or development of operations; the future price of gold and silver; currency fluctuations; expected capital expenditures and requirements for additional capital; government regulation of mining operations and exploration; environmental risks; unanticipated reclamation expenses; and title disputes. The words “plans”, “expects”, “subject to”, “budget”, “estimate”, “scheduled”, “timeline”, “projected”, “pro forma”, “estimates”, “envision”, “view”, “forecasts”, “guidance”, “conceptual”, “target”, “possible”, “illustrative”, “model”, “opportunity”, “objective”, “potential”, “intends”, “anticipates” or “believes”, or variations of such words and phrases or statements that certain actions events or results may, can, could, would, should, might, indicates, will be taken, become, create, occur, or be achieved, and similar expressions identify forward looking statements. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by Kinross as of the date of such statements, are inherently subject to significant business, economic and competitive uncertainties and contingencies. Statements representing management’s financial and other outlook have been prepared solely for purposes of expressing their current views regarding the Company’s financial and other outlook and may not be appropriate for any other purpose. Many of these uncertainties and contingencies can affect, and could cause, Kinross’ actual results to differ materially from those expressed or implied in any forward looking statements made by, or on behalf of, Kinross. There can be no assurance that forward looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. All of the forward looking statements made in this presentation are qualified by these cautionary statements, and those made in our filings with the securities regulators of Canada and the U.S., including but not limited to those cautionary statements made in the “Risk Factors” section of our most recently filed Annual Information Form, the “Risk Analysis” section of our FYE 2010 Management’s Discussion and Analysis and the “Cautionary Statement on Forward-Looking Information” in our news release dated March 28, 2011, to which readers are referred and which are incorporated by reference in this presentation, all of which qualify any and all forward looking statements made in this presentation. These factors are not intended to represent a complete list of the factors that could affect Kinross. Kinross disclaims any intention or obligation to update or revise any forward-looking statements or to explain any material difference between subsequent actual events and such forward-looking statements, except to the extent required by applicable law.

Other information

Where we say “we”, “us”, “our”, the “Company”, or “Kinross” in this presentation, we mean Kinross Gold Corporation and/or one or more or all of its subsidiaries, as may be applicable. The technical information contained in this presentation has been prepared under the supervision of and verified by Dr. Glenton Masterman, an officer of the Company who is a “Qualified Person” within the meaning of National Instrument 43-101 (“NI 43-101”).
For additional information regarding the exploration, scientific and technical disclosure in this presentation, including applicable assumptions, processes, quality assurance / quality control and geological data, please refer to the following sources:

THE KINROSS WAY: A STRATEGIC BLUEPRINT

LEADING THE WORLD IN GENERATING VALUE THROUGH RESPONSIBLE MINING

1. Putting People First
2. Outstanding Corporate Citizenship
3. High Performance Culture
4. Rigorous Financial Discipline

RESOURCE GROWTH AT TASIAST

Proven and Probable Mineral Reserves
Measured & Indicated Mineral Resources (inclusive of 2P reserves)
Inferred Mineral Resources

Year-end 2008: 0.8 (Proven and Probable) + 3.7 (Measured & Indicated) = 4.5
November 2009: 1.4 (Proven and Probable) + 5.4 (Measured & Indicated) = 6.8
August 2010: 1.3 (Proven and Probable) + 6.5 (Measured & Indicated) = 7.8
September 2010: 1.9 (Proven and Probable) + 9.2 (Measured & Indicated) = 11.1
November 2010: 5.1 (Proven and Probable) + 9.3 (Measured & Indicated) = 14.4
Year-end 2010: 8.6 (Proven and Probable) + 7.6 (Measured & Indicated) = 16.2

DRIVING KINROSS STRATEGY

A. OPTIMIZE CORE OPERATIONS
   • High-quality, predictable, long-life mines
   • Drive value from core vs. non-core assets
   • Tight cost control / strong margins
   • Operational excellence and CI
   • Manageable geographic spread

B. GROWTH FROM TOP-QUALITY NEW PROJECTS
   • On-time, on-spec and on-budget delivery
   • Disciplined capital deployment
   • Accelerated timetables

C. OPTIMIZE FUTURE WITH EXPLORATION / INFILL M&A
   • Clear, reliable data in our outlook
   • Balanced, quality additions to portfolio
   • Excellence in analysis / execution / integration

STRATEGY
1. Growth in precious metals cash flow
2. Competitive advantage

EFFECTIVE ORGANIZATION
TASIAST REGIONAL GEOLOGY

Producing Mine
Exploration / Development Project

1. Tasiast (Kinross) - Au

2) Nouadhibou International Airport
3) Nouakchott International Airport
4) Port Minéralier
5) Nouakchott Deep-Sea Port

Tasiast

Reguibat Shield
Taoudeni Basin
Mauritanides Fold Belt
TASIAST, MAURITANIA

- Expanded drilling program focused around existing Tasiast mine
- Only 8 km of 80 km strike length tested
PROGRESSION OF DRILLING AT TASIAST
ADVANCING EXPLORATION AT TASIAST

- Accelerated drill program
  - 26 rigs (17 core/9 reverse circulation)
- Widened drill spacing to expand coverage
- Completed 64,000 metres drilling Q4 2010 and 135,000 metres in Q1 2011
- Defined extended mineralization in Greenschist Zone 700 metres down plunge
- Significant increase in total mineral resources
- Advanced understanding of Tasiast geologic model
  - Applying to mineral resource estimation and district exploration
- Commissioned sample preparation facility in Nouakchott
- Commenced construction of site Super Lab

5039RD: 45m @ 2.6 g/t*

Hole 5039RD: 20m @ 3.9 g/t

6124ARC: 19m @ 1.8 g/t*

Assays Pending (5103RD)

DYKE

Au g/t

< 0.2
0.2 to 0.5
0.5 to 1.0
1.0 to 2.0
~ 2.0

KINROSS
BANDED IRON FORMATION

• Thinly bedded quartz-magnetite+/-grunerite
• Intercalated with garnetiferous greenschist
• Gold grades 0.5-1.0 g/t Au where mineralized
  ▪ Po-cb replacement of magnetite bands

FELSIC UNIT

• Pale gray, highly sheared, pyritic
• Can have albite veining
• Rarely mineralized (Pluto),
  ▪ But can be high grade
• Felsic volcanic?

TA05018RD@604m – 38.6g/t Au
Recrystallized quartz vein in felsite within footwall
GST 1 GREENSCHIST UNIT

- Green, with large pink garnets
- Pyrite usually > pyrrhotite
- Actinolite + garnet > biotite
- Can have calcite-epidote-magnetite
- Weak / no gold
- Mafic volcaniclastic?
GST 2 GREENSCHIST UNIT 2

- Green - black, can have fine garnets
- Transitional between GST 1 & BST
- Biotite > actinolite + garnet
- Often mineralized, but generally lower grades than BST
- Usually defines >0.5 g/t envelope
- Veins are generally parallel to foliation
BST GREENSCHIST UNIT

- Black, coarse Bi on foliation, Plag feldspar
- No actinolite or garnet
- Mafic volcanic unit?
- Pyrrhotite >> pyrite. Sulfides generally 2 – 4%
- Magnetic
- Always mineralized, loosely defines >2 g/t contour
- Veins generally cut foliation at 10 – 30 deg
- Veins often contain visible gold
- Vein density > 5%
• BST correlates strongly with:

- Dolerite dike
- Major shear
- Volcaniclastic
- Banded Iron Formation
- Felsic Volcanic
- Greenschist
- GST 1
- GST 2
- BST
• BST correlates strongly with:
  1. High grade gold (> 2 g/t)
• BST correlates strongly with:
  1. High grade gold (> 2 g/t)
  2. High concentration of sulfides (> 2%)
• BST correlates strongly with:
  1. High grade gold (> 2 g/t)
  2. High concentration of sulfides (> 2%)
  3. High vein densities (>4%)
GST-PIM LONG SECTION – DEEP DRILL TARGETING

- WB1
- WB2
- PSS
- PSN
- PC

- YE2010 Pit Shell
- OPEN
- Current GST Extension
- GST Deep Plunge
- Fold Hinge Line
- GST Down-dip Repetition(?)
- TARGET
- TARGET
- PIM Plunge-Hinge Holes

Assays pending 200 m
DISTRICT EXPLORATION

- **Prolongation / Piment**
  - Deeper drilling to extend mineralization and target GST-style potential

- **C69 / Charlize**
  - Accelerate drilling on Charlize target and assess opportunity for resource drilling by end of Q1

- **Tasiast North (Aoeouat, C67 & C23)**
  - Follow-up drilling to assess potential

- **Drill Target Generation**
  - Define next generation of drill targets for second half of 2011 and 2012
TASIAST SUD (CHARLIZE & TSUD)

- Significant RC results:
  - Fe formation
  - 18m @ 1.37 g/t
  - 4m @ 2.88 g/t
  - 18m @ 0.82 g/t
  - 9m @ 1.48 g/t
  - 15m @ 0.99 g/t
C67 PROSPECT – RECENT RESULTS

- BIF-style oxide gold target encountered in recent shallow drilling
- Continuation to the North of known mineralisation at C67
- Prolongation North extension intersected along regional infill lines
OTHER LONG-TERM INITIATIVES

REGIONAL GEOCHEMISTRY

• Reassess effectiveness of original soil geochem surveys
  ▪ Regolith map
  ▪ Reanalyze soil and drill pulps by multi-element ICP
• Lithogeochemical mapping – fingerprint and target BST along the belt
• Alteration zonation (e.g., K, Na, Ca)
• Fingerprint Tasiast pathfinder signature (e.g., W, Bi, Te, Sb, As) and identify new geochem footprints in the belt
• Other deposit styles (e.g., high grade veins, intrusive-related)?

  >> 100,000 drill pulps analyzed for Au only
ADVANCING TASIAST

- 26 drills currently on site
  - 17 Diamond, 9 RC
- New sample prep facility in Nouakchott
- Construction of site Super Lab well advanced

2011 EXPLORATION PROGRAM

- Spending $55 million
- Engineering drilling to support feasibility study
- 130,000 m drilling at West Branch for infill and mineral resource expansion
- 84,000 m focused to extend mineralization underneath pits
- Drilling priority targets beyond mine corridor
TASIAST SCOPING STUDY

- Scoping study complete
- New processing plant with expected 60,000 tpd throughput – total 68,000 tpd
- 16-year mine life
- Expected avg. annual production of 1.5 mm oz (first 8 full yrs)
  - Expected avg. grade of 2 g/t
  - Expected avg. recoveries of 93%
- Average costs expected to be ~$480-520/oz
- Pre-commissioning capital estimate of $1.8 bn plus $400 mm contingency
- Additional fleet purchases of ~$500 mm post start-up
TASIAST, MAURITANIA

- Procurements for expanded mine fleet made
  - Shovels and drills now out to tender
  - Purchased generators with 16 MW of capacity
- Retained international EPCM joint-venture firm for feasibility study
  - Basic engineering commencing Q2 2011
- Appointed RVP, West Africa and Tasiast Project Director
- Feasibility study 62% complete
  - On schedule for completion mid-2011
- Construction expected to start mid-2012
  - Permitting in support of the project proceeding on schedule
- Operations expected to commence in H1 2014

ENDNOTES

2) Cost of sales per ounce is defined as cost of sales as per the financial statements divided by the number of gold equivalent ounces sold, both reduced for Kupol sales attributable to a third-party 25% shareholder and for Chirano sales attributable to a 10% minority interest holder.

3) Cost of sales margin is defined as the average realized price of gold less attributable cost of sales per ounce.

4) Adjusted operating cash flow numbers is a non-GAAP financial measures which are meant to provide additional information and should not be used as a substitute for performance measures prepared in accordance with GAAP. For more information about non-GAAP measures, and a reconciliation of non-GAAP financial measures for the three months ended March 31, 2011 and March 31, 2010, please refer to the press release dated May 3, 2011, and the news release dated February 16, 2011 the twelve months ended December 31, 2009 and December 31, 2010, under the heading “Reconciliation of non-GAAP financial measures”, both available on our website at www.kinross.com.

6) For historical mineral resource estimates relating to the Tasiast property, please refer to Red Back Mining’s public filings, available under Red Back’s profile on SEDAR.
