THIRD QUARTER 2012

2012 PRODUCTION & COST OUTLOOK<sup>(1)</sup>

- Identified \$200 million in cost savings, reducing expected 2012 capital expenditures to \$2.0 billion from \$2.2 billion
- Expect to be toward the high end of both production and cost guidance ranges:

Region	Gold Production <sup>(2)</sup> (000 oz. Au eq.)	% of Total Production	Production Cost of Sales <sup>(3)</sup> (\$/oz. Au eq.)
South America	890 – 930	36%	\$830 – \$870
North America	640 – 660	25%	\$620 – \$660
West Africa <sup>(2)</sup> (attributable)	430 – 460	17%	\$780 – \$820
Russia	535 – 565	22%	\$470 – \$495
<b>Total Kinross<sup>(2)</sup>:</b>	<b>2.5 – 2.6 million</b>	<b>100%</b>	<b>Gold equivalent: \$690 - \$725/oz By-product: \$605- \$655/oz</b>

**Key Sensitivities:** Taking into account existing currency and oil hedges, 10% change in foreign exchange could result in an approximate \$5 impact on production cost of sales per ounce. A \$10 change in the price of oil could result in an approximate \$2 impact on production cost of sales per ounce. The impact on royalties of a \$100 change in the gold price could result in an approximate \$4 impact on production cost of sales per ounce.

## UPDATE ON TASIAST OPTIMIZATION

### HEAP LEACH TESTING

- Gold recovery rates averaged approximately 60%
- Concluded that heap leaching does not provide an economically attractive alternative to CIL milling and that investment in fine crush heap leaching is not currently justified

### PRE-FEASIBILITY STUDY

- PFS on a mid-size, expandable CIL mill in the 30k tpd range is on track for completion in Q1/13
- Work has been focused on CIL milling as the preferred processing option and does not contemplate heap leaching - PFS economics are not affected by heap leach test results

### INFRASTRUCTURE DEVELOPMENT

- Continued work on basic infrastructure improvements, including:
  - Permanent camp
  - Tailings facility and West Branch dump leach pads
  - Truck shop and warehouse facilities
  - Main access road
  - West Branch stripping

**OTHER DEVELOPMENT PROJECTS**

**FRUTA DEL NORTE**

- Negotiations with the Ecuadorian government continue
- Government considering reforms to tax and mining laws to help mitigate effects of the Windfall Profits Tax
- Kinross does not expect to reach agreements with the government on exploitation and investment protection before 2013
- Exploring alternative processing scenarios for the project
  - Opportunities include potential for gravity float leach
  - May result in lower capital expenditures and reduced operating risk while improving overall project economics

**LOBO-MARTE**

- Completed review to identify possible project optimization options
- Considering smaller project alternatives with aim of reducing capital requirements and project execution risk
- Limiting capital spending to further project study and permitting

**2012 EXPLORATION PROGRAM**

**ENCOURAGING RESULTS YEAR-TO-DATE**

**TASIAST DISTRICT**

- Accelerated drill program in the district outside of the main orebody
- Encountered a number of new targets and positive follow-up drill results at C67 & C68

**CHIRANO**

- Drilling under the open pits has returned positive results and reinforces potential for mineralization to continue at depth

**LA COIPA**

- Infill, metallurgical, geotechnical and condemnation drilling at Pompeya completed
- Transitioning to Projects team as we continue to advance the opportunity

**KUPOL WEST**

- Recent drilling at the Moroshka target (4 km east of Kupol) has encountered encouraging precious metals mineralization
