AMERICAS

• Successfully recommissioned the mill at ROUND MOUNTAIN, which is now operating at full capacity

• FORT KNOX production lower compared with Q4 2014 due to expected seasonal slow down of production from the heap leach

• Expected decline in grades at KETTLE RIVER-BUCKHORN resulting in lower production and increase in costs

MARICUNGA UPDATE

- Severe weather event in northern Chile occurred in late March
- Roads and power lines in the area were severely damaged, while Maricunga facilities did not sustain any damage
- Mining and crushing temporarily suspended
  - ADR plant continues to operate at 80% capacity
- Plan to restart in June with the support of an additional back-up power plant
- Main power lines expected to be restored in September
- Expected to have an impact on Maricunga’s production and cost of sales in 2015; primarily in Q3
- Maintaining Americas regional guidance for 2015
AMERICAS
NEW PROCESSING INITIATIVE AT PARACATU

Expected to start-up Q4, contributing ~11,000 ounces in 2015

- Low-cost, incremental production resulting from:
  - Enriched grades near discharge areas of the facility
  - Utilization of excess capacity in Plant 1 due to ore blending strategy
  - Lower energy consumption as no grinding required

First quarter production at the combined operation increased compared with Q4 2014. Production cost of sales decreased to $476 per Au eq. oz., which is the lowest level since Q4 2012. Mainly due to savings associated with favourable foreign exchange movements. Began to increase proportion of higher grade DVOINOYE material going through the mill, which is expected to increase to 1,200 tpd from 1,000 tpd.

OPERATIONAL EXCELLENCE
WEST AFRICA

- **Tasiast** production declined compared with Q4 2014 as a result of mine sequencing and lower mill grades
  - Ongoing continuous improvement initiatives focused on improving efficiency and reducing costs
- Minimal impact to **Chirano** production as a result of power rationing in Ghana
  - Prioritized use of power from the national grid to mining and milling operations
  - Supplemented with use of back-up generators
  - Increased diesel consumption by 50%, which impacted cost of sales
