

## Joint Effort Brings Solar

By mid-2020, Dominion Energy is expected to have brought online nearly 600 megawatts of solar capacity — the equivalent of powering 150,000 homes — to help support Facebook's operations with 100 percent renewable energy.

Solar arrays have been completed in Gloucester County, Va., Westmoreland County, Va., and Northampton County, N.C. Five other projects are under development in two Virginia counties (Mecklenburg and Surry) and two counties in North Carolina (Halifax and Northampton).

"We are thrilled to be able to partner with Dominion Energy to support our operations with new renewable energy resources and bring additional investment to the region," said Bobby Hollis, head of Global Energy and Site Selection at Facebook.

## Emissions Are Falling at Dominion Energy

**Your company is one of the leading electric and gas utility companies in emissions reductions from energy infrastructure.**

Since 2005 — the base year in the Paris Agreement — Dominion Energy has reduced carbon dioxide emissions from its power stations by nearly 30 million metric tons, a 52 percent decline. Since 2000, the company has also lowered emissions of nitrogen oxides by 122,000 metric tons (a 92 percent decrease), sulfur dioxide by 365,000 metric tons (98 percent), and mercury by a metric ton (97 percent) from its generating fleet.

Dominion Energy plans to reduce carbon emissions 80 percent from 2005 to 2050, and has joined the CEO Climate Dialogue to call on national leaders to enact economy-wide, market-based climate policies.

On the gas side of the business, through voluntary initiatives, Dominion Energy has prevented more than 180,000 metric tons of methane from entering the atmosphere since 2010. That's equivalent to taking nearly 1 million cars off the road for a year or planting 75 million trees.

Our target to reduce methane emissions 50 percent between 2010 and 2030 would result in the prevention of more than 600,000 metric tons of methane from entering the atmosphere — equivalent to taking 3.3 million cars off the road for a year or planting 250 million trees.

## Environmental Targets By The Numbers

**-80%** / **CO<sub>2</sub>**  
(2005 to 2050)

## Company Holds 2019 Annual Meeting

This year's Annual Meeting of Shareholders was held in Columbia, S.C., near the headquarters of our gas and electric utility serving 1.1 million customer accounts in the Palmetto State.

More than 150 shareholders and their proxies attended the meeting. Shareholders approved Dominion Energy's slate of nominees to the Board of Directors. They also agreed to the company's choice of an independent auditor (Deloitte & Touche LLP), gave advisory approval to its executive compensation program, and amended the company's Articles of Incorporation to increase the number of authorized shares of common stock to 1.75 billion shares. They declined a shareholder proposal for an independent board chairman.

During his presentation, CEO Tom Farrell said your company is a sustainable, innovative, values-based organization with premium assets in premium locations with a strong reputation as a valued community partner.

When your 2020 Proxy Statement arrives next spring, please remember that every vote counts and is very important to us.

## Philanthropy Update

AT LEAST

# \$4.4 MILLION

The amount of community contributions the company expects to make in 2019 in the states where SCANA operated — the Carolinas and Georgia.

## Your Company Is Committed ...

### To EnergyShare

Dominion Energy's legacy customer assistance and weatherization program, EnergyShare, began 37 years ago in Virginia as a partnership among Dominion Energy, United Way of Greater Richmond and Petersburg and the Salvation Army agencies in Hampton Roads. The program now includes partnerships with more than 100 agencies and non-profits, and has helped more than 840,000 families, low-income individuals, people living with disabilities, the elderly and veterans.

With a \$250,000 commitment from Dominion Energy, EnergyShare will expand to South Carolina and replace and grow current assistance and energy efficiency programs that have served SCE&G customers for three decades.

EnergyShare will provide aid to South Carolina communities in the form of one-time energy bill assistance and permanent energy savings through weatherization.

### To Project Plant It!

The company is also expanding Project Plant It!, a 12-year-old Dominion Energy program that teaches students in 18 states about the importance of trees in the ecosystem. This year, new schools were added in parts of the Carolinas previously served by SCANA.

More than 500,000 seedlings have been distributed to students since 2007. According to the Virginia Department of Forestry, these seedlings, if planted and grown to maturity, would yield about 1,425 acres of new forest.

This newsletter contains forward-looking statements that are subject to various risks and uncertainties. Discussion of factors that could cause actual results to differ materially from management's projections, forecasts and estimates are detailed in the company's most recent Securities and Exchange Commission filings on Forms 10-Q and 10-K.
