INVESTOR CONNECTION

Spring 2026 A newsletter for investors of Dominion Energy

Company Supports Customer Affordability

Your company is focused on helping customers maintain control of their bills through resources, assistance, and clear communication about regulatory changes. And the company is laser-focused on customer affordability as bills rise from rate increases as well as from the cold weather the company's service areas experienced in January and February.

In late 2025, the State Corporation Commission of Virginia approved base and fuel rate increases for the 2.8 million homes and businesses that rely on Dominion Energy for reliable, affordable, and increasingly clean electricity every day. In early 2026, Dominion Energy South Carolina filed for an electric rate increase for 800,000 customers, citing grid investments and Hurricane Helene recovery costs.

Dominion Energy offers 54 energy-saving programs in Virginia, North Carolina, and South Carolina — such as time-of-use rebates and home energy audits — that help customers save both energy … and money. It also has created tools to make it easier for customers to track and manage their bills — such as energy usage alerts and budget billing.

The company offers customer assistance programs, too, including Dominion Energy's signature energy assistance program, EnergyShare. The program, founded in 1982, provides heating and cooling bill assistance and weatherization to more than 16,000 families in need of assistance each year.

Growth Plan, By the Numbers

3.6 M

Electric customers in Virginia, North Carolina, and South Carolina

Energy-efficiency and conservation programs offered by DEV & DESC

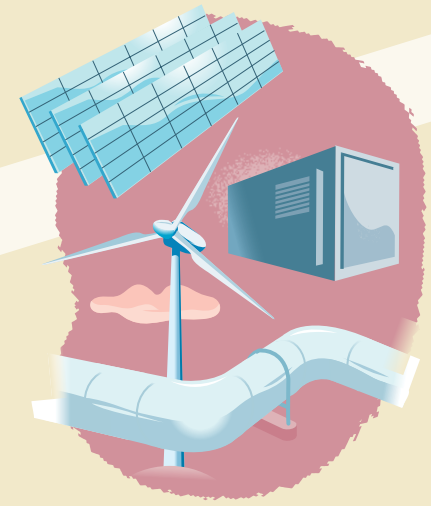

48,674

Families assisted through EnergyShare over the past three years

Company Makes Progress on Strategy

In 2025, your company made significant progress executing on its all-of-the-above strategy.

Dominion Energy brought online more than 250 MW of solar generation and battery storage and the 100-MW Parr gas peaking facility in South Carolina, and moved forward on its CVOW project off Virginia Beach.

Last year, state regulators approved additional infrastructure that will boost system reliability, such as a liquefied natural gas facility that will provide critical backup fuel to nearly 3 GW of gas-fired generation in Southside Virginia, a 1-GW gas peaking facility in Chesterfield County, Va., and a 200-MW gas peaking facility at Urquhart in South Carolina.

Dominion Energy Sets Annual Meeting Date

Dominion Energy has scheduled this year's Annual Meeting of Shareholders for May 5 at 9:30 a.m.

The meeting will be held virtually. Details, including the items to be voted on at the meeting and information on attending, can be found on the Investor Relations website and in the company's 2026 Proxy Statement.

As always, remember that your vote is critical.

ALL 10

of Dominion Energy Virginia's all-time peak customer demand records for the utility's transmission and distribution service areas were set in 2025 and 2026.

Your Company Is Committed ...

To Investing in Communities

Late last year, the Dominion Energy Charitable Foundation awarded $3.5 million to 388 organizations during its fall 2025 grant cycle, supporting programs that strengthen families and communities.

Grant recipients included the Midlands Housing Alliance's Transitions Actively Aging Program in Columbia, S.C., which provides beds and intensive case management for homeless adults 62 and older; and the Maggie Walker Community Land Trust's Homebuyer Support Program in Richmond, Va., which helps residents achieve and maintain homeownership.

Applications for the spring grant cycle closed on Feb. 20.

To Energizing Communities

Dominion Energy South Carolina's Lake Murray dam — also known as Dreher Shoals Dam — recently was recognized as a National Historic Civil Engineering Landmark.

Dreher Shoals was the first large dam construction project in the Southeastern U.S. and helped to electrify much of central South Carolina for the first time. Its designation as a National Historic Civil Engineering Landmark honors the innovative techniques used to build the dam.

It is also a major recreation area and an abundant resource for drinking water, fisheries, and wildlife habitats. Lake Murray covers approximately 50,000 acres, 650 miles of shoreline and holds approximately 763 billion gallons of water.

This newsletter contains forward-looking statements that are subject to various risks and uncertainties. Discussion of factors that could cause actual results to differ materially from management's projections, forecasts and estimates are detailed in the company's most recent U.S. Securities and Exchange Commission filings on Forms 10-Q and 10-K.
