Tennant Company's New T300 Scrubber Offers Innovative Technology and Unmatched Versatility

T300 / T300e Walk-Behind Scrubber Offers Multiple Cleaning Configurations for Many Environments

MINNEAPOLIS, June 23, 2015— **Tennant Company** (NYSE: TNC) today introduced its latest automatic scrubber - the T300 and T300e Walk-Behind Scrubber – adding to its broad portfolio of commercial floor scrubbers and cleaning solutions. The first scrubber of its kind equipped with Tennant's next generation cleaning innovation – ec-H2O NanoClean™ – the T300/T300e scrubber consistently

delivers reliable, high-performance results while lowering cleaning costs, according to key Tennant customers who have tested the machine in their own tough cleaning environments. Tennant Company is a world leader in designing,

manufacturing and marketing solutions that help create a cleaner, safer, healthier world.

“Tennant is continually innovating to improve our customer’s cleaning operations with high-performance sustainable technologies. It’s our commitment to drive innovation in both cleaning technology and cleaning process to help our customers clean more spaces, clean better, and clean for less,” said Dave Huml, Tennant Company Senior Vice President of Marketing.

The [T300 and T300e Walk-Behind Scrubbers](#) provide unmatched versatility to meet the many types of environments cleaned by our customers. Customers can choose from multiple machine configurations to optimize cleaning performance across virtually any hard surface condition. Configuration options include Single Disk, Orbital, Dual Disk, and Dual Cylindrical. The T300 also features an integrated Pro-Panel™ LCD touchscreen that provides simplified operation including programmable Zone settings™, supervisor lock-out capabilities and on-board/on-demand videos to take the guess work out of the cleaning process.

The T300/T300e addresses key business challenges for facility managers by delivering outstanding scrubbing results to enhance a facility’s image while offering innovative features to help protect health and safety, improve productivity, and minimize maintenance costs.

Key Benefits of Innovations:

- **Simplified Operation:** Pro-Panel™ integrates an LCD touchscreen with easy to understand graphics and provides onboard video tutorials for operators.
- **Improved Performance:** Hygenic® tanks allow for easy access when cleaning to help reduce mold, bacteria and other contaminants that can grow in enclosed tanks.
- **Ease of Use:** Insta-Click™ magnetic head to allow pads and brushes to be more easily changed with minimal operator effort.

The T300/T300e with [ec-H2O NanoClean™](#), the next generation of the successful, sustainable cleaning technology ec-H2O™. Like the original ec-H2O, ec-H2O NanoClean technology electrically converts water into an innovative cleaning solution that cleans effectively, saves money and reduces environmental impact compared to daily floor cleaning chemicals. This converted water is created by an on-board e-cell that generates millions of microscopic bubbles—nanobubbles—per milliliter of solution. These nanobubbles then promote the cleaning efficacy of the solution.
