About Avenzo Therapeutics

Avenzo Therapeutics is a clinical-stage biotechnology company focused on developing oncology therapies for patients. The company’s pipeline includes potentially best-in-class small molecules and bispecific antibody-drug conjugates (ADCs). Avenzo’s small molecule inhibitors, AVZO-021 and AVZO-023, are novel, highly potent and selective inhibitors of CDK2 and CDK4, respectively, which are key enzymes involved in cell cycle regulation. AVZO-021 is being evaluated in a Phase 1/2 study as monotherapy in advanced solid tumors and in combination with fulvestrant in HR+/HER2- metastatic breast cancer. AVZO-021 and AVZO-023 are being evaluated in the Phase 1/2

ORION-1 study in HR+/HER2- metastatic breast cancer, where AVZO-023 is administered in combination with endocrine therapy, with or without AVZO-021. Avenzo's first ADC drug candidate, AVZO-1418, is an EGFR/HER3 bispecific ADC that is being studied in the AVENTINE-1 Phase 1/2 study for the treatment of advanced solid tumors. Avenzo's second ADC drug candidate, AVZO-103, is a Nectin4/TROP2 bispecific ADC that is being studied in the BEACON-1 Phase 1/2 study for the treatment of advanced solid tumors. Avenzo is headquartered in San Diego, California. For more information, visit us at **www.avenzotx.com** or on **LinkedIn**.

Forward-Looking Statements

This press release contains forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995, including, without limitation, statements regarding: Avenzo's expectations with respect to its pipeline programs and clinical development plans, including the potential for its small molecules and bispecific antibody-drug conjugates to be best-in-class and the design, progress and results of the Phase 1/2 studies for AVZO-021, AVZO-023, AVZO-1418 and AVZO-103 (including the ORION-1, AVENTINE-1, and BEACON-1 studies); Avenzo's participation in the Piper Sandler 38th Annual Healthcare Conference and the availability of the live webcast and archived recording; and other statements that are not historical facts. These statements are subject to a number of risks, uncertainties and assumptions, including, but not limited to: preliminary and interim clinical results may not be indicative of results that may be observed in later stages of development or in larger patient populations; the timing and success of clinical trials and potential safety and other complications thereof; the uncertainties associated with the clinical development and regulatory approval of product candidates, including potential delays in the commencement, enrollment and completion of clinical trials; uncertainties in obtaining successful clinical results for product candidates and unexpected costs that may result therefrom; risks related to the failure to realize any value from product candidates and preclinical programs being developed and anticipated to be developed; risks related to the inability of Avenzo to obtain sufficient additional capital to continue to advance its product candidates and its preclinical programs; and uncertainties regarding Avenzo's abilities to achieve its long-term goals and capitalize on opportunities. Actual results and the timing of events could differ materially from those anticipated in such forward-looking statements as a result of these risks and uncertainties. You should not place undue reliance on these forward-looking statements, which are made only as of the date hereof or as of the dates indicated in the forward-looking statements. Except as required by law, Avenzo expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in its expectations with regard thereto or any change in events, conditions or circumstances on which any such statements are based.
