-- Cowen and Company, LLC 2nd Annual Clean Energy Conference in New York City on Wednesday, September 10, 2008, Panel Discussion on Solar Energy

About First Solar

First Solar, Inc. (Nasdaq: FSLR) manufactures solar modules with an advanced thin film semiconductor process and provides comprehensive system solutions that significantly reduce solar electricity costs. By enabling clean, renewable electricity at affordable prices, First Solar provides an economic alternative to peak conventional electricity and the related fossil fuel dependence, greenhouse gas emissions and peak time grid constraints. First Solar has set the benchmark for environmentally responsible product life cycle management by introducing the industry's first comprehensive collection and recycling program for solar modules. From raw material sourcing through end-of-life collection and recycling, First Solar is focused on creating cost-effective renewable energy solutions that protect and enhance the environment. First Solar modules have the lowest life cycle environmental impact of current photovoltaic technologies. In addition, First Solar power plants generate electricity with no air emissions, no waste stream and no water use.
