

Cautionary note on forward-looking statements

ICR Conference 2019

This presentation contains forward-looking statements, within the meaning of the Private Securities Litigation Reform Act of 1995 ("PSLRA"), which are subject to known and unknown risks, uncertainties and other important factors that may cause actual results to be materially different.

All statements other than statements of historical fact included in this presentation are forward-looking statements, including, but not limited to, expected financial outlook for fiscal 2018, preliminary financial outlook for 2019, expected Shack openings, expected same-Shack sales growth and trends in the Company's operations.

Forward-looking statements discuss the Company's current expectations and projections relating to their financial position, results of operations, plans, objectives, future performance and business. You can identify forward-looking statements by the fact that they do not relate strictly to historical or current facts. These statements may include words such as "aim," "anticipate," "believe," "estimate," "expect," "forecast," "outlook," "potential," "project," "projection," "plan," "intend," "seek," "may," "could," "would," "will," "should," "can," "can have," "likely," the negatives thereof and other similar expressions.

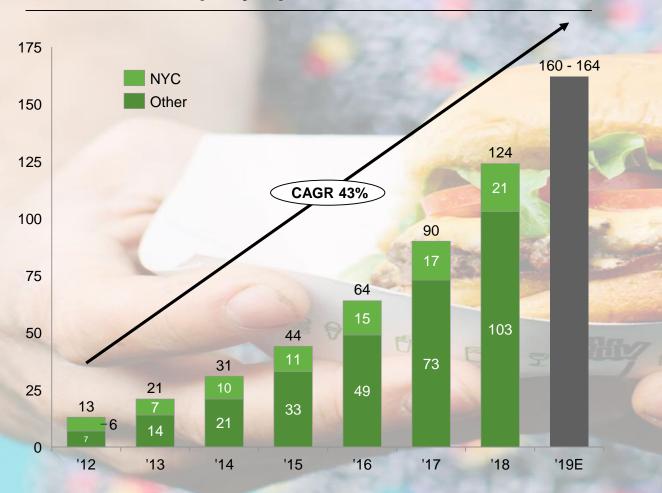

All forward-looking statements are expressly qualified in their entirety by these cautionary statements. You should evaluate all forward-looking statements made in this presentation in the context of the risks and uncertainties disclosed in the Company's Annual Report on Form 10-K for the fiscal year ended December 27, 2017 and subsequent Quarterly Reports on Form 10-Q filed with the Securities and Exchange Commission ("SEC"). All of the Company's SEC filings are available online at www.sec.gov, investor.shakeshack.com or upon request from Shake Shack Inc. The forward-looking statements included in this presentation are made only as of the date hereof. The Company undertakes no obligation to publicly update or revise any forward-looking statement as a result of new information, future events or otherwise, except as otherwise required by law.

We are relentlessly focused on excellence, experience and hospitality.

Strong momentum continues in domestic expansion

Domestic company-operated Shacks (At Fiscal Year End)

2018 headlines

- Record year with 34 domestic openings
- >80% of domestic Shacks are outside NYC at year end
- Entered 8 new markets including Denver,
 Charlotte, the Bay Area & Seattle
- ~80% of new openings in existing markets
- Shack formats continue to expand as we enter new markets and deepen reach in existing markets
- Brand strength continues to support premium real estate locations

Note: CAGR is the compounded annual growth rate represented by the midpoint of the '19 range in relation to '12

Broadening of Shack format to suit our new and existing markets

Shack format expanding to food trucks in Q1 '19

2 food trucks go into market early Feb Based in NJ and Atlanta but will operate on a broader regional basis

Will be staffed and supported by local Shacks

Community events, festivals, private parties, buyouts likely to be main sources of business

Brand marketing halo impact as part of local activation strategy

SIACIX innovation kitchen OT DOGS CONCRETES BURGERS FROZEN CUSTARD FRIES CONC

Strong international licensing expansion continues and represents an increasingly important part of the business

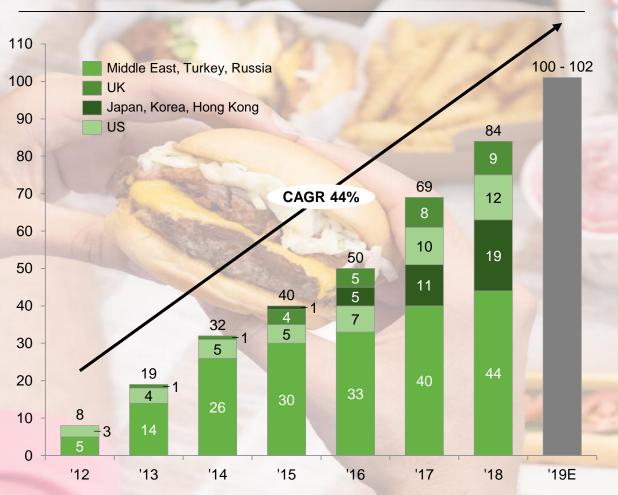

2018 headlines

- Opened 15 licensed Shacks across both the US and international locations
- Domestic airports gain strategic importance with openings in Atlanta and LaGuardia
- Entered Hong Kong for the first time in May '18 with second Shack in November
- Top-tier licensed partners come with strong track records and relationships
- Strength of brand proves itself internationally with strong openings and lines of excited local fans

Licensing a key part of our continued growth strategy

Licensed Shacks (At Fiscal Year End)

2019 headlines

- Shacks operating across 16 countries by the end of year
- First Mainland China Shack opening Q1 in Shanghai, a major milestone in our global footprint
- Additional new markets in 2019 include Mexico, Singapore, and the Philippines
- Domestic licensed strategy continues to focus on some of the country's strongest major airports adding Dallas, Denver and Phoenix in 2019
- Capital light licensed expansion model complements domestic owned approach allowing for optimum allocation of resources

Digital product development and innovation remain key strategic priorities and investments

New menu item innovation through Chick'n Bites and more

Investment in technology and infrastructure to further enable scale and growth

Appendix

INCLUDING GAAP & NON-GAAP MEASURES

Definitions

"Adjusted EBITDA," a non-GAAP measure, is defined as EBITDA excluding equity-based compensation expense, deferred rent expense, losses on the disposal of property and equipment, as well as certain non-recurring items that the Company does not believe directly reflect its core operations and may not be indicative of the Company's recurring business operations.

"Adjusted EBITDA margin," a non-GAAP measure, is defined as net income before net interest, taxes, depreciation and amortization, which also excludes equity-based compensation expense, deferred rent expense, losses on the disposal of property and equipment, as well as certain non-recurring items that the Company does not believe directly reflect its core operations, as a percentage of revenue.

"Average unit volumes" or "AUVs" for any 12-month period consist of the average annualized sales of all domestic company-operated Shacks over that period. AUVs are calculated by dividing total Shack sales from domestic company-operated Shacks by the number of domestic company-operated Shacks open during that period. For Shacks that are not open for the entire period, fractional adjustments are made to the number of Shacks open such that it corresponds to the period of associated sales.

"Same-Shack Sales" represents Shack sales for the comparable Shack base, which is defined as the number of domestic company-operated Shacks open for 24 full fiscal months or longer.

"EBITDA," a non-GAAP measure, is defined as net income before interest expense (net of interest income), income tax expense, and depreciation and amortization expense.

"Shack-level operating profit," a non-GAAP measure, is defined as Shack sales less Shack-level operating expenses including food and paper costs, labor and related expenses, other operating expenses and occupancy and related expenses.

"Shack-level operating profit margin," a non-GAAP measure, is defined as Shack sales less Shack-level operating expenses, including food and paper costs, labor and related expenses, other operating expenses and occupancy and related expenses as a percentage of Shack sales.

"Shack sales" is defined as the aggregate sales of food, beverages and Shake Shack-branded merchandise at domestic company-operated Shacks and excludes sales from licensed Shacks.

"Shack system-wide sales" is an operating measure and consists of sales from domestic company-operated Shacks, domestic licensed Shacks and international licensed Shacks. The Company does not recognize the sales from licensed Shacks as revenue. Of these amounts, revenue is limited to Shack sales from domestic company-operated Shacks and licensing revenue based on a percentage of sales from domestic and international licensed Shacks, as well as certain up-front fees such as territory fees and opening fees.

Shack-Level Operating Profit Definition

Third Quarter and YTD 2018

Shack-Level Operating Profit

Shack-level operating profit is defined as Shack sales less Shack-level operating expenses, including food and paper costs, labor and related expenses, other operating expenses and occupancy and related expenses.

How This Measure Is Useful

When used in conjunction with GAAP financial measures, Shack-level operating profit and Shack-level operating profit margin are supplemental measures of operating performance that the Company believes are useful measures to evaluate the performance and profitability of its Shacks. Additionally, Shack-level operating profit and Shack-level operating profit margin are key metrics used internally by management to develop internal budgets and forecasts, as well as assess the performance of its Shacks relative to budget and against prior periods. It is also used to evaluate employee compensation as it serves as a metric in certain performance-based employee bonus arrangements. The Company believes presentation of Shack-level operating profit and Shack-level operating profit margin provides investors with a supplemental view of its operating performance that can provide meaningful insights to the underlying operating performance of the Shacks, as these measures depict the operating results that are directly impacted by the Shacks and exclude items that may not be indicative of, or are unrelated to, the ongoing operations of the Shacks. It may also assist investors to evaluate the Company's performance relative to peers of various sizes and maturities and provides greater transparency with respect to how management evaluates the business, as well as the financial and operational decision-making.

Limitations of the Usefulness of this Measure

Shack-level operating profit and Shack-level operating profit margin may differ from similarly titled measures used by other companies due to different methods of calculation. Presentation of Shack-level operating profit and Shack-level operating profit margin is not intended to be considered in isolation or as a substitute for, or superior to, the financial information prepared and presented in accordance with GAAP. Shack-level operating profit excludes certain costs, such as general and administrative expenses and pre-opening costs, which are considered normal, recurring cash operating expenses and are essential to support the operation and development of the Company's Shacks. Therefore, this measure may not provide a complete understanding of the Company's operating results as a whole and Shack-level operating profit and Shack-level operating profit margin should be reviewed in conjunction with the Company's GAAP financial results. A reconciliation of Shack-level operating profit to operating income, the most directly comparable GAAP financial measure, is set forth below.

⁽¹⁾ The regions of domestic company-operated Shacks are defined as: NYC, which represents 5 boroughs; Northeast, which represents non-NYC NY, CT, DC, DE, MA, MD, NJ, PA, VA; Southeast, which represents AL, FL, GA, NC, TN, TX; Midwest, which represents IL, KY, MI, MN, MO, OH, WI; and West, which represents AZ, CA, CO, NV.

⁽²⁾ Corporate/Other includes any amounts not attributable to a specific Shack or any shack not open during the TTM Q3 2018 period and primarily relates to our corporate functions and other centralized operations.

Adjusted EBITDA Definition

Third Quarter and YTD 2018

EBITDA and Adjusted EBITDA

EBITDA is defined as net income before interest expense (net of interest income), income tax expense and depreciation and amortization expense. Adjusted EBITDA is defined as EBITDA (as defined above) excluding equity-based compensation expense, deferred rent expense, losses on the disposal of property and equipment, as well as certain non-recurring items that the Company does not believe directly reflect its core operations and may not be indicative of the Company's recurring business operations.

How These Measures Are Useful

When used in conjunction with GAAP financial measures, EBITDA and adjusted EBITDA are supplemental measures of operating performance that the Company believes are useful measures to facilitate comparisons to historical performance and competitors' operating results. Adjusted EBITDA is a key metric used internally by management to develop internal budgets and forecasts and also serves as a metric in its performance-based equity incentive programs and certain bonus arrangements. The Company believes presentation of EBITDA and adjusted EBITDA provides investors with a supplemental view of the Company's operating performance that facilitates analysis and comparisons of its ongoing business operations because they exclude items that may not be indicative of the Company's ongoing operating performance.

Limitations of the Usefulness of These Measures

EBITDA and adjusted EBITDA may differ from similarly titled measures used by other companies due to different methods of calculation. Presentation of EBITDA and adjusted EBITDA is not intended to be considered in isolation or as a substitute for, or superior to, the financial information prepared and presented in accordance with GAAP. EBITDA and adjusted EBITDA exclude certain normal recurring expenses. Therefore, these measures may not provide a complete understanding of the Company's performance and should be reviewed in conjunction with the GAAP financial measures. A reconciliation of EBITDA and adjusted EBITDA to net income, the most directly comparable GAAP measure, is set forth below.
