GRI 300: Environmental		
GRI 301: Materials		
3-3	Management of material topic	2024 Sustainability Report > How We Are <i>Building on the Good</i> , pages 8-9; Sustainability by Design, page 12; Resource Conservation, page 25
301-1	Materials used by weight or volume: Total weight or volume of non-renewable materials and renewable materials used	Given the proprietary nature of our formulations and many raw materials acquired from our suppliers, this is not a metric that Sherwin-Williams is able to disclose publicly at this time. However, general information pertaining to our production metrics can be found in our 2024 Annual Report, pages 7-11
301-2	Recycled input materials used: Percentage of recycled input materials used for products and services	2024 Sustainability Report > Sustainability by Design, page 12; Resource Conservation, page 25
301-3	Reclaimed products and their packaging materials: Percentage of reclaimed products and their packaging materials	2024 Sustainability Report > Resource Conservation, page 25
GRI 302: Energy		
3-3	Management of material topic	2024 Sustainability Report > Emissions and Energy, page 20
302-1	Energy consumption within the organization: Total fuel consumption within the organization from non-renewable and renewable sources	2024 Sustainability Report > Total Energy Consumption, page 21; Investor Sustainability Summary, page 56-57
302-3	Energy intensity: Types of energy included in the intensity ratio; whether fuel, electricity, heating, cooling, steam or all	2024 Sustainability Report > Investor Sustainability Summary, page 56
302-4	Reduction of energy consumption: Reductions in energy consumption achieved as a direct result of conservation and efficiency initiatives	2024 Sustainability Report > Total Energy Consumption, page 21; Investor Sustainability Summary, page 56
302-5	Reductions in energy requirements of products and services: Example, the energy requirements of a car or a computer	2024 Sustainability Report > Sustainability by Design, page 12; Resource Conservation, page 25
GRI 303: Water and Effluents		
3-3	Management of material topic	2024 Sustainability Report > Water Stewardship, page 28
303-1	Interactions with water as a shared resource: Interactions with water, how and where water is withdrawn, consumed, and discharged, and the water-related impacts	2024 Sustainability Report > Water Stewardship, page 28

The Sherwin-Williams Company — GRI Index, Continued

GRI Standard	GRI Disclosure	Location/Response 2024
303-2	Management of water discharge-related impacts: Controlling the quality of effluent discharge refers to the physical, chemical, biological and taste-related characteristics of water	<p>Sherwin-Williams has a Global Standard for Water and Soil Protection (the Standard) in place. The Standard describes the minimum water and soil protection and management criteria for Sherwin-Williams facilities. It is intended to promote water conservation and to minimize the discharge of contaminants to water or soil that could cause harm to human health or the environment. The Standard supplements national, regional and/or local laws, regulations, policies and standards, all of which, to the extent applicable to a facility, must be followed.</p> <p>The Standard requires that process water discharge stream(s) be analyzed for contaminants based upon knowledge of the process that generated the water. This information is used to determine if volume and contaminant levels are acceptable to discharge based upon laws, permits or best professional judgment. The assessment should establish the need for treatment, treatment options and/or disposal options. The Standard also requires periodic analysis of process discharges to be conducted as required by permits or to ensure the discharge has not changed. As part of the Standard, employees are instructed to promote water conservation and to minimize the discharge of contaminated water that could cause harm to human health or the environment. Facilities have been trained on the Standard regarding water, and audits are conducted to ensure proper procedures are being followed.</p> <p>Water that is used to clean process equipment and other process wastewater is managed through permitted discharges to wastewater treatment facilities, transported to licensed water treatment facilities, treated on-site or reused as a raw material.</p>
303-3	Water withdrawal: Surface water; Groundwater; Seawater; Produced water; Third-party water	2024 Sustainability Report > 2024 Water Withdrawal by Source, page 28; Investor Sustainability Summary, page 57
303-4	Water discharge: Surface water; Groundwater; Seawater; Produced water; Third-party water	2024 Sustainability Report > 2024 Water Discharge by Method, page 28; Investor Sustainability Summary, page 57
303-5	Water consumption: Water consumption measures water used by an organization such that it is no longer available for use by the ecosystem or local community	2024 Sustainability Report > Water Usage, page 28; Investor Sustainability Summary, page 57
GRI 305: Emissions		
3-3	Management of material topic	2024 Sustainability Report > Emissions and Energy, page 20
305-1	Direct (Scope 1) GHG emissions	2024 Sustainability Report > Total Scope 1 and Market-Based Scope 2 CO ₂ e Emissions, page 21; Investor Sustainability Summary, page 55
305-2	Energy indirect (Scope 2) GHG emissions	2024 Sustainability Report > Total Scope 1 and Market-Based Scope 2 CO ₂ e Emissions, page 21; Investor Sustainability Summary, page 55
