Forward-Looking Statements

This presentation includes "forward-looking" statements within the meaning of securities laws, which are statements that are not historical facts, including statements that relate to our future financial performance and targets, including revenue, EPS, operating income, operation margin and earnings; operating leverage; our business operations; demand for our products and services, including bookings and backlog; capital deployment, including the amount and timing of our dividends, our share repurchase program, and our capital allocation strategy, including M&A activities and investments, if any; our projected free cash flow and usage of such cash; our available liquidity; our anticipated revenue growth, including growth in organic revenue; performance of the markets in which we operate; our foreign exchange rate outlook, our credit rating; our productivity and cost savings initiatives; our sustainability initiatives and our effective tax rate.

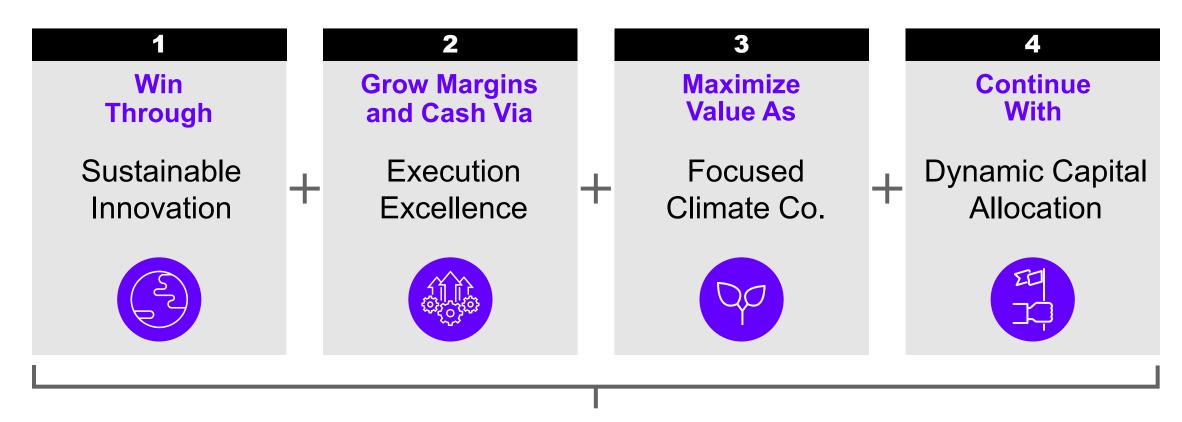

These forward-looking statements are based on our current expectations and are subject to risks and uncertainties, which may cause actual results to differ materially from our current expectations. Such factors include, but are not limited to, global economic conditions, including recessions and economic downturns, inflation, volatility in interest rates and foreign exchange; trade protection measures such as import or export restrictions, tariffs, or quotas; changing energy prices; worldwide geopolitical conflict; financial institution disruptions; climate change and our sustainability strategies and goals; future health care emergencies on our business, our suppliers and our customers; commodity shortages; price increases; government regulation; restructuring activity and cost savings associated with such activity; secular trends toward decarbonization, energy efficiency and internal air quality, the outcome of any litigation, including the risks and uncertainties associated with the Chapter 11 proceedings for our deconsolidated subsidiaries Aldrich Pump LLC and Murray Boiler LLC; cybersecurity risks; and tax audits and tax law changes and interpretations.

Additional factors that could cause such differences can be found in our Form 10-K for the year ended December 31, 2024, as well as our subsequent reports on Form 10-Q and other SEC filings. New risks and uncertainties arise from time to time, and it is impossible for us to predict these events and how they may affect the Company. We assume no obligation to update these forward-looking statements.

This presentation also includes non-GAAP financial information, which should be considered supplemental to, not a substitute for, or superior to, the financial measure calculated in accordance with GAAP. The definitions of our non-GAAP financial information are included as an appendix in our presentation and reconciliations can be found in our earnings releases for the relevant periods located on our website at www.tranetechnologies.com. Unless otherwise indicated, all data beyond the fourth quarter of 2024 are estimates.

Please refer to the free cash flow reconciliation on table 10 of the news release.

• Free cash flow conversion is defined as the ratio of free cash flow divided by adjusted net earnings

Operating leverage is defined as the ratio of the change in adjusted operating income for the current period (e.g. Q4 2024) less the prior period (e.g. Q4 2023), divided by the change in net revenues for the current period less the prior period.

Organic revenue is defined as GAAP net revenues adjusted for the impact of currency, acquisitions and divestitures.

Organic bookings is defined as reported orders in the current period adjusted for the impact of currency, acquisitions and divestitures.

Working capital measures a firm's operating liquidity position and its overall effectiveness in managing the enterprise's current accounts.

- **Working capital** is calculated by adding net accounts and notes receivables and inventories and subtracting total current liabilities that exclude short-term debt, dividend payables and income tax payables.
- Working capital as a percent of revenue is calculated by dividing the working capital balance (e.g. as of December 31) by the annualized revenue for the period (e.g. reported revenues for the three months ended December 31 multiplied by 4 to annualize for a full year).
