Ingersoll Rand Selected for the 2015 Dow Jones Sustainability World and North America Indices for Fifth Consecutive Year

Swords, Ireland, Sept. 10, 2015 – Ingersoll Rand (NYSE:IR), a world leader in creating comfortable, sustainable and efficient environments, has been named to the 2015 Dow Jones Sustainability World and North America Indices for the fifth consecutive year. Ingersoll Rand's placement on this index series further solidifies its position as an economic, environmental and social leader in its industries.

Ingersoll Rand products and services help save energy, transport food and perishables, and spur economic growth. Our business operations reflect a longstanding commitment to innovation, sustainability and corporate citizenship aimed at leading the way to a better world. Our economic, environmental and social contributions enhance the company's financial results, creating value for our employees, shareholders and business partners.

"We're pleased to be recognized on the Dow Jones Sustainability World and North America Indices as it reflects our efforts to increase transparency and promote responsible business practices," said Gary Michel, senior vice president and president of Residential heating, ventilation and air conditioning. "This honor would not be possible without the commitment of our employees who embed sustainability principles into how we operate the company, develop new products and do our part to solve big global issues like resource scarcity and climate impacts. Our shared passion for progress is evident in our efforts to exceed customers', employees', shareholders' and society's expectations."

The company earned yet another honor in early July when it was added to the FTSE Group's world renowned FTSE4Good Index Series. Inclusion on this list comes after announcement of the company's Climate Commitment, and inclusion on the most recent CDP S&P 500 Climate Change Report and MSCI Global Sustainability Indices. Ingersoll Rand was also recognized as the No. 1 Industrial Machinery company on FORTUNE Magazine's 2015 World's Most Admired Companies list.

The Dow Jones Sustainability Indices were launched in 1999 as the first global sustainability benchmarks. The indices are offered cooperatively by RobecoSAM and S&P Dow Jones Indices. The indices serve as benchmarks for investors who integrate sustainability considerations into their portfolios, and provide an effective engagement platform for companies who want to adopt sustainable best practices.
